The Monastery of the Patriarchate of Peć Milka Čanak Medić,Branislav Todić,2017

The Architecture of Dečani and the Role of Archbishop Danilo II Bratislav Pantelić,2002 Founded in 1327 by King Stefan Urosh III, the most venerated member of the Nemanjid dynasty, the monastery of Decani stood once at the heart of medieval Serbia. Bestowed with wealth and land, it was strategically positioned near the seat of the patriarchate and at the intersection of a trade route connecting Dalmatian coastal towns with the Balkan hinterland. After the collapse of the Serbian kingdom the once prosperous royal monastery was destined to subsist for centuries in an obscure province of the Ottoman Empire. As the burial place of its saintly founder Decani became part of national lore, a monument to past glory, and a place of prayer and pilgrimage for the faithful.Occasional visitors who happened to chance upon the monastery on their travels in the Balkans admired the overwhelming architecture of its Romanesque church. One such traveler was Sir Arthur J. Evans who praised it as the noblest ecclesiastical foundation of the interior of the Peninsula. Indeed, the church of Christ the Pantokrator, with its exuberant polychrome facades, elaborate stonework, and sophisticated fresco program, is by any account one of the premier architectural achievements of the Middle Ages.The position of this edifice, somewhat vaguely described in the early 1900s as the most consistently Western of all the Serbian medieval churches, has found broad acceptance and remains virtually uncontested. However, the sharp contrast between the basilican plan and the strong centralizing tendency of the spatial organization has never been quite explained.The author of this book re-examines the firmly established views and re-evaluates the position of this monument within the particular historical context and the general framework of Serbian and Byzantine medieval architecture.Examination of the physical evidence reveals within the shell of the five aisled structure a fusion of two distinct building types: the traditional old Serbian domed nave and the Late Byzantine expanded cross-in-square. Such a radical transformation of a conventional building type reveals a surprisingly novel attitude toward architectural design and planning. Rather than simply combining the two plans, the internal spatial disposition was articulated by non-structural means while retaining the formal and structural constitution of a Romanesque basilica. In other words, the spaces typologically and liturgically corresponding to old Serbian and Byzantine churches have been demarcated by the iconography of the frescoes and by their relative location within the otherwise uniform bay system of the basilica.For the first time in the wider Byzantine sphere we have evidence of planning consciously extending beyond simple emulation or repetition of typological patterns. This remarkable experiment was carried out by one Fra Vita, a Franciscan from the coastal city of Kotor, whose name is prominently displayed above one of the portals. But the true author of this design philosophy was the influential Archbishop Danilo II. As confidant of three successive kings at a time when Serbia grew into a major political power that threatened the very foundations of the Byzantine Empire, the archbishop exerted a powerful impact on the political scene. He was the mastermind of a complex ideological framework that was to reflect the newly acquired prestige of the Serbian monarchs. Grandiose and universal ideas were now required to legitimize the ambitions of kings who deemed they were the Emperor's peers. Imperial symbolism, extravagant emblematic concepts, and unprecedented glorification of the dynasty infused official art and literature. But the remodeling of the traditional building type of royal mausolea at Decani was Danilo's most explicit programmatic statement. It provided a model for lofty elaborate burial churches that were to display the prominent status of the Nemanjid kings and convey their challenge to Byzantine preeminence.

Serbia Since 1989 Sabrina P. Ramet,Vjeran I. Pavlakovic,2011-09-01 During their thirteen years in power, Slobodan Milosevic and his cohorts plunged Yugoslavia into wars of ethnic cleansing, leading to the murder of thousands of civilians. The Milosevic regime also subverted the nation's culture, twisted the political mainstream into a virulent nationalist mold, sapped the economy through war and the criminalization of a free market, returned to gender relations of a bygone era, and left the state so dysfunctional that its peripheries--Kosovo, Vojvodina, and Montenegro--have been struggling to maximize their distance from Belgrade, through far-reaching autonomy or through outright independence. In this valuable collection of essays, Vjeran Pavlakovic, Reneo Lukic, and Obrad Kesic examine elements of continuity and discontinuity from the Milosevic era to the twenty-first century, the struggle at the center of power, and relations between Serbia and Montenegro. Contributions by Sabrina Ramet, James Gow, and Milena Michalski explore the role of Serbian wartime propaganda and the impact of the war on Serbian society. Essays by Eric Gordy, Maja Miljovic, Marko Hoare, and Kari Osland look at the legacy of Serbia's recent wars-issues of guilt and responsibility, the economy, and the trial of Slobodan Milosevic in The Hague. Sabrina Ramet and Biljana Bijelic address the themes of culture and values. Frances Trix, Emil Kerenji, and Dennis Reinhartz explore the peripheries in the politics of Kosovo/a, Vojvodina, and Serbia's Roma. *Serbia Since 1989* reveals a Serbia that is still traumatized from Milosevic's rule and groping toward redefining its place in the world.

