Applications of X-ray Computed Tomography in the Geosciences Florias Mees, 2003 X-ray computed tomography (CT) is a technique that allows non-destructive imaging and quantification of internal features of objects. X-ray CT reveals differences in density and atomic composition and can therefore be used for the study of porosity, the relative distribution of contrasting solid phases and the penetration of injected solutions. In this book, various applications of X-ray CT in the geosciences are illustrated by papers covering a wide range of disciplines, including petrology, soil science, petroleum geology, geomechanics and sedimentology.

Royal Air Force Bomber Command Losses of the Second World War: Aircraft and crew losses 1941 W. R. Chorley, 1992 This is the second volume in the series which deals with the losses sustained by the RAF Bomber Command during the 2nd World War. It has already found favour with historians, and those friends and relatives affected by the loss.

Teaching Computational Thinking in Primary Education
Ozcinar, Huseyin, Wong, Gary, Ozturk, H. Tugba, 2017-10-31
Computational technologies have been impacting human life for years. Teaching methods must adapt accordingly to provide the next generation with the necessary knowledge to further advance these human-assistive technologies. Teaching Computational Thinking in Primary Education is a crucial resource that examines the impact that instructing with a computational focus can have on future learners. Highlighting relevant topics that include multifaceted skillsets, coding, programming methods, and digital games, this scholarly publication is ideal for educators, academicians, students, and researchers who are interested in discovering how the future of education is being shaped.

Brothel in Pimlico Roy Brooks, 2001 Roy Brooks became a legend in his own time for the puckish delight he took in telling the truth, the whole truth - and even the unwholesome truth - about the properties, as an estate agent, that he advertised for sale. From 1950 to his death in 1971, his fame for these revolutionary, outrageous, funny, and on occasions, painful advertisements spread far and wide. In a trade well known for its euphemisms, optimistic cliches and skilful camouflage, he won the delighted applause of the property-buying and newspaper-reading, public.; This is a collection of the best of Roy Brooks' property advertisements in the Sunday Times and Observer newspapers.

Central Nervous System Metastases Manmeet

Ahluwalia,Philippe Metellus,Riccardo Soffietti,2019-11-05

This book provides a comprehensive overview of brain metastases, from the molecular biology aspects to therapeutic management and perspectives. Due to the increasing incidence of these tumors and the urgent need to effectively control brain metastatic diseases in these patients, new therapeutic strategies have emerged in recent years. The volume discusses all these innovative approaches combined with new surgical techniques (fluorescence, functional mapping, integrated navigation), novel radiation therapy techniques (stereotactic radiosurgery) and new systemic treatment approaches such as targeted- and immunotherapy. These combination strategies represent a new therapeutic model in brain metastatic patients in which each medical practitioner (neurosurgeon, neurologist, medical oncologist, radiation oncologist) plays a pivotal role in defining the optimal treatment in a multidisciplinary approach. Written by recognized experts in the field, this book is a valuable tool for neurosurgeons, neuro-oncologists, neuroradiologists, medical oncologists, radiation oncologists, cognitive therapists, basic scientists and students working in the area of brain tumors.

Hearing Impairment and Disability Ariel

Tenenbaum,Joav Merrick,Mohd N. Zakaria,2020 Much research has been conducted to provide researchers and hearing healthcare professionals with updated information in regard to hearing assessments, results interpretation and case management. This ongoing research is particularly imperative to guide clinicians with optimized methods in assessing and managing pediatric patients with hearing impairment and disability. As such, tremendous research efforts have been made in determining the most optimum methods in assessing hearing using both subjective and

objective tests. Since hearing loss can occur due to disrupted peripheral and/or central auditory pathway, there is also a growing interest to study children with auditory processing disorder (APD). Even though notable achievements have been observed in understanding APD, more research is required, particularly in establishing a gold standard APD test and its specific interventions. Additionally, having an objective test such as speech-evoked auditory brainstem response is beneficial to understand how speech sounds are encoded within the brainstem region in hearing-impaired children, as well as in those with compromised neural function. In this book, we have gathered research from Malaysia and India in this field and hope it will be of interest to our readers--

The Elements of Structures George A

Hool,2023-07-18 This book serves as an introductory guide to structures, and it is geared towards students and professionals alike. The author takes the reader through the basics of structures, including the forces that affect them, and how they respond. Through the use of diagrams and examples, the author illustrates how to calculate the strength of different structures. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Algal Toxins: Nature, Occurrence, Effect and Detection

Valtere Evangelista,Laura Barsanti,Anna Maria

Frassanito,Vincenzo Passarelli,Paolo Gualtieri,2008-06-27

This volume contains the lectures and seminars given at the NATO Advanced Study Institute on "Sensor Systems for Biological Threats: The Algal Toxins Case", held in Pisa, Italy in October, 2007. The Institute was sponsored and funded by the Scientific Affairs Division of NATO. It is my pleasant duty to thank this institution. This ASI offered updated information on how far the research on algal toxins has gone in the exploration of structures, biosynthesis and regulation of toxins, and the development of technology for bio-monitoring these compounds. Algae can form heavy growths in ponds, lakes, reservoirs and slow-moving rivers throughout the world; algae can house toxins which are usually released into water when the cells rupture or die. Hundreds of toxins have been identified so far. Detection methods, including rapid screening, have been developed to help us learn more about them, especially to find out which toxins are a real threat for people and what conditions encourage their production and accumulation. Early detection of algal toxins is an important aspect for public safety and natural environment, and significant efforts are underway to develop effective and reliable tools that can be used for this purpose.

Royal Air Force Bomber Command Losses W. R.

Chorley, 1992 The final volume in this monumental series, which records the grievous losses suffered by the men of RAF Bomber Command in the European theatre of operations during World War II, includes the master index of about 55,000 entries - the Roll of Honour - bringing together all aircrew mentioned in the previous volumes. The Roll of Honour provides for each airman; their surname, rank, Christian name, service number, date killed, squadron, the serial number of the aircraft involved, and the page and volume number where the loss is recorded.

Bernhard Varenius Margret Schuchard, 2007 This fresh portrait of Varenius presents a young German scholar, whose books on Japan (1649), the first one from a European perspective, and on General Geography (1650) were written and published in Amsterdam and led to establishing geography as a science.

Macnab's Backache Ensor Transfeldt, Ian Macnab, 2007 Macnab's Backache, Fourth Edition is an enhancement and update of Ian Macnab's classic principles of spinal anatomy and pathology, which form the cornerstones of clinical evaluation and treatment of spinal disorders. This edition is geared to practitioners in a wide variety of specialties and emphasizes the initial evaluation and treatment of patients with back pain and/or sciatica. The book thoroughly describes and illustrates the pathoanatomy of various spinal disorders and its correlation with clinical symptoms. Also included are chapters on history taking, examination of the back, differential diagnosis of low back pain, pain management, and a new chapter on injections.

Fresh Herbage for Dairy Cattle Anjo Elgersma, Jan Dijkstra, Seerp Tamminga, 2007-01-16 This book offers the contributions of active researchers and leading experts in

the field of grassland management and grass utilization. Coverage follows the food chain, moving from the big picture to basic principles of grassland management and effects on herbage quality, intake and nutrient flows. Rather than focus separately on soil-plant interactions, plant production, animal nutrition, animal production or product quality issues, this book takes a more integrated approach.
