CyberCulture Now: Social and Communication Behaviours on the Web Anna Maj, 2019-01-04 This volume was first published by Inter-Disciplinary Press in 2013. At present cyberculture is a dominating cultural paradigm and nothing seems to be able to replace it. We globally share the same cyberspace but there is a question whether we all together—the whole humankind—are really living in the same cyberculture? This book proves that we rather tend to define the contemporary state of culture as cybercultures. The process of spreading technologies, trends and ideas is not the same in all parts of the world. The varying speeds of this process and cultural diversity of its forms are created by different social, political, economic and cultural contexts. By representing different perspectives the authors depict a wide spectrum of the most important current problems connected with networked life, global sharing of data, loss of privacy, new meanings of community and developments in narrative structures and social behaviours arising from new communication possibilities, instantaneity of information and global viral sensitivity.

Growth, Structural Transformation, and Rural Change in Viet Nam Finn Tarp, 2017 Many developing countries-Viet Nam included-continue to struggle to raise incomes per capita. A common feature of the growth and development process is a fundamental change in the pattern of economic activity, as households reallocate labour from traditional agriculture to more productive forms of agriculture and modern industrial and service sectors. Broad structural transformation and widespread poverty reduction is the combined result of these large-scale shifts in work and labour allocation when they realise desired development goals. The roots of this volume grow from when the first pilot Viet Nam Access to Resources Household Survey (VARHS) was carried out in 2002. The success of this inspired the Central Institute of Economic Management (CIEM) in Hanoi, the Institute of Policy and Strategy for Agriculture and Rural Development (CAP-IPSARD), the Institute of Labour Science and Social Affairs (ILSSA), and the Development Economics Research Group (DERG) of the University of Copenhagen, together with Danida and later on UNU-WIDER, to plan and carry out a more ambitious VARHS from 2006, increasing coverage and representativeness to more than 2,150 families and 12 provinces across the various regions of Viet Nam. The VARHS covering these very same households had by 2014 been carried out five times, i.e. every two years. It is on this high quality panel data foundation and almost 15 years of study and policy work using the VARHS data the present volume builds, in its effort to bring out the essential rural micro-economic characteristics and insights of a dynamic South-East Asian economy in transition from a centrally planned towards a more market based economy.

Handbook of Global Research and Practice in Corruption Adam Graycar, Russell G. Smith, 2011-01-01 'Graycar and Smith's excellent edited volume studies corruption as a pervasive, global phenomenon. The chapters move from general overviews to in-depth studies of corruption-prone sectors such as forestry, financial markets, public procurement, and trade in diamonds and art. The volume is an important, contribution to the international study of corruption that mixes scholarly analysis with practical recommendations for the control and prevention of

corruption – both international initiatives and country – or sector-specific policies.' – Susan Rose-Ackerman, Yale Law School, US 'Corruption is on top of the agendas of practitioners and scholars in public administration all over the world. This volume addresses questions no one can neglect and comes up with answers we should not miss.' – Leo Huberts, VU University Amsterdam, The Netherlands 'This Handbook will serve as an invaluable resource for scholars, students and public officials interested in understanding corruption and its control.' – James B. Jacobs, NYU School of Law, US Corruption is a global phenomenon with costs estimated to be in the trillions of dollars. This source of original research and policy analysis deals with the most important concepts and empirical evidence in foreign corrupt practices globally. Handbook of Global Research and Practice in Corruption includes research from all continents and provides a critical analysis of the key issues of corruption and its control. Through rigorous analysis and theoretical foundations, this book provides a multi-disciplinary and international account of corruption from the perspectives of public policy, criminal law and criminology, as well as considering principles of prevention and control in both the public and private sectors. With original and empirical analyses, this unique book will appeal to academics, researchers and students in international business and international law, staff of crime and corruption commissions and police integrity agencies, as well as international organisations such as the World Bank, IMF, Transparency International and the World Economic Forum.

