**Monuments of Progress** Claudia Agostoni,2003 A social and cultural history of public health in Mexico during the late 1800s and early 1900s. The book offers a fresh take on the history of medicine and public health by shifting away from the history of epidemic disease and heroic accounts of medical men and toward looking at public health in a broader social framework. It shows how new public health policies were instrumental in the 'modernisation' of Mexico. Adds to a small, but fast-growing body of literature, on the history of public health in Latin America and other developing areas of the world.

Vagrants and Citizens Richard A. Warren,2007-01-30 This acclaimed book explores popular politics during Mexico's tumultuous post-independence decades. Focusing on Mexico City during the chaotic early years of the nineteenth century, Richard A. Warren offers a compelling narrative of the defining period from King Ferdinand VII's abdication of the Spanish crown in 1808 to the end of Mexico's first federal republic in 1836. Clearly written and meticulously researched, this book is the first to demonstrate that the relationship between elites and the urban masses was central to Mexico's political evolution during the fight for independence and after. Mexico City, capital of both the old viceroyalty and the new nation, often witnessed the first wave of public opinion to respond to competing political proposals in both traditional and new forms that ranged from riots to electoral campaigns. Warren explains the direct effects of these actions on political outcomes, as well as their influence on elite perceptions of the new nation's problems and potential solutions. *Vagrants and Citizens* explores the impact of urban mass mobilization on crucial issues of the era, such as the evolution of electoral practices, the conflict between federalists and centralists, and social control programs. Shedding new light on a poorly understood era, Warren demonstrates the importance of the urban masses both as actors in their own right and as objects of elite discourse and programs. His compelling narrative offers an ideal supplement for courses on Mexican and Latin American history.

**Mexico City's Water Supply** The Joint Academies Committee on the Mexico City Water Supply, Commission on Geosciences, Environment, and Resources, Water Science and Technology Board, Division on Earth and Life Studies, National Research Council, Academia Nacional de la Investigacion Cientifica, A.C., Academia Nacional de Ingenieria, A.C., 1995-05-22 This book addresses the technical, health, regulatory, and social aspects of ground water withdrawals, water use, and water quality in the metropolitan area of Mexico City, and makes recommendations to improve the balance of water supply, water demand, and water conservation. The study came about through a nongovernmental partnership between the U.S. National Academy of Sciences' National Research Council and the Mexican Academies of Science and Engineering. The book will contain a Spanish-language translation of the complete English text.

**Black Market Capital** Andrew Konove, 2018-05-25 In this extraordinary new book, Andrew Konove traces the history of illicit commerce in Mexico City from the seventeenth century to the twentieth, showing how it became central to the economic and political life of the city. The story centers on the untold history of the Baratillo, the city's infamous thieves' market. Originating in the colonial-era Plaza Mayor, the Baratillo moved to the neighborhood of Tepito in the early twentieth century, where it grew into one of the world's largest emporiums for black-market goods. Konove uncovers the far-reaching ties between vendors in the Baratillo and political and mercantile elites in Mexico City, revealing the surprising clout of vendors who trafficked in the shadow economy and the diverse individuals who benefited from their trade.

*The Death of Aztec Tenochtitlan, the Life of Mexico City* Barbara E. Mundy, 2015-07-15 Blending cartography and art history, this groundbreaking study reexamines the indigenous roots of Mexico City: "Quite simply, it is a tour de force" (Ethnohistory). In its time, the Aztec capital Tenochtitlan was one of the largest cities in the world. In 1521, at the height of its power, Hernán Cortés conquered the city, boasting to King Charles V of Spain that Tenochtitlan was "destroyed and razed to the ground." But was it? Drawing on period representations of the city in sculptures, texts, and maps, *The Death of Aztec Tenochtitlan, the Life of Mexico City* builds a convincing case that this global capital remained an Amerindian city through the sixteenth century. Barbara E. Mundy foregrounds the role the city's indigenous peoples, the Nahua, played in shaping Mexico City through the construction of permanent architecture and engagement in ceremonial actions. She demonstrates that the Aztec ruling elites, who retained power even after the conquest, were instrumental in building and then rebuilding the city. Mundy shows how the Nahua entered into mutually advantageous alliances with the Franciscans to maintain the city's sacred nodes. She also focuses on the practical and symbolic role of the city's extraordinary waterworks—the product of a massive ecological manipulation begun in the fifteenth century—to reveal how the Nahua struggled to maintain control of water resources in early Mexico City.

**Ciudad de Mexico** Samuele Sangalli, 2022 Ciudad de Mexico represents a privileged context for understanding the current structure of the development models of Latin American society, situated between historical heritage and current challenges. In this volume, the lectures of experts in various fields enable the three subsequent paths of study: on the regulatory criteria that govern city administration; on its development in comparison with current sustainability parameters; on the paradigmatic characters of a neighbourhood like Santa Fe. The collection of these analyses, made by Sinderesi School, intends to shed light on the many elements at stake. They particularly aim at describing the attempts of a Latin American way to configure a modern city, on human scale, in this era of great changes that invite us to consider a different model of social organization and development. As Pope Francis said at the end of his Apostolic Visit in

2016: many men and women, with their everyday efforts, make it possible for this Mexican society not to be left in darkness.

**Mexico City's Alternative Futures** Bruce Nord, 1996 The work is an attempt to chart the path of one of the world's great cities in demographic, economic, political and cultural terms. The predictive problems are dealt with as concerns of theory and method as well as human liveability. A discussion of planning as an attempt to shape the urban form is undertaken. Although comparisons are made, the focus is on Mexico City and the role of changes in infrastructure, policy and human preferences. An argument is made that the urban form will continue to dominate most functions, and we must better understand the bull in the china shop. The mega city concept focuses on demographic and geographical size, and can not ignore questions of density, economic viability, environmental quality, cultural relevance, and political efficacy. Additionally, the impact of natural events (the 'terre moto' of 1985) and the role of planning is dealt with in this case study of Mexico City. Historical changes in the basic infrastructure of the city are followed, and an argument about how this kind of factor impinges on the future is entertained. Numerous approaches to social change are examined, especially those dealing with urban areas. Archaeological data and maps are included to give a sense of the processes involved. An underlying premise of this book is that 21st century vining must understand the lessons of cities like Mexico City. The analysis is meant to assist in the development of theory and method appropriate for this area of human living. Using historical and some

statistical data, the hope is that some key extrapolations, comparisons, and bursts of insight will help us to shape the urban future that we want to live in. Stressing what we already know about Mexico City, urban processes, and the challenges of accurate prediction, the goal is to anticipate various scenarios. While the focus could rightfully be on individuals, genders, social classes, ethnic groups, and so forth, these will be duly noted.
