The Future of Ideas Lawrence Lessig, 2002-10-22 The Internet revolution has come. Some say it has gone. In *The Future of Ideas*, Lawrence Lessig explains how the revolution has produced a counterrevolution of potentially devastating power and effect. Creativity once flourished because the Net protected a commons on which widest range of innovators could experiment. But now, manipulating the law for their own purposes, corporations have established themselves as virtual gatekeepers of the Net while Congress, in the pockets of media magnates, has rewritten copyright and patent laws to stifle creativity and progress. Lessig weaves the history of technology and its relevant laws to make a lucid and accessible case to protect the sanctity of intellectual freedom. He shows how the door to a future of ideas is being shut just as technology is creating extraordinary possibilities that have implications for all of us. Vital, eloquent, judicious and forthright, *The Future of Ideas* is a call to arms that we can ill afford to ignore.

From the City to the Desert Raffael Beier, 2019-08-23 In recent years, large-scale housing and resettlement projects have experienced a renaissance in many developing countries and are increasingly shaping new urban peripheries. One prominent example is Morocco's Villes Sans Bidonville (cities without shantytowns) programme that aims at eradicating all shantytowns in Morocco by resettling its population to apartment blocks at the urban peripheries. Analysing the specific resettlement project of Karyan Central, a 90-year-old shantytown in Casablanca, this book sheds light on both process and outcome of resettlement from the perspective of affected people. It draws on rich empirical data from a structure household survey (n=871), qualitative interviews with different stakeholder, document analysis, and non-participant observation gathered during four months of field research. The author emphasises that the VSB programme, although formally part of anti-poverty and urban inclusion policies, puts primary focus on the clearance of the shantytown. Largely based on ill-informed policy assumptions, stigmatisation, rent-seeking, and opaque implementation practices, the VSB programme interpreted adequate housing in a narrow sense. By showing how social interactions, employment patterns, and access to urban functions have changed because of resettlement, the book provides sound empirical evidence that housing means more than four walls and a roof.

Snapshots Norma Polovitz Nickerson, William C. Murray, Paula Kerr, 2013-02-15 *Snapshots: An Introduction to Tourism* is a concise, easy-to-read overview of the Canadian tourism industry. Beginning with a history of the industry's development, *Snapshots* proceeds to highlight the interrelation of the various components of the industry, as well as the impact of tourism on the

Canadian economy, culture, and environment. The Sixth Canadian edition has been updated and reorganized to conform to the new North American Industrial Classification System's five sectors of tourism and features a chapter devoted to each segment.

Getting Better Bite by Bite Ulrike Schmidt, Janet Treasure, June Alexander, 2015-09-16 *Getting Better Bite by Bite* is an essential, authoritative and evidence-based self-help programme that has been used by bulimia sufferers for over 20 years. This new edition maintains the essence of the original book, while updating its content for today's readers, drawing on the latest knowledge of the biology and psychology of bulimia and its treatment. The book provides step-by-step guidance for change based on solid research. The use of everyday language, stimulating contemporary case study story-telling and evocative illustrations in *Bite by Bite* provide encouragement, hope and new perspectives for all readers. This handy-sized book fills a need for easy-to-understand information about Bulimia Nervosa, a serious and prevalent eating disorder. Ulrike Schmidt and Janet Treasure are world-renowned researchers and authorities on eating disorders, and June Alexander, a former sufferer of anorexia and bulimia, is a respected writer and internationally-known eating disorder awareness advocate. *Getting Better Bite by Bite* is a valuable resource - for sufferers, for their families, and for the health professionals and carers treating them.

