*A Car-Crazy Town* Kyle Yarber, 2014-10-01 In 1907, less than 400 cars were owned in all of Kansas City, but 20,000 turned out for the city's first auto show, which proved a lot more liked the idea of owning cars. A century of automotive firsts later, Kansas City is home to manufacturing plants, historic vehicles and locations, drivers and racing venues, and more miles of highway per person than any other city in the country. Join Kyle Yarber, social historian and historical director & curator of the Kansas City Automotive Museum, down a narrative road with curves, intersections, dead ends, and fast lanes.

*Aston Martin* Julia J. Quinlan, 2013-07-15 The DB 5 was immortalized by James Bond, and Aston Martin's sports cars have been treasured by high-performance fans ever since. Readers will learn about this company's storied history, sports cars, and what aspects make a sports car a super car. The automaker's best-loved models, as well as the growing development of more compact city cars are covered in accessible text. Young gear-heads will love the stat boxes provided for each model.

**Humanizing Cities Through Car-Free City Development and Transformation** Doheim, Rahma M., Farag, Alshimaa Aboelmakarem, Kamel, Ehab, 2020-06-05 The heavy dependency on private cars has shaped the design of cities. While offering fast, comfortable, and convenient commutes, cars have become the most popular method of transportation, but are also a health crisis due to the toxic emissions they release into the atmosphere as well as the high death toll from traffic accidents. For these reasons, there is a need to minimize the use of cars within cities in favor of greener and humanized urban design that would improve the quality of life and reduce the global threat of climate change. *Humanizing Cities Through Car-Free City Development and Transformation* is an essential publication that explores the concepts of car-free cities and city humanization as possible solutions to reduce the deteriorating effect on the environment and the community. The publication discusses the urban initiative to implement pedestrianization and humanization of cities and public spaces to promote the concept of car-free living. Featuring coverage on a wide range of topics including city humanization, smart mobility, and urban policies, this book is ideally designed for urban planners, environmentalists, government officials, policymakers, architects, transportation authorities, researchers, academicians, and students.

Detroit Style Benjamin Colman, 2020 Detroit, nicknamed Motor City, has always been a leader in car design. As the city became the center of the American automobile industry in the early 20th century, its studios became incubators for new ideas and new styles. This volume highlights the artistry and influence of Detroit designers working in the industry between 1950 and the present day, giving readers a sumptuously illustrated opportunity to discover the ingenuity of influential (and surprisingly little-known) figures in postwar American car design. *Detroit Style* showcases 12 coupes and sedans, representing both experimental cars created solely for display and iconic production models for the mass market. Dozens of design drawings and images of studio interiors--along with paintings and sculptures--highlight the creative process and dialogue between the American art world and car culture. These materials in addition to interviews with influential figures in car design today bring new insights and spark curiosity about the formative role Detroit designers have played in shaping the automotive world around us, and the ways their work has responded to changing tastes, culture, and technology.

**Carmageddon** Daniel Knowles, 2023-06-16 A high-octane polemic against cars—which are ruining the world, while making us unhappy and unhealthy—from a talented young writer at the Economist The automobile was one of the most miraculous inventions of the 20th century. It promised freedom, style, and utility. But sometimes, rather than improving our lives technology just makes everything worse. Over the past century cars have filled the air with toxic pollutants and fueled climate change. Cars have stolen public space and made our cities uglier, dirtier, less useful, and more unequal. Cars have caused tens of millions of deaths and injuries. They have wasted our time and our money. In *Carmageddon*, journalist Daniel Knowles outlines the rise of the automobile and the costs we all bear as a result. Weaving together history, economics, and reportage, Knowles traces the forces and decisions that normalised cars and cemented our reliance on them. He takes readers around the world to show the ways car use has impacted people's lives—from Nairobi, where few people own a car but the city is still cloaked in smog, to Houston, where the Katy Freeway has a mind-boggling 26 lanes and there are 30 parking spaces for every resident, enough land to fit Paris ten times. With these negatives, Knowles shows that there are better ways to live, looking at Amsterdam, Copenhagen, Tokyo, and New York City.

*The Muscle Car Wars* Miller, B. J.,2015-03-12 The Muscle Car Wars: tells the story of young man who suffers a traumatic head injury and while recuperating becomes involved in rebuilding and racing the powerful muscle cars of the 1960's and 70's. The book chronicles the major historical and cultural events of that era, including the Vietnam War, while weaving a tale of teen romance, amid tumultuous student protests and dangerous street races. Writing from experience, the author captures the essence of the time, putting the reader in the driver's seat of the greatest street machines ever produced, while retelling classic gear head tales, and providing a running commentary on every subject from religion, politics, drug use, the sexual revolution and romantic love.

A Splendid Ride Monroe Dodd,2002 Illustrated history of Kansas City's streetcar system, beginning with horse drawn cars in 1870. In the 1880s, Kansas City built the country's third-largest cable car system. By the turn of the century, cable and horse cars were rapidly replaced by electric streetcars. The streetcar network grew to more than 300 miles of track, not including interurban lines that stretched in six directions, some more than 40 miles. In the 1930s, competition from automobiles and growing expenses caused the operators to begin converting to buses. Streetcars enjoyed a brief resurgence during and just after World War II, but then were increasingly replaced by gasoline and then diesel buses. Kansas City's last streetcar ran on June 23, 1957.