Coercive Diplomacy of NATO in Kosovo Enver Bytyçi,2015-04-01 This book represents a detailed and comprehensive examination of the developments of NATO's engagement in Kosovo, and the related policies of western countries. In addition to offering an in-depth analysis of historical developments in the relationships between Albanians and Serbs, the book also provides a constructive discussion of the events of the Kosovo conflict, which constituted one of the main concerns in the international agenda towards the end of the twentieth century. The basic theme set forth in this book is the reasoning behind NATO's intervention in Kosovo during the spring of 1999, namely to end the conflict between Albanians and Serbs and to aid the Kosovo Albanians in achieving their freedom from the jurisdiction of the Serbian state. Based on extensive evidence, the author analyzes the contradicting stances conveyed at the Security Council regarding the conflict, NATO's military intervention and the issue of Kosovo's future. The book provides useful

information for any scholars, students and readers interested in gaining a more detailed understanding of Kosovo's historical developments on an international level. It offers the reader detailed insights into, and descriptions of, the events that took place in the military conflict in Kosovo; it provides various facts and figures, evidences and counterarguments in response to what happened in this politically volatile region.

The Tribes of Albania Robert Elsie,2015-04-24 Northern Albania and Montenegro are the only regions in Europe to have retained a true tribal society up to the mid-twentieth century. This book provides the first scholarly investigation of this tribal society, a pioneer work that offers a detailed survey of all the major Albanian-speaking tribes in Albania, Montenegro and Kosovo. Robert Elsie provides comprehensive material on the 69 different tribes, including data on their locations, religious affiliations, tribal structures and relations, population statistics, tribal folklore, legends and history. Also included are excerpts from the works of prominent nineteenth and early-twentieth century writers, such as Edith Durham and Johann Georg von Hahn, who travelled through the tribal regions, as well as short biographies on prominent figures linked to the tribes. As the first book of its kind, The Tribes of Albania will be of interest to scholars and students of the Balkans, of southeastern European anthropology, ethnography and history. 'The tribal system of northern Albania is one of the most fascinating aspects of a very distinctive part of Europe. Over hundreds of years, when their territory was under Ottoman rule but seldom fully under Ottoman control, these tribes provided a basis for social identity, local justice and military action. So cohesive were they that the unity of a tribe could easily survive the conversion of one part of it to Islam. Anyone who studies the history of these people will encounter tribal names and tribal identities at every step; and yet, until now, there has never been a general work gathering all the scattered information about them that survives in sources of many different kinds. The Tribes of Albania will be an indispensable and authoritative work of reference. There are few people in the world who could have written such a work; absolutely no one could have done it as well as Robert Elsie, whose knowledge of this material is unparalleled.' - Sir Noel Malcolm, Senior Research Fellow, All Souls College, University of Oxford

Cities of the Mediterranean Meltem Toksoz,Biray Kolluoglu,2014-08-25 The Eastern Mediterranean is one of the world's most vibrant and vital commercial centres and for centuries the region's cities and ports have been at the heart of East-West trade. Taking a full and comprehensive look at the region as a whole rather than isolating individual cities or distinct cultures, Cities of the Mediterranean offers a fresh and original portrait of the entire region, from the 16th century to the present. In this ambitious interdisciplinary study, the authors examine the relationships between the Eastern Mediterranean port cities and their hinterlands as well as inland and provincial cities from many different perspectives - political, economic, international and ecological - without prioritising either Ottoman Anatolia, or the Ottoman Balkans, or the Arab provinces in order to think of the Eastern Mediterranean world as a coherent whole. Wide-ranging in scope, Cities of the Mediterranean explores diverse topics, weaving together history, sociology, geography, cartography, politics and economics. Early chapters examine the impact of the 'Little Ice Age'; the global economy's shift from the Mediterranean to Antwerp and Amsterdam; early European perceptions of the Eastern Mediterranean; 19th-century harbour building practices and their impact on the cities; and the connections between Alexandria, Izmir and Thessalonica and their vast and diverse hinterlands. The book also explores political radicalism in Turkey and elsewhere as well as the illegal trade networks that linked the Balkans and Adriatic with the Mediterranean and the introduction of new technologies that led to the faster transport of people, goods and information. Through its penetrating analysis of the various networks that connected the ports and towns of the Mediterranean and their inhabitants throughout the Ottoman period, Cities of the Mediterranean presents the region as a unified and dynamic community and paves the way for a new understanding of the subject.

Authentic Reconstruction John Bold,Peter Larkham,Robert Pickard,2017-12-14 Notions of authenticity lie at the heart of many questions about heritage and identity in the built environment. These questions are most pertinent when buildings have been destroyed in disaster or war, and the built fabric is being reconstructed to reinstate traditional or historic appearances in place of what was lost. Authentic Reconstruction examines this idea of reconstruction, using it as a prompt to examine a range of deeper issues on heritage and the built environment. From post-WWII reconstruction programmes through to the rebuilding of historic cultural landscapes lost in natural disasters, this collection of essays by heritage specialists provides a wide range of case-studies and discussions. Each presents responses to crises and lessons learned, in order to extrapolate general guidelines for future actions by politicians, architects and planners in reconstructing buildings. The book also looks beyond disaster and war, noting how authenticity bears on political intentions and image building, exploring how reconstruction is used to tell a political or historical story, so conditioning the ways in which the built environment is perceived and appreciated by its users. This is not just about the buildings as bricks and mortar, but about perceptions of identity and the social and historical values which buildings and spaces embody for a richly diverse population. This book will be valuable to all who are concerned with heritage as practitioners or consumers, particularly those concerned with reconstruction and the creation of authentic places and experiences: architects, architectural historians, town planners, preservationists, conservationists, and those involved in heritage management and material culture.