If Only We Knew What We Know C. Jackson Grayson, Carla O'dell, 2011-11-08 While companies search the world over to benchmark best practices, vast treasure troves of knowledge and know-how remain hidden right under their noses: in the minds of their own employees, in the often unique structure of their operations, and in the written history of their organizations. Now, acclaimed productivity and quality experts Carla O'Dell and Jack Grayson explain for the first time how applying the ideas of Knowledge Management can help employers identify their own internal best practices and share this intellectual capital throughout their organizations. Knowledge Management (KM) is a conscious strategy of getting the right information to the right people at the right time so they can take action and create value. Basing KM on three major studies of best practices at one hundred companies, the authors demonstrate how managers can utilize a visual process model to actually transfer best practices from one business unit of the organization to another. Rich with case studies, concrete examples, and revealing anecdotes from companies including Texas Instruments, Amoco, Buckman, Chevron, Sequent Computer, the World Bank, and USAA, this valuable guide reveals how knowledge treasure chests can be unlocked to reduce product development cycle time, implement more cost-efficient operations, or create a loyal customer base. Finally, O'Dell and Grayson present three value propositions built around customers, products, and operations that could result in staggering payoffs as they did at the companies cited above. No amount of knowledge or insight can keep a company ahead if it is not properly distributed where it's needed. Entirely accessible and immensely readable, *If Only We Knew What We Know* is a much-needed companion for business leaders everywhere.

Worlds in Motion : Understanding International Migration at the End of the Millennium Douglas S. Massey, Joaquin Arango, Graeme Hugo, Ali Kouaouci, Adela Pellegrino, 1999-01-28 At the end of the 20th century nearly all developed nations have become countries of immigration, absorbing growing numbers of immigrants not only from developed regions, but increasingly from developing nations of the Third World. Although international migration has come to play a central role in the social, economic, and demographic dynamics of both immigrant-sending and immigrant-receiving countries, social scientists have been slow to construct a comprehensive theory to explain it. Efforts at theoretical explanation have been fragmented by disciplinary, geographic, and methodological boundaries. *Worlds in Motion* seeks to overcome these schisms to create a comprehensive theory of international migration for the next century. After explicating the various propositions and hypotheses of current theories, and identifying areas of complementarity and conflict, the authors review empirical research emanating from each of the world's principal international migration systems: North America, Western Europe, the Gulf, Asia and the Pacific, and the Southern Cone of South America. Using data from the 1980s, levels and patterns of migration within each system are described to define their structure and organization. Specific studies are then comprehensively surveyed to evaluate the fundamental

propositions of neoclassical economics, the new economics of labour migration, segmented labour market theory, world systems theory, social capital theory, and the theory of cumulative causation. The various theories are also tested by applying them to the relationship between international migration and economic development. Although certain theories seem to function more effectively in certain systems, all contain elements of truth supported by empirical research. The task of the theorist is thus to identify which theories are most effective in accounting for international migration in the world today, and what regional and national circumstances lead to a predominance of one theoretical mechanism over another. The book concludes by offering an empirically-grounded theoretical synthesis to serve as a guide for researchers and policy-makers in the 21st century.

Queer Ricans Lawrence Martin La Fountain-Stokes,2009 Exploring cultural expressions of Puerto Rican queer migration from the Caribbean to New York, Philadelphia, Chicago, and San Francisco, Lawrence La Fountain-Stokes analyzes how artists have portrayed their lives and the discrimination they have faced in both Puerto Rico and the United States. Highlighting cultural and political resistance within Puerto Rico's gay, lesbian, bisexual, and transgender subcultures, La Fountain-Stokes pays close attention to differences of gender, historical moment, and generation, arguing that Puerto Rican queer identity changes over time and is experienced in very different ways. He traces an arc from 1960s Puerto Rico and the writings of Luis Rafael Sánchez to New York City in the 1970s and 1980s (Manuel Ramos Otero), Philadelphia and New Jersey in the 1980s and 1990s (Luz María Umpierre and Frances Negrón-Muntaner), and Chicago (Rose Troche) and San Francisco (Erika López) in the 1990s, culminating with a discussion of Arthur Avilés and Elizabeth Marrero's recent dance-theater work in the Bronx. Proposing a radical new conceptualization of Puerto Rican migration, this work reveals how sexuality has shaped and defined the Puerto Rican experience in the United States.

