**Global Media Giants** Benjamin Birkinbine, Rodrigo Gomez, Janet Wasko, 2016-07-01 Global Media Giants takes an in-depth look at how media corporate power works globally, regionally, and nationally, investigating the ways in which the largest and most powerful media corporations in the world wield power. Case studies examine not only some of the largest media corporations (News Corp., The Microsoft Corporation) in terms of revenues, but also media corporations that hold considerable power within national, regional, or geolinguistic contexts (Televisa, The Bertelsmann Group, Sony Corporation). Each chapter approaches a different corporation through the lens of economy, politics, and culture, giving students and scholars a thoughtful and data-driven guide with which to interrogate contemporary media industry power.

Cost and Revenue Overruns of the Olympic Games 2000–2018 Holger Preuß, Wladimir Andreff, Maike Weitzmann, 2018-12-17 In this open access book the cost and revenue overruns of Olympic Games from Sydney 2000 to PyeongChang 2018 from eight years before the Games to Games-time are investigated to provide a base for future host cities. The authors evaluated the development of expenditure and revenues of the organizing committees to operate the event, and the investment of taxpayers' money for Olympic venues (non-OCOG budget). The study is based on data collected worldwide and is currently the most advanced study on cost and revenue changes of Olympic Games.

**Celebration Capitalism and the Olympic Games** Jules Boykoff, 2013-08-15 The Olympic Games have

become the world's greatest media and marketing event—a global celebration of exceptional athletics gilded with corporate cash. Huge corporations vie for association with the Olympic Image in the hope of gaining a worldwide marketing audience of billions. In this provocative critical study of the contemporary Olympics, Jules Boykoff argues that the Games have become a massive planned economy designed to shield the rich from risk while providing them with a spectacle to treasure. Placing political economy at the center of the analysis, and drawing on interdisciplinary research in sociology, politics, geography, history, and economics, Boykoff develops an innovative theory of celebration capitalism, the manipulation of state actors as partners that drives us towards public–private partnerships in which the public pays and the private profits. He argues that the Athens Games in 2004 marked the full emergence of celebration capitalism, with London 2012 representing its quintessential expression, characterized by a state of exception, unfettered commercialism, repression of dissent, questionable sustainability claims, and the complicity of the mainstream media. Controversial, challenging, and forthright, this book opens up a fascinating new avenue for understanding the contemporary Olympics in the context of global capitalist society. It is essential reading for anybody with an interest in the Olympic Games, the relationship between sport and society, or global politics and culture.

**No Boston Olympics** Chris Dempsey, Andrew Zimbalist, 2017-05-02 In 2013 and 2014, some of

Massachusetts' wealthiest and most powerful individuals hatched an audacious plan to bring the 2024 Summer Olympics to Boston. Like their counterparts in cities around the world, Boston's Olympic boosters promised political leaders, taxpayers, and the media that the Games would deliver incalculable benefits and require little financial support from the public. Yet these advocates refused to share the details of their bid and only grudgingly admitted, when pressed, that their plan called for billions of dollars in construction of unneeded venues. To win the bid, the public would have to guarantee taxpayer funds to cover cost overruns, which have plagued all modern Olympic Games. The United States Olympic Committee (USOC) chose Boston 2024's bid over that of other American cities in January 2015-and for a time it seemed inevitable that the International Olympic Committee (IOC) would award the Games to Boston 2024. No Boston Olympics is the story of how an ad hoc, underfunded group of diverse and engaged citizens joined together to challenge and ultimately derail Boston's boosters, the USOC, and the IOC. Chris Dempsey was cochair of No Boston Olympics, the group that first voiced skepticism, demanded accountability, and catalyzed dissent. Andrew Zimbalist is a world expert on the economics of sports, and the leading researcher on the hidden costs of hosting mega-events such as the Olympics and the World Cup. Together, they tell Boston's story, while providing a blueprint for citizens who seek to challenge costly, wasteful, disruptive, and risky Olympic bids in their own cities.

