Inside Citrix Bas Van Kaam,2016-05-16 Inside Citrix - The FlexCast Management Architecture focuses on the FMA, mainly from an architectural point of view. It will discuss, in detail all of its main components and services, their primary roles and responsibilities, including some of the most common optional components, features and/or closely related technologies. From the basics to deep (er) dives where applicable, I will make sure to include something for everybody. Do note that this book is not meant as an installation and/or how-to manual, instead it will dive deeper into the FMA, the true foundation of Citrix XenDesktop and XenApp. Topics include but are not limited to: A deep dive into the FMA's main services, its evolution, a detailed overview on the user authentication, application enumeration and launch processes, Citrix printing, the ICA / HDX protocol, application delivery, MCS, PVS, troubleshooting, some history, fun facts and figures and (much) more. I have concluded each chapter with multiple key takeaways (a few hundred in total) and also included over 100 so-called FMA facts throughout the various chapters.

The Power of Participation: Creating Conferences That Deliver Learning, Connection, Engagement, and Action Adrian Segar,2015-06-23 This is a book that should be OPEN on every meeting planner's or event marketer's desk, and used every day.--Paul Salinger, VP of Marketing, Oracle In his bestselling book *Conferences That Work: Creating Events That People Love* Adrian Segar taught readers how to design and execute remarkable conferences. But this book focuses on improving meetings at a finer level--the individual meeting sessions. Today, the most common reason that people give for attending face-to-face meetings is making valuable connections. Yet, time and time again, networking is relegated to meals and socials outside the sessions, and events are filled with lectures followed by a few minutes of audience questions. *The Power of Participation* provides conference presenters, organizers, and marketers with a comprehensive toolkit of simple techniques for creating participative sessions that involve the audience in their learning. Adrian Segar shows

how you can turn passive attendees into active participants, which boosts learning, adds opportunities to meet and learn with peers during sessions, builds community and engagement, and improves desired action outcomes at your events. Smart presenters and meeting organizers are integrating experiential learning and peer connection into their events. This book tells you how to do it. Buy *The Power of Participation* to learn why it's so important to incorporate participant action into every aspect of your event, what you need to know to create a meeting environment that supports and encourages participation, and when and how to use this extensive compendium of specific, detailed techniques to radically improve your sessions and meetings.

Event Crowdsourcing Adrian Segar, 2019-10-31 Do your conference programs contain sessions you belatedly discover were of little interest or value to most attendees? If so, you're wasting significant stakeholder and attendee time and money - your conference is simply not as good as it could be. Now imagine you knew how to create conference programs that reliably include the sessions and session content attendees actually want and need. How much value would that add to your event, for your attendees, your sponsors, and your bottom line? *Event Crowdsourcing: Creating Meetings People Actually Want and Need* shows you how to create conference programs and sessions that reliably become what your attendees want and need. The product of over 25 years of participant-driven meeting design experience, *Event Crowdsourcing* clearly explains everything you need to know to successfully integrate effective real-time event crowdsourcing into your programs and sessions. Buy *Event Crowdsourcing* to learn: Why it's so important to create conference programs and sessions that attendees want and need. When to use event crowdsourcing for your meetings and sessions. How to choose the right crowdsourcing approach for your specific needs. *Event Crowdsourcing* contains: A comprehensive compendium of crowdsourcing techniques that will

radically improve your meetings. Clear descriptions of the preparation and resources needed to ensure successful implementation. Detailed implementations for each technique, including sample scripts and options to cover your specific needs. Adrian Segar's first two books - *Conferences That Work* and *The Power of Participation* - have had a resoundingly positive impact on the meeting industry. Now, meeting planners and meeting-goers can further benefit from his newest book: *Event Crowdsourcing*. This book, both a why-to and a how-to, is jam-packed with proven guidelines, techniques, and suggested scripts to help you design conferences and sessions that are what attendees want and need. It's clearly organized and beautifully written, and I'm happy to recommend it. - Naomi Karten, author of *Managing Expectations*, *Presentation Skills for Technical Professionals*, and other books Actually giving attendees what they want and need instead of what you think they want? What a concept! Adrian Segar has done it again. *Event Crowdsourcing* is chock-full of detailed descriptions of low-tech, low-cost solutions that get to the core concerns of meeting-goers from any industry. It's a must read for any meeting planner! -Brandt Krueger, technical producer, educator, speaker, and event technology consultant For meeting designers like us, Adrian's work is priceless. He meticulously documents all there is to understand about crowdsourcing, participation, peer-to-peer working, and empowerment of conference audiences. His unique views on these topics make it easy to recognize his training as a former physicist, his facilitation skills, and his belief in what we humans can achieve together. -Eric de Groot and Mike van der Vijver, meeting designers with *MindMeeting*, and authors of *Into the Heart of Meetings* Adrian Segar is a leader in crafting the future of meetings. *Event Crowdsourcing* is the go-to tactical guide for planners to allow attendees to create their own meaningful experiences. In a world where everyone is talking about why events need to generate connection and engagement, Adrian has written the how-to guide for you. -Will