Toward an Other Globalization: From the Single Thought to Universal Conscience Milton Santos,2017-05-11 This book presents an alternative theory of globalization that derives not from the dominant perspective of the West, from which this process emerged, but from the critical vantage point of the Third World, which has borne the heaviest burdens of globalization. It offers a critical and uniquely first-hand perspective that is lacking not only from the apologists of Western hegemony, but from most scholars writing against this hegemony from within the globalizing world. Renowned throughout Latin America and parts of Europe, the author, Brazilian geographer Milton Santos, has long been for the most part inaccessible to the English-speaking world. Only one of his books, *The Shared Space: The Two Circuits of the Urban Economy in Underdeveloped Countries*, published in 1975, has been translated into English; nevertheless, the works of Santos's most important phase, from the 1980s until his death in 2001, have remained unavailable to English readers. With the translation of *Toward an Other Globalization*, one of the last works published in Santos's lifetime, this situation has finally been rectified. In this book, Santos argues that we must consider globalization in three different senses: globalization as a fable (the world as globalizing agents make us believe), as perversity (the world as it is presently, in the throes of globalization), and as possibility (the world as it could be). What emerges from the analysis of these three senses is an alternative theory of globalization rooted in the perspective of the so-called Global South. Santos concludes his text with a message that is optimistic, but in no way naïve. What he offers instead is a revolutionary optimism and, indeed, an other globalization.

Urban Life in Post-Soviet Asia Catharine Alexander,Victor Buchli,Caroline Humphrey,2007-09-12 Capturing a unique historical moment, this book examines the changes in urban life since the collapse of the Soviet Union from an ethnographic perspective, thus addressing significant gaps in the literature on cities, Central Asia and post-socialism. It encompasses Tashkent, Almaty, Astana and Ulan-Ude: four cities with quite different responses to the fall of the Soviet Union. Each chapter takes a theme of central significance across this huge geographical terrain, addresses it through one city and contextualizes it by reference to the other sites in this volume. The structure of the book moves from nostalgia and memories of the Soviet past to examine how current changes are

being experienced and imagined through the shifting materialities, temporalities and political economies of urban life. Privatization is giving rise to new social geographies, while ethnic and religious sensibilities are creating emergent networks of sacred sites. But, however much ideologies are changing, cities also provide a constant lived mnemonic of lost configurations of ideology and practice, acting as signposts to bankrupted futures. Urban Life in Post-Soviet Asia provides a detailed account of the changing nature of urban life in post-Soviet Asia, clearly elucidating the centrality of these urban transformations to citizens' understandings of their own socio-economic condition.

Underground Suelette Dreyfus, Julian Assange, 2012-01-05 Suelette Dreyfus and her co-author, WikiLeaks founder Julian Assange, tell the extraordinary true story of the computer underground, and the bizarre lives and crimes of an elite ring of international hackers who took on the establishment. Spanning three continents and a decade of high level infiltration, they created chaos amongst some of the world's biggest and most powerful organisations, including NASA and the US military. Brilliant and obsessed, many of them found themselves addicted to hacking and phreaking. Some descended into drugs and madness, others ended up in jail. As riveting as the finest detective novel and meticulously researched, Underground follows the hackers through their crimes, their betrayals, the hunt, raids and investigations. It is a gripping tale of the digital underground.

Identity in Formation David D. Laitin, 1998 Laitin portrays these Russian-speakers as a beached diaspora since the populations did not cross international borders; the borders themselves receded. He asks what will become of these populations. Will they learn the languages of the republics in which they live and prepare their children for assimilation? Will they return to a homeland many have never seen? Or will they become loyal citizens of the new republics while maintaining a Russian identity?

The Fur Trade in Canada Harold Adams Innis, 1999-01-01 A classic work of Canadian historical scholarship, first published in 1930. In his new introduction, A.J. Ray states that this book is arguably the most definitive economic history and geography of Canada ever produced.