Vietnam: Asia's Rising Star Brook Taylor, Sam Korsmoe, 2023-10-15 The drivers behind the world's most exciting growth story. For more than 25 years, Vietnam has been one of the most dynamic countries in the world in terms of GDP growth, trade, investment, and other business metrics. The key question is whether or not the country can

continue this growth for another 25 years. If it can, Vietnam will become a high-income country like South Korea and Taiwan, the original Tiger Economies of Asia. Engaging in conversations about Vietnam's future is challenging. Locals are often too focused on the present while foreigners are caught up in legacy and political issues of the past. Many observers also focus on the short term, a specific economic metric, or inevitably Vietnam's political system without considering the big picture or recognizing long term trends. The authors researched and analyzed a broad range of drivers to assess a possible future for Vietnam, and Vietnam – Asia's Rising Star is the result of these efforts. What Others Are Saying "Vietnam – Asia's Rising Star should be read by anyone with an interest in Vietnam and anyone else with an interest in the future of Asia." –Carlyle A Thayer, professor emeritus, University of New South Wales, Canberra

The Palgrave Handbook of Global Philanthropy P. Wiepking, F. Handy, 2016-01-06 The Palgrave Handbook of Global Philanthropy is a comprehensive reference guide to the practice of philanthropy across twenty-six nations and regions. In addition, thematic chapters examine cross-national issues to provide an indispensable guide to the latest research in this field. Drawing on theoretical insights from sociology, economics, political science, and psychology, and including a stellar international line-up of leading philanthropy scholars, this essential reference work describes the non-profit sector and analyzes philanthropic endeavours country by country, providing a global overview that covers Asia, Europe, the Middle East, Australia and the Americas. In addition, thematic chapters examine cross-national issues, including the social origins of the non-profit sector and charitable giving; the influence of government support; the role of religion; fiscal incentives; and fundraising to outline how major country-specific differences in governmental, economic, and legal policies for philanthropic actors and nonprofit organizations shape philanthropic giving, demonstrating how country-specific factors may facilitate or inhibit charitable giving. Nonprofit organizations provide important public goods and services in societies across the world. In times of economic crisis, when governments are forced to decrease public spending, these organizations become even more important in meeting demands for these goods and services. But what motivates individuals to voluntarily give away portions of their own financial resources to benefit the public good and to enable nonprofit organizations to carry out their work? Why do people in one country give more frequently and more generously to nonprofit organizations than those in another? The Palgrave Handbook of Global Philanthropy provides an indispensable guide to the latest research in philanthropy, the non-profit sector and charitable giving.

Hackathons Unboxed Alvin Chia, 2017-10-15 How much do you know about hackathons, besides the fact that they are highly intense sessions where teams of "hackers" compete to create a game-changing business solution? Whether a potential organiser, a future participant, or just wondering what else you need to break out of the conventional, this book is for you. Hackathons Unboxed takes you behind the scenes, to unpack the seeming magic that gives birth to groundbreaking ideas in just three short days. There are in fact a series of repeatable steps – a well-researched methodology that anybody can follow. But we don't just hack in a vacuum. More than repeating principles such as human-centered design and experimentation, this book addresses the real-world constraints, the unforeseen

that may pop up – and how to tackle them. Above all, it will show you the link back to your business needs. All this is done to get your hackathon feeling more like a thriller with a happy ending, instead of three lost days. So dive right in, and let's start hacking!

The Changing Face of Vietnamese Management Chris Rowley, Quang Truong, 2009-09-23 Vietnam has emerged from long periods of colonialization, wars and ideological conflicts to become an important economic force within Asia and a promising destination for international business ventures. The latest book in the popular Working in Asia series, *The Changing Face of Vietnamese Management*, draws on the experiences of local, Vietnamese experts to offer a unique perspective on the opportunities, challenges and issues facing managers and organizations operating in this fascinating emerging market. The book: Contextualizes political, economic and social traditions Discusses Vietnam's competitiveness within the global economy Analyzes key functional areas, including HRM, marketing, finance and strategy Examines key issues and new developments in management and business This key text includes illustrative case studies and vignettes to provide broad coverage and content that would serve the needs of students and managers alike.

