Tom Lowrie, Robyn Jorgensen (Zevenbergen)

University and School Collaborations During a Pandemic Fernando M. Reimers, Francisco J. Marmolejo, 2022 Based on twenty case studies of universities worldwide, and on a survey administered to leaders in 101 universities, this open access book shows that, amidst the significant challenges caused by the COVID-19 pandemic, universities found ways to engage with schools to support them in sustaining educational opportunity. In doing so, they generated considerable innovation, which reinforced the integration of the research and outreach functions of the university. The evidence suggests that universities are indeed open systems, in interaction with their environment, able to discover changes that can influence them and to change in response to those changes. They are also able, in the success of their efforts to mitigate the educational impact of the pandemic, to create better futures, as the result of the innovations they can generate. This challenges the view of universities as ivory towers being isolated from the surrounding environment and detached from local problems. As they reached out to schools, universities not only generated clear and valuable innovations to sustain educational opportunity and to improve it, this process also contributed to transform internal university processes in ways that enhanced their own ability to deliver on the third mission of outreach

The Illustrated Guide to Assistive Technology and Devices (EasyRead Super Large 20pt Edition)
Suzanne Robitaille, 2010

Breaking the Speech Barrier Mary Ann Ronski, S. C. Warren, Irwin H. Spivak, Rose A. Sevcik, 1998-12-01 In school, but locked out 13 youth, each with fewer than 10 productive words to use to build their relationship with families, teachers, and friends. That is, until they were introduced to the System for Augmenting Language, or SAL. In a wonderful meshing of science and the real

world, this remarkable book chronicles the process of language learning through augmented means for people who have significant difficulty acquiring spoken language. In engaging storytelling style, speech-language pathologist Ronski and psychologist Sevcik describe how they carried their research from language lab to school and in the process changed the lives of the youth to whom they brought the SAL. A replicable system that fosters naturalistic exchanges between communicative partners using electronic speech-output devices, the SAL extends the power of communication to children otherwise locked out of the world around them. With a new level of vocabulary mastery, students enjoy not only enhanced communicative skills but also higher judgments of competence from both familiar and unfamiliar observers. One award-winning SAL application, Project FACTT (Facilitating Augmentative Communication Through Technology) provides innovative augmentative communication services to school-age children with severe disabilities and is described in detail.

Comics Beyond the Page in Latin America James Scorer, 2020-02-17 Comics Beyond the Page in Latin America is a cutting-edge study of the expanding worlds of Latin American comics. Despite lack of funding and institutional support, not since the mid-twentieth century have comics in the region been so dynamic, so diverse and so engaged with pressing social and cultural issues. Comics are being used as essential tools in debates about, for example, digital cultures, gender identities and political disenfranchisement.

Buyology Martin Lindstrom, 2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In Buyology, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains

of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

OECD, Inter-American Development Bank, 2016-06-22 This joint initiative by the Inter-American Development Bank (IDB) and the OECD seeks to encourage the expansion of broadband networks and services in the region, supporting a coherent and cross-sectorial approach, to maximise their benefits for economic and social development.

Ancient Manuscripts in Digital Culture David Hamidović, Claire Clivaz, Sarah Bowen

Savant, 2019 Ancient Manuscripts in Digital Culture presents an overview of the digital turn in Ancient Jewish and Christian manuscripts visualisation, data mining and communication. Edited by David Hamidovic, Claire Clivaz and Sarah Bowen Savant, it gathers together the contributions of seventeen scholars involved in Biblical, Early Jewish and Christian studies. The volume attests to the spreading of digital humanities in these fields and presents fundamental analysis of the rise of visual culture as well as specific test-cases concerning ancient manuscripts. Sophisticated visualisation tools, stylometric analysis, teaching and visual data, epigraphy and visualisation belong notably to the varied overview presented in the volume.

Digital Games and Mathematics Learning Tom Lowrie, Robyn Jorgensen

(Zevenbergen), 2015-10-05 Digital games offer enormous potential for learning and engagement in mathematics ideas and processes. This volume offers multidisciplinary perspectives—of educators, cognitive scientists, psychologists and sociologists—on how digital games influence the social activities and mathematical ideas of learners/gamers. Contributing authors identify opportunities for broadening current understandings of how mathematical ideas are fostered (and embedded) within digital game environments. In particular, the volume advocates for new and different ways of thinking about mathematics in our digital age—proposing that these mathematical ideas and numeracy practices are distinct from new literacies or multiliteracies. The authors acknowledge that the promise of digital games has not always been realised/fulfilled. There is emerging, and considerable, evidence to suggest that traditional discipline boundaries restrict opportunities for mathematical learning. Throughout the book, what constitutes mathematics learnings and pedagogy is contested. Multidisciplinary viewpoints are used to describe and understand the potential of digital games for learning mathematics and identify current tensions within the field. Mathematics learning is defined as being about problem solving; engagement in mathematical ideas and processes; and social engagement. The artefact, which is the game, shapes the ways in which the gamers engage with the social activity of gaming. In parallel, the book (as a textual artefact) will be supported by Springer's online platform—allowing for video and digital communication (including links to relevant websites) to be used as supplementary material and establish a dynamic communication space.

Anagram Solver Bloomsbury Publishing, 2009-01-01 Anagram Solver is the essential guide to cracking all types of quiz and crossword featuring anagrams. Containing over 200,000 words and phrases, Anagram Solver includes plural noun forms, palindromes, idioms, first names and all parts of

speech. Anagrams are grouped by the number of letters they contain with the letters set out in alphabetical order so that once the letters of an anagram are arranged alphabetically, finding the solution is as easy as locating the word in a dictionary.

The Word Rhythm Dictionary Timothy Polashek, 2014-04-18 This new kind of dictionary reflects the use of “rhythm rhymes” by rappers, poets, and songwriters of today. Users can look up words to find collections of words that have the same rhythm as the original and are useable in ways that are familiar to us in everything from vers libre poetry to the lyrics and music of Bob Dylan and hip hop groups.

The Space Rebecca Louise Hare, Robert Dillon, 2016-06 Thoughts, Ideas, Hacks on Learning Space Design supports the conversation around this necessary revolution happening in education concerning reshaping school spaces to better support learning. This book goes well beyond the noise on learning space design that focuses on pretty Pinterest classrooms and moves towards a more sophisticated conversation

Cinema of Contradiction Sally Faulkner, 2006-02-22 A key decade in world cinema, the 1960s was also a crucial era of change in Spain. A Cinema of Contradiction, the first book to focus in depth on this period in Spain, analyses six films that reflect and interpret these transformations. The coexistence of traditional and modern values and the timid acceptance of limited change by Franco's authoritarian regime are symptoms of the uneven modernity that characterises the period. Contradiction--the unavoidable effect of that unevenness--is the conceptual terrain explored by these six filmmakers. One of the most significant movements of Spanish film history, the 'New Spanish Cinema' art films explore contradictions in their subject matter, yet are themselves the contradictory products of the state's protection and promotion of films that were ideologically opposed to it. A

Cinema of Contradiction argues for a new reading of the movement as a compromised yet nonetheless effective cinema of critique. It also demonstrates the possible contestatory value of popular films of the era, suggesting that they may similarly explore contradictions. This book therefore reveals the overlaps between art and popular film in the period, and argues that we should see these as complementary rather than opposing areas of cinematic activity in Spain.
