Exploring Welfare Bricolage in Europe’s Superdiverse Neighbourhoods Jenny Phillimore,Hannah Bradby,Tilman Brand,Beatriz Padilla,Simon Pemberton,2021-05-24 Migration-driven diversity means European cities are becoming increasingly superdiverse. Some European neighbourhoods have become places where newcomers arrive from across the world, speaking many different languages, from a range of socio-economic backgrounds and with diverse religious beliefs and practices, while living alongside long-established migrant and white European populations. This book focuses on what this increasing population diversity means for how people and local health and welfare service providers seek to address everyday health concerns – from minor and chronic conditions to acute and urgent problems. Using an innovative mixed-method approach crossing multiple disciplines and drawing together rich qualitative and robust quantitative data, this book offers unique insight into the complex and intricate actions, which often vary over space and time, implemented by both residents and care providers from eight superdiverse localities in four European countries, each with different health and welfare traditions. The book introduces the concept of welfare bricolage, using it as a mechanism to explore the structures and rationales underpinning need and actions, and how resources are connected across welfare regimes and borders and within locales. The book illustrates how, in the face of increasingly marketised, cash-strapped, restrictive and institutionally racist welfare states and healthcare regimes, individuals and service providers strive to address need. By focusing on welfare regimes, migration histories, everyday actions and resources within neighbourhoods, Exploring Welfare Bricolage in Europe’s Superdiverse Neighbourhoods offers a unique insight into what people and providers actually do when faced with health concerns. The book highlights the role of structure and agency and moves beyond conventional approaches that focus on specific groups or sectors to research health and welfare by looking at whole populations and entire welfare ecosystems. The book’s theoretical, methodological and empirical contributions will be of use to scholars, practitioners and policymakers interested in welfare, healthcare, diversity and migration.

The Capable Executive Moreen Anderson,Paul Dainty,1996-03-11 Despite the impact senior managers can have on organisations, surprisingly little is known about what makes them effective. This distinctive book is structured around the findings of the authors' eight year research programme into senior executive effectiveness. In all eleven Capabilities have been identified which cover how executives cope personally with their role, how they lead and influence others and build competitive organisations. Each Capability is used as a starting point to review the latest management thinking and practice as it applies to senior executives.

Madam C.J. Walker Erica L. Ball,2021-01-29 Madam C. J. Walker—reputed to be America’s first self-made woman millionaire—has long been celebrated for her rags-to-riches story. Born to former slaves in the Louisiana Delta in the aftermath of the Civil War, married at fourteen, and widowed at twenty, Walker spent the first decades of her life as a laundress, laboring in conditions that paralleled the lives of countless poor and working-class African American women. By the time of her death in 1919, however, Walker had refashioned herself into one of the most famous African American figures in the nation: the owner and president of a hair-care empire and a philanthropist wealthy enough to own a country estate near the Rockefellers in the prestigious New York town of Irvington-on-Hudson. In this biography, Erica Ball places this remarkable and largely forgotten life story in the context of Walker’s times. Ball analyzes Walker’s remarkable acts of self-fashioning, and explores the ways that Walker (and the Walker brand) enabled a new generation of African Americans to bridge the gap between a nineteenth-century agrarian past and a twentieth-century future as urban-dwelling consumers.
