**The Kalmiera** Mark Garnett,2023-03-15 A galactic war has gripped the Milky Way. The Human race formed an alliance with the Anubis, Horus, and Jurassic people against their common enemies, the Kalmiera, Mantis and Arachnids. Each side fights for their survival, using nuclear, chemical, and biological warfare, as well as genetically growing of troops in tank wombs to keep fighting the war. The war spills into countless solar systems as each side works to gain foothold on moons and planets in the galaxy. This story takes place in the Cygnus Loop System where the Antman people have been fighting the Kalmiera, Mantis and Arachnids for generations.

A Hologram for the King Dave Eggers,2013-06-04 A National Book Award Finalist, a New York Times bestseller and one of the most highly-acclaimed books of the year, A Hologram for the King

is a sprawling novel about the decline of American industry from one of the most important, socially-aware novelists of our time. In a rising Saudi Arabian city, far from weary, recession-scarred America, a struggling businessman named Alan Clay pursues a last-ditch attempt to stave off foreclosure, pay his daughter's college tuition, and finally do something great. In *A Hologram for the King*, Dave Eggers takes us around the world to show how one man fights to hold himself and his splintering family together in the face of the global economy's gale-force winds. This taut, richly layered, and elegiac novel is a powerful evocation of our contemporary moment--and a moving story of how we got here.

**The Citadel** Dave Bailer, 2012-08 New York City, the grand metropolis of the United States, had been devastated from the radiation wars over global oil rights. Only a few of the largest cities had endured the holocaust, many in name only, as the survivors migrated to widely separated tracts of land left un-radiated by the nuclear warheads unleashed by oil-hungry countries. The once-dominate United States had been reduced to independent city-states. As recognized power was redistributed around the world, elected governments began to disintegrate into dictatorial regimes. York City (as it was now called) was under the control of the latest

man in power, Mayor Kourei Posin. Rights and privileges were being systematically stripped away. Choices of education and employment were no longer options; those opportunities were now mandated and enforced by a government as necessity dictated. David Kendal of Kendal Enterprises had a plan but it was risky. Although the people wanted reform and freedom, they no longer had the voice or the power to achieve it. The Mayor's security troops had already imprisoned some of David's closest friends and confidants while others had met untimely deaths. Yet, not everyone was opposed to the growing tyranny of the ruling class. Even within David's own inner circle of family and advisors the promise of wealth and power was the harbinger of betrayal. With his family in hiding, David and his few remaining allies needed to find a place to work their plan. They would build a city within a city, a guardian city the Citadel.

*The Power of the Mayor* Chris McNickle, 2017-07-28 Chris McNickle argues that New York City Mayor David Dinkins failed to wield the power of the mayor with the skill required to run the city. His Tammany clubhouse heritage and liberal political philosophy made him the wrong man for the time. His deliberate style of decision-making left the government he led lacking in direction. His

courtly demeanor and formal personal style alienated him from the people he served while the multi-racial coalition he forged as New York's first African-American mayor weakened over time. Dinkins did have a number of successes. He balanced four budgets and avoided a fiscal takeover by the unelected New York State Financial Control Board. Major crime dropped 14 percent and murders fell by more than 12 percent. Dinkins helped initiate important structural changes to the ungovernable school system he inherited. His administration reconfigured health care for the poor and improved access to medical treatment for impoverished New Yorkers. McNickle argues that David Dinkins has received less credit than he is due for his successes because they were overshadowed by his failure to fulfill his promise to guide the city to racial harmony. This stimulating review of a transitional period in New York City's history offers perspective on what it takes to lead and govern.

**U.S.A. City by City** Donald D. Groff, 1989

**Technology and Theology** William H. U. Anderson, 2021-01-05

Technology is growing at an exponential rate vis-à-vis humanity's ability to control it. Moreover, the numerous ethical issues that technology raises are also troubling. These statements, however,

may be alarmist—since Telus would tell us “The Future is Friendly”. The Modernist vision of the future was utopic, for instance Star Trek of the 1960s. But postmodern views, such as are found in Blade Runner 2049, are dystopic. Theology is in a unique interdisciplinary position to deal with the many issues, pro and con, that technology raises. Even theologians like Origen in the third century and Aquinas in the thirteenth century made forays into Artificial Intelligence and surrounding issues (they just didn’t know it at the time). Artificial Intelligence (AI) and Transhumanism raise questions about what it means to be human. What is consciousness? What is soul? What are life and death? Can technology really save us and give us eternal life? Theology is in a unique position to handle these questions and issues. This book also has practical applications in terms of ecclesiology (church) in the context of the COVID-19 pandemic—both in terms of what it means to be a church and in terms of the sacraments or ordinances. Is there such a thing as a “Virtual Church” or must we gather physically to constitute one? Are Baptism and Communion legitimate if one is not physically in a church building but are “online”? This book struggles with these and many other questions which will help the scholar or reader make up their own minds,

however tentatively.

*Temporary Cities* Yasser Elsheshtawy, 2019-03-28 Are Arab Gulf cities, the likes of Dubai, Abu Dhabi or Doha, on their way to extinction? Is their fate obsolescence? Or, are they the model for our urban future? Can a city whose very existence is predicated on an imported labour force who build and operate these gleaming urban centres remain a viable urban entity? Could the transient nature of this urban model, its temporariness and precariousness, also be its doom? In this wide-ranging book Yasser Elsheshtawy takes on these tough, but necessary, questions aiming to examine the very nature of the Arab Gulf city and whether it can sustain its existence throughout the twenty-first century. Having lived in the region for more than two decades he researched its marginalized and forgotten urban settings, trying to understand how a temporary people can live in a place that inherently refuses to give them the possibility of becoming citizens. By being embedded in these spaces and reconciling their presence with his own personal encounters with transience, he discovered a resilience and defiance against the forces of the hegemonic city. Using subtle acts of resistance, these temporary inhabitants have found a way to sustain and create a home, to set down roots in the midst of a

fast changing and transient urbanity. Their stories, recounted in this book through case studies and in-depth analysis, give hope to cities everywhere. Transience is not a fait accompli: rather the actions of citizens, residents and migrants – even in the highly restrictive spaces of the Gulf – show us that the future metropolis may very well not turn out to be a ‘utopia of the few and a dystopia of the many’. This could be an illusion, but it is a necessary illusion because the alternative is irrelevance.
