Discipleship on the Edge Darrell W. Johnson, 2004 Revelation is probably the most read, but least understood book of the Bible. History is replete with examples of how not to interpret it, and books featuring end-of-world prophecy claims based on Revelation consistently top the bestseller lists. But how can the message of such an enigmatic book be applied to our lives today? In Discipleship on the Edge, Darrell W. Johnson drives home the challenging and practical message of Revelation in thirty carefully crafted sermons. Paying careful attention to the original context of Revelation and the circumstances surrounding its composition, Johnson shows that the book is not a crystal ball but rather a discipleship manual. Thoroughly researched and yet accessible, this collection of sermons is a helpful resource for pastors and small group leaders who are looking for models to help them preach and teach the message of Revelation in a time when there is much confusion about the end times. Darrell W. Johnson serves as Scholar-in-Residence at The Way Church and Canadian Church Leaders Network in Vancouver, British Columbia, Canada. A popular conference and retreat speaker, he has also served as the preaching pastor for a number of congregations in North America and the Philippines, as well as serving as Adjunct Professor of Preaching for the Doctor of Ministry program at Fuller Theological Seminary in Pasadena, California, and a Teaching Fellow at Regent College. His other books include *Experiencing the Trinity* and *Fifty-Seven Words That Change The World*.

I Won't Go With Strangers Dagmar Geisler, 2018-04-03 Lu won't go with just anyone! Lu is waiting to be picked up after school. She stands on the sidewalk, all alone, and it starts to rain. Ms. Smith walks by, and offers to take her home. Ms. Smith lives in Lu's neighborhood—but does Lu really know her? Lu asks herself, what's her first name? Does she dye her hair red? What's her dog's name? And she says, "I don't know you, so I won't go with you! And besides, Mama said I should wait." As other adults—all of whom Lu has met in some capacity before—offer to take her home, Lu continues to consider if she really knows them. One by one, she refuses to go with them. Until, finally, the person Mama said she should go home with shows up—though his appearance is a surprise to the reader! This sensitively narrated story illustrates how clear rules and arrangements can help protect and empower children during an especially vulnerable time of day. The ending includes a prompt for readers to create their own similar "safe" list, and a list of resources for parents.

Consilience E. O. Wilson, 2014-11-26 A dazzling journey across the sciences and humanities in search of deep laws to unite them. --The Wall Street Journal One of our greatest living scientists--and the winner of two Pulitzer Prizes for *On Human Nature* and *The Ants*--gives us a work of visionary importance that may be the crowning achievement of his career. In *Consilience* (a word that originally meant jumping together), Edward O. Wilson renews the Enlightenment's search for a

unified theory of knowledge in disciplines that range from physics to biology, the social sciences and the humanities. Using the natural sciences as his model, Wilson forges dramatic links between fields. He explores the chemistry of the mind and the genetic bases of culture. He postulates the biological principles underlying works of art from cave-drawings to Lolita. Presenting the latest findings in prose of wonderful clarity and oratorical eloquence, and synthesizing it into a dazzling whole, Consilience is science in the path-clearing traditions of Newton, Einstein, and Richard Feynman.

The Oxford Book of American Poetry David Lehman, John Brehm, 2006-04-03 Here is the eagerly awaited new edition of The Oxford Book of American Poetry brought completely up to date and dramatically expanded by poet David Lehman. It is a rich, capacious volume, featuring the work of more than 200 poets—almost three times as many as the 1976 edition. With a succinct and often witty head note introducing each author, it is certain to become the definitive anthology of American poetry for our time. Lehman has gathered together all the works one would expect to find in a landmark collection of American poetry, from Whitman's Crossing Brooklyn Ferry to Stevens's The Idea of Order at Key West, and from Eliot's The Waste Land to Ashbery's Self-Portrait in a Convex Mirror. But equally important, the editor has significantly expanded the range of the anthology. The book includes not only writers born since the previous edition, but also many fine poets overlooked in earlier editions or little known in the past but highly deserving of attention. The anthology confers legitimacy on the Objectivist poets; the so-called Proletariat poets of the 1930s; famous poets who fell into neglect or were the victims of critical backlash (Edna St. Vincent Millay); poets whose true worth has only become clear with the passing of time (Weldon Kees). Among poets missing from Richard Ellmann's 1976 volume but published here are W. H. Auden, Charles

Bukowski, Donald Justice, Carolyn Kizer, Kenneth Koch, Stanley Kunitz, Emma Lazarus, Mina Loy, Howard Moss, Lorine Niedecker, George Oppen, James Schuyler, Elinor Wylie, and Louis Zukosky. Many more women are represented: outstanding poets such as Josephine Jacobsen, Josephine Miles, May Swenson. Numerous African-American poets receive their due, and unexpected figures such as the musicians Bob Dylan, Patti Smith and Robert Johnson have a place in this important work. This stunning collection redefines the great canon of American poetry from its origins in the 17th century right up to the present. It is a must-have anthology for anyone interested in American literature and a book that is sure to be consulted, debated, and treasured for years to come.

