Composing Capital Marianna Ritchey, 2019-08-05 The familiar old world of classical music, with its wealthy donors and ornate concert halls, is changing. The patronage of a wealthy few is being replaced by that of corporations, leading to new unions of classical music and contemporary capitalism. In *Composing Capital*, Marianna Ritchey lays bare the appropriation of classical music by the current neoliberal regime, arguing that artists, critics, and institutions have aligned themselves—and, by extension, classical music itself—with free-market ideology. More specifically, she demonstrates how classical music has lent its cachet to marketing schemes, tech firm-sponsored performances, and global corporate partnerships. As Ritchey shows, the neoliberalization of classical music has put music at the service of contemporary capitalism, blurring the line between creativity and entrepreneurship, and challenging us to imagine how a noncommodified musical practice might be possible in today's world.

The Power of Cities in International Relations Simon Curtis, 2014-04-16 Cities have become increasingly important to global politics, but have largely occupied a peripheral place in the academic study of International Relations (IR). This is a notable oversight for the discipline, although one which may be explained by IR's traditional state centrism, the subjugation of the city to the demands of the territorial state in the modern period, and a lack of conceptual and analytical frameworks that can allow scholars to include the impact of cities within their work. Presenting case-specific scholarship from leading experts in the field, each contribution guides the reader through the changing nature of cities in the international system and their increasing prominence in global governance outcomes. The book features case studies on the financial power of cities, city action in the security domain, collaboration of cities in coping with environmental problems, transnational urban regions, and mayors as international actors to illustrate if the relationship between the city and the state has changed in profound ways, and how cities are empowered by structural changes in world politics. The multidisciplinary and global focus in *The Power of Cities in International Relations* sheds much needed light on the significance of the reemergence of cities from the long shadow of the nation-state. Only by examining the mechanisms that have empowered cities in the last few decades can we understand their new functions and capabilities in global politics.

Administração estratégica Michael A. Hitt,R. Duane Ireland,Robert E. Hoskisson,2022-10-21 O objetivo desde livro é apresentar um padrão atualizado sobre o processo de gestão estratégica. Para alcançar esse objetivo, é apresentada uma análise intelectualmente rica e cuidadosamente prática da gestão estratégica.O padrão de apresentar o conhecimento sobre gestão estratégica em um estilo de fácil leitura foi mantido, e para garantir que o conteúdo esteja atualizado e preciso, foram estudadas as pesquisas acadêmicas mais recentes a partir de artigos publicados em muitas publicações de negócios, como Wall Street Journal, Bloomberg Businessweek, Fortune, Financial Times, Fast Company e Forbes. Fundamentals of 5G Mobile Networks Jonathan Rodriguez,2015-06-22 Fundamentals of 5G Mobile Networks provides an overview of the key features

of the 5th Generation (5G) mobile networks, discussing the motivation for 5G and the main challenges in developing this new technology. This book provides an insight into the key areas of research that will define this new system technology paving the path towards future research and development. The book is multi-disciplinary in nature, and aims to cover a whole host of intertwined subjects that will predominantly influence the 5G landscape, including the future Internet, cloud computing, small cells and self-organizing networks (SONs), cooperative communications, dynamic spectrum management and cognitive radio, Broadcast-Broadband convergence, 5G security challenge, and green RF. Transitions from Education to Work Roslyn Cameron, Subas Dhakal, John Burgess, 2017-11-22 Labour markets are becoming more dynamic in response to pressures from globalisation, new technologies and trade agreements, as well as cross-border migration, inter-generation differences, changing education imperatives and employer expectations. By focusing on several Asia Pacific countries, this book explores the differences in their workforces: ageing, or abundant in labour but lacking in skilled employees. One similarity these countries share is the difficulty in attracting and retaining employees with the required skillset and capabilities, and these constraints can stymie national economic growth and long term development. This book brings together national and international perspectives on employability challenges faced by selected countries in the Asia Pacific region. While the region is forecast to enjoy high growth in the coming decade, a recurring challenge is addressing skill shortages and ensuring effective transition from training colleges and universities into employment. Consequently, the book focuses on the roles of multiple stakeholders, primarily: governments, education providers and employers – in more effectively addressing these key socio-economic challenges.

Supply Chain Risk John Manners-Bell, 2014-04-03 Risk is at the very core of supply chain theory and is at the heart of every decision-making process. Supply chain risk is now becoming everyone's responsibility and over the last two years has become more important than ever, making its presence on the boardroom agenda of most big companies. Supply Chain Risk assesses the various sources of external threat to the supply chain and how multinational corporations should be dealing with them at a strategic level. In this book John Manners-Bell clearly shows how to implement risk strategies that minimize, even completely eliminate, supply chain risk, and outlines how to build resilient supply chains. Supply Chain Risk includes case studies of best practice and cites examples of when and how things go wrong. Each case study describes the company's supply chain strategy and production/sourcing strategy, outlines the catastrophic event which occurred, including the supply chain consequences and material losses, the management response, and resultant changes to company supply chain strategy. The book is accompanied by invaluable downloadable online resources, including a survey on companies' attitudes to supply chain risk. Supply Chain Risk has won the ACA-Bruel Special Mention prize for its contribution to the development of leading new concepts and methods in purchasing and supply chain. The prize is organised

by the Association of Purchasing and Supply Chain (CESA) of HEC School of Management in Paris. Highly accessible with real practical application, Supply Chain Risk is for supply chain managers and anyone interfacing with the supply chain.

The Delusion of Knowledge Transfer Koch, Susanne, Weingart, Peter, 2016-12-13
With the rise of the 'knowledge for development' paradigm, expert advice has become a prime instrument of foreign aid. At the same time, it has been object of repeated criticism: the chronic failure of 'technical assistance' – a notion under which advice is commonly subsumed – has been documented in a host of studies. Nonetheless, international organisations continue to send advisors, promising to increase the 'effectiveness' of expert support if their technocratic recommendations are taken up. This book reveals fundamental problems of expert advice in the context of aid that concern issues of power and legitimacy rather than merely flaws of implementation. Based on empirical evidence from South Africa and Tanzania, the authors show that aid-related advisory processes are inevitably obstructed by colliding interests, political pressures and hierarchical relations that impede knowledge transfer and mutual learning. As a result, recipient governments find themselves caught in a perpetual cycle of dependency, continuously advised by experts who convey the shifting paradigms and agendas of their respective donor governments. For young democracies, the persistent presence of external actors is hazardous: ultimately, it poses a threat to the legitimacy of their governments if their policy-making becomes more responsive to foreign demands than to the preferences and needs of their citizens.
