Moon New York City Walks Moon Travel Guides, 2024-03-05 Experience the city that never sleeps like a local: on foot! Whether you're strolling along tree-lined streets in the Village or hustling down Fifth Avenue, discover the best of the Big Apple with Moon New York City Walks. Walk through the city's coolest neighborhoods, including Soho, the West Village, the Lower East Side, Williamsburg, and more, with color-coded stops and turn-by-turn directions Find your scene with top ten lists for restaurants, arts and culture, and coffee Get to know the real New York on six customizable walks: Stroll past icons like the Flatiron Building, the Empire State Building, and Rockefeller Center, or learn more about the history of jazz and the Harlem Renaissance. Take in jaw-dropping views along the High Line, shop the trendiest brands in the Meatpacking District, and explore world-famous galleries and museums. Cross the Williamsburg Bridge, hit a flea market, and discover coffee shops tucked among the Brooklyn warehouses. Sample authentic Chinese noodles and dim sum, comforting soul food, and old-school deli standbys, or admire the city skyline from one of New York's many rooftop bars Explore on the go with foldout maps of each walking route and a removable full-city map, all in a handy guide that fits in your pocket Discover public transportation options like bike rentals, subway, taxis, buses, and ferries With creative routes, public transit options, and a full-city map, you can explore New York at your own pace, without missing a beat. About Moon Travel Guides: Moon was founded in 1973 to empower independent, active, and conscious travel. We prioritize local businesses, outdoor recreation, and traveling strategically and sustainably. Moon Travel Guides are written by local, expert authors with great stories to tell—and they can't wait to share their

favorite places with you. Check out our guides to more of the world's best cities, so you can hit the ground running! Also available: Moon Tokyo Walks, Moon Amsterdam Walks, Moon Paris Walks, Moon Rome Walks, and Moon London Walks.

Mapping Towns and Cities Rob Walker, 2011 Towns and cities are home to magnificent museums, beautiful parks, and unique neighborhoods. How can you find these treasures and make sure you don't miss anything once you're there? By using maps! Maps can also show you how to get around, how towns are planned and managed, and what lies beneath the streets. Learn how maps can help you explore towns and cities. Book jacket.

Great City Maps DK, 2016-09-01 Journey back in time and take a walk through the historic streets of the world's greatest cities. Great City Maps is the companion title to DK's Great Maps and takes a focused look at over 70 gorgeously illustrated historical maps and plans of cities around the globe. Dive into the detail of each beautiful map and learn about interesting features with visual tours of the maps' highlights - such as the Old London Bridge of London in 1572 and the orchards of Brooklyn in 1767 New York. Cities are centres of civilisation and the way their maps portray them reflects their politics, religion, and culture. See how certain cities, and cartographic techniques, changed over time. More than just a bird's-eye-view, this unputdownable book tells the tales behind the cities from the hubs of ancient peoples to modern mega-cities, and profiles the iconic cartographers and artists who created each map. Perfect for history, geography, and cartography enthusiasts and a stunning gift for armchair explorers of all ages, Great City Maps is your window into the world's most fascinating cities.

Great City Maps , 2016-09-01

Future Cities Nick Dunn, Paul Cureton, 2020-12-10 What might our cities look like in ten, twenty or fifty years? How may future cities face global challenges? Imagining the city of the future has long been an inspiration for many architects, artists and designers. This book examines how cities of the future have been visualised, what these projects sought to communicate and what the implications may be for us now. It provides a visual history of the future and explores the relationships between different visualisation techniques and ideologies for cities. Thinking about what futures are, who they are for, why they are desirable, and how and when they are to be brought into being is central to this book. Through visualisation we are able to experiment in ways that would be impractical and potentially hazardous in the real world, and this book, therefore, aims to contribute toward a better understanding of the power and agency of visualisations for future cities. In this lavishly illustrated text, the authors apply several critical lenses to consider the subject in different ways: technological futures, social futures, and global futures, providing a comprehensive survey and analysis of visions for future cities, and engaging creatively with how we perceive tomorrow's world and future studies more widely.