Why Do So Many Incompetent Men Become Leaders? Tomas Chamorro-Premuzic, 2019-02-19 Look around your office. Turn on the TV. Incompetent leadership is everywhere, and there's no denying that most of these leaders are men. In this timely and provocative book, Tomas Chamorro-Premuzic asks two powerful questions: Why is it so easy for incompetent men to become leaders? And why is it so hard for competent people--especially competent women--to advance? Marshaling decades of rigorous research, Chamorro-Premuzic points out that although men make up a majority of leaders, they underperform when compared with female leaders. In fact, most organizations equate leadership potential with a handful of destructive personality traits, like overconfidence and narcissism. In other words, these traits may help someone get selected for a leadership role, but they backfire once the person has the job. When competent women--and men who don't fit the stereotype--are unfairly overlooked, we all suffer the consequences. The result is a deeply flawed system that rewards arrogance rather than humility, and loudness rather than wisdom. There is a better way. With clarity and verve, Chamorro-

Premuzic shows us what it really takes to lead and how new systems and processes can help us put the right people in charge.

Numerical Modelling of Failure in Advanced Composite Materials Pedro P. Camanho, Stephen R. Hallett, 2015-08-07
Numerical Modelling of Failure in Advanced Composite Materials comprehensively examines the most recent analysis techniques for advanced composite materials. Advanced composite materials are becoming increasingly important for lightweight design in aerospace, wind energy, and mechanical and civil engineering. Essential for exploiting their potential is the ability to reliably predict their mechanical behaviour, particularly the onset and propagation of failure. Part One investigates numerical modeling approaches to interlaminar failure in advanced composite materials. Part Two considers numerical modelling approaches to intralaminar failure. Part Three presents new and emerging advanced numerical algorithms for modeling and simulation of failure. Part Four closes by examining the various engineering and scientific applications of numerical modeling for analysis of failure in advanced composite materials, such as prediction of impact damage, failure in textile composites, and fracture behavior in through-thickness reinforced laminates. Examines the most recent analysis models for advanced composite materials in a coherent and comprehensive manner Investigates numerical modelling approaches to interlaminar failure and intralaminar failure in advanced composite materials Reviews advanced numerical algorithms for modeling and simulation of failure Examines various engineering and scientific applications of numerical modelling for analysis of failure in advanced composite materials

Colonialism's Currency Brian Gettler, 2020-07-16 Money, often portrayed as a straightforward representation of market value, is also a political force, a technology for remaking space and population. This was especially true in nineteenth- and twentieth-century Canada, where money - in many forms -

provided an effective means of disseminating colonial social values, laying claim to national space, and disciplining colonized peoples. *Colonialism's Currency* analyzes the historical experiences and interactions of three distinct First Nations - the Wendat of Wendake, the Innu of Mashteuiatsh, and the Moose Factory Cree - with monetary forms and practices created by colonial powers. Whether treaty payments and welfare provisions such as the paper vouchers favoured by the Department of Indian Affairs, the Canadian Dominion's standardized paper notes, or the made beaver (the Hudson's Bay Company's money of account), each monetary form allowed the state to communicate and enforce political, economic, and cultural sovereignty over Indigenous peoples and their lands. Surveying a range of historical cases, Brian Gettler shows how currency simultaneously placed First Nations beyond the bounds of settler society while justifying colonial interventions in their communities. Testifying to the destructive and the legitimizing power of money, *Colonialism's Currency* is an intriguing exploration of the complex relationship between First Nations and the state.

Plutarch's Life of Alcibiades Simon Verdegem, 2010 At the beginning of the second century C.E., Plutarch of Chaeronea wrote a series of pairs of biographies of Greek and Roman statesmen. Their purpose is moral: the reader is invited to reflect on important ethical issues and to use the example of these great men from the past to improve his or her own conduct. This book offers the first full-scale commentary on the *Life of Alcibiades*. It examines how Plutarch's biography of one of classical Athens' most controversial politicians functions within the moral program of the *Parallel Lives*. Built upon the narratological distinction between story and text, Simon Verdegem's analysis, which involves detailed comparisons with other Plutarchan works (especially the *Lives of Nicias and Lysander*) and several key texts in the Alcibiades tradition (e.g., Plato, Thucydides, and

Xenophon), demonstrates how Plutarch carefully constructed his story and used a wide range of narrative techniques to create a complex Life that raises interesting questions about the relation between private morality and the common good.

The Language of Judges Lawrence M. Solan, 2010-08-15 Since many legal disputes are battles over the meaning of a statute, contract, testimony, or the Constitution, judges must interpret language in order to decide why one proposed meaning overrides another. And in making their decisions about meaning appear authoritative and fair, judges often write about the nature of linguistic interpretation. In the first book to examine the linguistic analysis of law, Lawrence M. Solan shows that judges sometimes inaccurately portray the way we use language, creating inconsistencies in their decisions and threatening the fairness of the judicial system. Solan uses a wealth of examples to illustrate the way linguistics enters the process of judicial decision making: a death penalty case that the Supreme Court decided by analyzing the use of adjectives in a jury instruction; criminal cases whose outcomes depend on the Supreme Court's analysis of the relationship between adverbs and prepositional phrases; and cases focused on the meaning of certain words in the Constitution. Solan finds that judges often describe our use of language poorly because there is no clear relationship between the principles of linguistics and the jurisprudential goals that the judge wishes to promote. A major contribution to the growing interdisciplinary scholarship on law and its social and cultural context, Solan's lucid, engaging book is equally accessible to linguists, lawyers, philosophers, anthropologists, literary theorists, and political scientists.