*Science and Skiing* E. Kornexl,E. Muller,C. Raschner,H. Schwameder,2003-09-02 The first International Congress on Science and Skiing was held in Austria in January 1996. The main aim of the conference was to bring together original key research in this area and provide an essential update for those in the field. The link between theory and practice was also addressed, making the research more applicable for both researchers and coaches. This book is divided into five parts, each containing a group of papers that are related by theme or disciplinary approach. They are as follows: Biomechanics of Skiing; Fitness testing and Training in Skiing; Movement Control and Psychology in Skiing; Physiology of Skiing and Sociology of Skiing. The conclusions drawn from the conference represent an invaluable practical reference for sports scientists, coaches, skiers and all those involved in this area.

**Understanding the Olympics** John Horne, Garry Whannel, 2020-04-08 How did the Olympics evolve into a multi-national phenomenon? How can the Olympics help us to understand the relationship between sport and society? What will be the impact and legacy of the Olympics after Tokyo in 2020? Understanding the Olympics answers all these questions by exploring the social, cultural, political, historical, and economic context of the Games. This thoroughly revised and updated edition discusses recent attempts at future proofing by the International Olympic Committee (IOC) in the face of growing global anti-Olympic activism, the changing geo-political context within which the Olympics take place, and the Olympic histories of the next three cities to host the Games – Tokyo (2020), Paris (2024), and Los Angeles (2028) – as well as the legacy of the London (2012) Olympics. For the first time, this new edition introduces the reader to the emergence of ‘other Games’ associated with the IOC – the Winter Olympics, the Paralympics, and the Youth Olympics. It also features a full Olympic history timeline, many new photographs, refreshed suggestions for further reading, and revised illustrations. The most up-to-date and authoritative textbook available on the Olympic Games, Understanding the Olympics is essential reading for anybody with an interest in the Olympics or the wider relationship between sport and society.

Leituras de gênero e sexualidade nos esportes  
Wagner Xavier de Camargo, 2022-09-14 Este livro é composto de pequenos textos críticos que se propõem a olhar o campo esportivo, ampliando-o nos

entendimentos sobre corpos, gêneros e sexualidades para além da lógica binária que opõe masculino versus feminino, homem versus mulher. Além disso, trará casos de pessoas LGBTQIA+ (lésbicas, gays, bissexuais, travestis, transexuais, pessoas transgênero e intersexo, queer, assexuais e demais), famosas ou não, que têm lutado dentro de tais espaços discriminatórios de práticas corporais.

### **The Marketplace of Attention** James G.

Webster, 2016-09-02 How do media find an audience when there is an endless supply of content but a limited supply of public attention? Feature films, television shows, homemade videos, tweets, blogs, and breaking news: digital media offer an always-accessible, apparently inexhaustible supply of entertainment and information. Although choices seems endless, public attention is not. How do digital media find the audiences they need in an era of infinite choice? In *The Marketplace of Attention*, James Webster explains how audiences take shape in the digital age. Webster describes the factors that create audiences, including the preferences and habits of media users, the role of social networks, the resources and strategies of media providers, and the growing impact of media measures—from ratings to user recommendations. He incorporates these factors into one comprehensive framework: the marketplace of attention. In doing so, he shows that the marketplace works in ways that belie our greatest hopes and fears about digital media. Some observers claim that digital

media empower a new participatory culture; others fear that digital media encourage users to retreat to isolated enclaves. Webster shows that public attention is at once diverse and concentrated—that users move across a variety of outlets, producing high levels of audience overlap. So although audiences are fragmented in ways that would astonish midcentury broadcasting executives, Webster argues that this doesn't signal polarization. He questions whether our preferences are immune from media influence, and he describes how our encounters with media might change our tastes. In the digital era's marketplace of attention, Webster claims, we typically encounter ideas that cut across our predispositions. In the process, we will remake the marketplace of ideas and reshape the twenty-first century public sphere.

**Doing Business in Emerging Markets** S. Tamer Cavusgil, Pervez N. Ghauri, Milind R. Agarwal, 2002

Including numerous exhibits and real-world examples, the authors explore analysis and evaluation of market potential, management of the negotiation process, and the recognition of important regional business styles and cultural issues. **Global Sport Business** Brenda G. Pitts, James J.

Zhang,2019 Featuring original case studies of contemporary sport business and international perspectives, from leading scholars across North and South America, Europe and Asia, this book examines key research and practical issues in sport business management and marketing studies in both global and local contexts.