Walking and Mapping Karen O'Rourke, 2016-02-12 An exploration of walking and mapping as both form and content in art projects using old and new technologies, shoe leather and GPS. From Guy Debord in the early 1950s to Richard Long, Janet Cardiff, and Esther Polak more recently, contemporary artists have returned again and again to the walking motif. Today, the convergence of global networks, online databases, and new tools for mobile mapping coincides with a resurgence of interest in walking as an art form. In Walking and Mapping, Karen O'Rourke explores a series of walking/mapping projects by

contemporary artists. She offers close readings of these projects—many of which she was able to experience firsthand—and situates them in relation to landmark works from the past half-century. Together, they form a new entity, a dynamic whole greater than the sum of its parts. By alternating close study of selected projects with a broader view of their place in a bigger picture, *Walking and Mapping* itself maps a complex phenomenon.

Handbook for travellers in France ... With ... maps John Murray (Firm), 1847

Adult Catalog: Subjects Los Angeles County Public Library, 1970

Historic Cities Jeff Cody, Francesco Siravo, 2019-07-30 This new volume in the GCI's Readings in Conservation series brings together a selection of seminal writings on the conservation of historic cities. This book, the eighth in the Getty Conservation Institute's Readings in Conservation series, fills a significant gap in the published literature on urban conservation. This topic is distinct from both heritage conservation and urban planning despite the recent growth of urbanism worldwide, no single volume has presented a comprehensive selection of these important writings until now. This anthology, profusely illustrated throughout, is organized into eight parts, covering such subjects as geographic diversity, reactions to the transformation of traditional cities, reading the historic city, the search for contextual continuities, the search for values, and the challenges of sustainability. With more than sixty-five texts, ranging from early polemics by Victor Hugo and John Ruskin to a generous selection of recent scholarship, this book thoroughly addresses regions around the globe. Each reading is introduced by short prefatory remarks explaining the rationale for its selection and the principal matters covered. The book will serve as an easy reference for administrators, professionals, teachers, and students faced

with the day-to-day challenges confronting the historic city under siege by rampant development.

Geospatial Technology for Human Well-Being and Health Fazlay S.

Faruque, 2022-03-21 Over the last thirty years or so, there have been tremendous advancements in the area of geospatial health; however, somehow, two aspects have not received as much attention as they should have received. These are a) limitations of different spatial analytical tools and b) progress in making geospatial environmental exposure data available for advanced health science research and for medical practice. This edited volume addresses those two less explored areas of geospatial health with augmented discussions on the theories, methodologies and limitations of contemporary geospatial technologies in a wide range of applications related to human well-being and health. In 20 chapters, readers are presented with an up-to-date assessment of geospatial technologies with an emphasis on understanding general geospatial principles and methodologies that are often overlooked in the research literature. As a result, this book will be of interest to both newcomers and experts in geospatial analysis and will appeal to students and researchers engaged in studying human well-being and health. Chapters are presenting new concepts, new analytical methods and contemporary applications within the framework of geospatial applications in human well-being and health. The topics addressed by the various chapter authors include analytical approaches, newer areas of geospatial health application, introduction to unique resources, geospatial modeling, and environmental pollution assessments for air, water and soil. Although geospatial experts are expected to be the primary readers, this book is designed in such a way so that the

public health professionals, environmental health scientists and clinicians also find it useful with or without any familiarity with geospatial analysis.

Urban Experience and Design Justin B. Hollander, Ann Sussman, 2020-10-15 Embracing a biological and evolutionary perspective to explain the human experience of place, *Urban Experience and Design* explores how cognitive science and biometric tools provide an evidence-based foundation for architecture and planning. Aiming to promote the creation of a healthier and happier public realm, this book describes how unconscious responses to stimuli, outside our conscious awareness, direct our experience of the built environment and govern human behavior in our surroundings. This collection contains 15 chapters, including contributions from researchers in the US, the UK, the Netherlands, France and Iran. Addressing topics such as the impact of eye-tracking analysis and seeing beauty and empathy within buildings, *Urban Experience and Design* encourages us to reframe our understanding of design, including the narrative of how modern architecture and planning came to be in the first place. This volume invites students, academics and scholars to see how cognitive science and biometric findings give us remarkable 21st-century metrics for evaluating and improving designs, even before they are built.

Environmental Science Daniel Chiras, 2010 Completely updated, the eighth edition of 'Environmental Science' enlightens students on the fundamental causes of the current environmental crisis and offers ideas on how we, as a global community, can create a sustainable future.