Information Technology in Vietnam (and Southeast Asia): Discussion Cases Mathews Zanda Nkhoma, Narumon Sriratanaviriyakul, Hiep Pham, Vo Thi Trung Trinh, Huan Khoa Le, Hung Xuan Vo, 2014 Over the past decade, Vietnam has become a major player in the rapidly growing region of Southeast Asia. Anyone who has visited the country has sensed the extraordinary energy of its commercial activities. Few outsiders, however, have been granted access to the individual decision making processes that have driven this rapid development. With the publication of this book, that situation has changed. The ten discussion cases included in the collection examine important choices facing Vietnamese decision-makers in a broad range of contexts. Examples of these contexts include: a locally developed ERP considers how to compete with much larger international players, a coffee shop examines how IT might be harnessed to address employee theft, a burgeoning eCommerce site that leads in book sales wonders what it should sell next, an IT manager tries to decide whether or not to risk failure by accepting a promotion to a new level, a textile manufacturer seeks to use IT to more effectively manage production, a local investment company attempts to redesign its portal, and the list goes on--and even includes one entry from Vietnam's neighbor, Thailand. The ten case studies provided in this book are all open, authentic, discussion cases. What makes them open is that none of them have a right answer--although each has strong and weak responses to the situation described. They are authentic because each has been meticulously researched by its authors and, with the exception of some of the names (which have been disguised), they describe an actual situation faced by the key decision-maker. Most importantly, what makes them discussion cases is the fact that they are specifically optimized for use as a basis for discussion in the classroom, the teaching technique known as the case method.

Sustainable Packaging Subramanian Senthilkannan Muthu, 2021-09-07 Packaging plays a major role in the environmental footprints of products from any industrial sector, and thus is important to address the

sustainability issues of packaging. Packaging and the packaging sector have to be eco-conscious as there are many types of packaging across various industrial sectors and so are their environmental impacts as well. Plastic packaging is one of the most common element and the packaging sector accounts for almost 40% of plastic pollution in the world. Sustainable packaging is the only way forward to alleviate the environmental devastations from the the packaging sector. This book presents case studies and discusses how to make packaging more sustainable for a better future. □

The Corruption Cure Robert I. Rotberg, 2017-05-09 Why leadership is key to ending political and corporate corruption globally Corruption corrodes all facets of the world's political and corporate life, yet until now there was no one book that explained how best to battle it. The Corruption Cure provides many of the required solutions and ranges widely across continents and diverse cultures—putting some thirty-five countries under an anticorruption microscope—to show exactly how to beat back the forces of sleaze and graft. Robert Rotberg defines corruption theoretically and practically in its many forms, describes the available legal remedies, and examines how we know and measure corruption's presence. He looks at successful and unsuccessful attempts to employ anticorruption investigative commissions to combat political theft and venal behavior. He explores how the globe's least corrupt nations reached that exceptional goal. Another chapter discusses the role of civil society in limiting corruption. Expressed political will through determined leadership is a key factor in winning all of these battles. Rotberg analyzes the best-performing noncorrupt states to show how consummate leadership made a telling difference. He demonstrates precisely how determined leaders changed their wildly corrupt countries into paragons of virtue, and how leadership is making a significant difference in stimulating political anticorruption movements in places like India, Croatia, Honduras, and Lebanon. Rotberg looks at corporate corruption and how it can be checked, and also offers an innovative fourteen-step plan for nations that are ready to end corruption. Curing rampant corruption globally requires strengthened political leadership and the willingness to remake national political cultures. Tougher laws and better prosecutions are not enough. This book enables us to rethink the problem completely—and solve it once and for all.