Reporting David Remnick,2007-05-08 David Remnick is a writer with a rare gift for making readers understand the hearts and minds of our public figures. Whether it's the decline and fall of Mike Tyson, Al Gore's struggle to move forward after his loss in the 2000 election, or Vladimir Putin dealing with Gorbachev's legacy, Remnick brings his subjects to life with extraordinary clarity and depth. In Reporting, he gives us his best writing from the past fifteen years, ranging from American politics and culture to post-Soviet Russia to the Middle East conflict; from Tony Blair grappling with Iraq, to Philip Roth making sense of America's past, to the rise of Hamas in Palestine. Both intimate and deeply informed by history, Reporting is an exciting and panoramic portrait of our times.

**The Best Olympics Ever?** Helen Jefferson Lenskyj,2012-02-01 Uses the Sydney Olympics as a prism through which to explore recent Olympic scandals, media coverage, reform efforts, and controversies.

Who's Bigger? Steven Skiena,Charles B. Ward,2014 The authors use quantitative analysis to rank the prominence of more than 1,000 of history's biggest figures, while also discussing trends gleaned from the rankings, as well as the computational methods

used to determine the rankings.

**Tarnished Rings** Stephen Wenn, Robert Barney, Scott Martyn, 2011-12-29 In late 1998 and the early months of 1999, the International Olympic Committee (IOC) was an organization in crisis. Revelations of a slush fund employed by Salt Lake City officials to secure votes from a number of IOC members in support of the city's bid for the 2002 Olympic Winter Games invited intense scrutiny of the organization by the international media. The IOC and its president, Juan Antonio Samaranch, staggered through the opening weeks of the scandal, but ultimately Samaranch and key actors such as IOC vice president Richard Pound, marketing director Michael Payne, and director-general François Carrard weathered the storm. They also safeguarded the IOC's autonomy and subsequently spearheaded the push for reforms to the Olympic Charter, intended to better position the IOC for the twenty-first century. In *Tarnished Rings*, the authors delve into this fascinating story, exploring the genesis of the scandal and charting the IOC's efforts to bring stability to its operations. Based on extensive research and unparalleled access to primary and source material, the authors offer a behind-the-scenes account of the politics surrounding the IOC and the bidding process. Wenn, Barney, and Martyn's potent examination of this critical episode in Olympic history and of the presidency of Samaranch, who brought sweeping changes to the Olympic Movement in the 1980s and 1990s, offers valuable lessons for those interested in the IOC, the Olympic Movement, and the broader concepts of

leadership and crisis management.

**Soviet and Post-Soviet Sexualities** Richard C.M. Mole, 2019-01-23 Despite Soviet Russia having been one of the first major powers to decriminalise homosexual acts between men, attitudes towards lesbian, gay, bisexual and transgender (LGBT) people in contemporary Russia and the other post-Soviet states have become increasingly hostile, with the introduction of laws restricting their rights and an increase in homophobic violence. This book explores how this situation has come about. It discusses how meanings attached to non-heteronormative sexualities have been constructed for specific socio-political purposes by elites in line with Marxist-Leninist or nationalist thought, explores how attitudes to non-normative sexualities developed historically and examines the current situation in the post-Soviet space, including Russia, Transcaucasia, Central Asia and the Baltic States. The book provides a wealth of detail on this understudied subject and assesses how LGBT subjects are responding to this state of affairs.

**Autonomy of Sport in Europe** Jean-Loup Chappelet, 2010-01-01 Given the impact that successive court rulings have had on the organisation of the sports movement in the past 15 years, the autonomy of non-governmental sports organisations has become a highly topical concern in Europe. It is also closely related to the issue of governance, the subject of previous Council of Europe studies. The Enlarged Partial Agreement on Sport (EPAS) decided to explore the concept of autonomy in greater depth by studying the

conceptual, political, legal, economic and psycho-sociological aspects of the subject. This study was carried out at the request of the EPAS by the Swiss Graduate School of Public Administration (IDHEAP) on the basis of a questionnaire sent to public authorities in charge of sport and to national and international umbrella sports organisations. In addition to an analysis of the data obtained, documents produced by public authorities and sports organisations on this emerging issue are presented. This study contributes to a better understanding of the concept of autonomy and offers a clear picture of the issues involved.