Environmental Science Daniel D. Chiras, 2009-01-17 Updated throughout with the latest environmental information, issues, and facts, the new Eighth Edition of *Environmental*

Science provides a clear introduction to the environmental topics facing society today and offers many possible solutions on how we can move towards a more sustainable way of life. The author focuses on the root cause of many environmental problems and takes care to presents both sides of the issues. Every chapter emphasizes critical analysis to teach students how to approach these complex topics and determine the merits of the debates for themselves. New Go Green tips offer suggestions for how students can be more environmentally conscious in their daily lives.

Bibliographic Guide to Maps and Atlases ,1999

The Best Front Range Trail Runs Tony Parker,2014-05-08 An easy-to-use guide to 50 of the best Front Range hikes for children * Kid-friendly trail ratings and symbols * Detailed directions and full-color easily readable maps * Sidebars on historical and educational information, as well as activities children can enjoy on the way home from each hike Colorado's Front Range is a wonderful place to introduce children to the outdoors and hiking. From Fort Collins to Denver and Boulder and south to Colorado Springs, trails abound for kids who love spending time outside. This essential guide helps parents select age-and ability-appropriate trails at a glance with a handy rating system. Choose trails that are fun and just challenging enough for children between the ages of two and 16. From wheelchair accessible to more challenging trails, the 50 hikes that comprise this guidebook were selected for their variety, ease of access, unique natural beauty, educational opportunities, and proximity to some of the best known attractions along the Front Range, including the Platte River, Pikes Peak, Mount Evans, and Rocky Mountain National Park. Children may spot wild turkeys while exploring the Hornbek Homestead trail near Colorado

Springs; enjoy trekking across the lands of an early settlement in the Bobcat Ridge Natural area near Fort Collins; or catch a glimpse of a bighorn sheep along the Waterton Canyon trail south of Denver.

The Automobile Blue Book ,1922

The Rough Guide to Britain Robert Andrews,2004 The Rough Guide to Britain is the ultimate insiders' handbook to England, Wales and Scotland. The full-colour introduction brings the countries' highlights to life, from the Eden Project in Cornwall to Edinburgh's Royal Mile. The authors provide lively accounts of every sight from the latest attractions such as the Cardiff Bay area and Gateshead's Baltic Centre to established landmarks from the Tower of London to Edinburgh Castle. For every town and region there are lively reviews of the best places to stay, eat and drink, to suit all pockets and with accompanying maps pinpointing each location. There's also practical tips on exploring the great British countryside from the rugged Pembrokeshire coastline to the picturesque valleys of the Yorkshire Dales.

The Map Catalog Joel Makower,1992 This unique sourcebook for map lovers is newly revised in a third edition that includes more maps than ever before. In addition to a profusion of road maps, aerial maps, geological maps, historical maps, weather maps, nautical maps, military maps, census maps, and astronomical maps, this third revised edition contains: -- the most current maps of Russia and Eastern Europe; -- a new section on the age of exploration; -- the most up-to-date information about map software; -- a completely new section on how to have a professional map made; -- the latest information about the new generation of maps based on the 1990 census. Whether you want maps of

airports or zip codes, highways, hurricanes, or hidden treasure, The Map Catalog is the book for you.

Rick Steves Provence & the French Riviera Rick Steves, Steve Smith, 2015-12-15 You can count on Rick Steves to tell you what you really need to know when traveling in Provence and the French Riviera. In this guide, you'll find a dazzling mix of enjoyable cities, warm stone villages, Roman ruins, and breathtaking coastline. Experience Roman history with self-guided tours of the Pont du Gard aqueduct, Roman theater in Orange, and Arena in Arles. Explore sun-soaked Riviera beaches and resort towns, from cosmopolitan Nice to colorful Villefranche-sur-Mer. Get inspired by artistic masterpieces by Renoir, Matisse, Picasso, and Chagall. After a day of sightseeing, relax at a café with a view, dive into a bowl of bouillabaisse, and watch fishermen return to the harbor. Rick's candid, humorous advice will guide you to good-value hotels and restaurants. You'll learn which sights are worth your time and money, and how to get around by train, bus, car, or boat. More than just reviews and directions, a Rick Steves guidebook is a tour guide in your pocket.

First Comprehensive Symposium on the Practical Application of Earth Resources Survey Data: Special session presentations: Plenary ,1975
