Ticking Clock Ira Rosen,2021-02-16 Two-time Peabody Award-winning writer and producer Ira Rosen reveals the intimate, untold stories of his decades at America's most iconic news show. It's a 60 Minutes story on 60 Minutes itself. When producer Ira Rosen walked into the 60 Minutes offices in June 1980, he knew he was about to enter television history. His career catapulted him to the heights of TV journalism, breaking some of the most important

stories in TV news. But behind the scenes was a war room of clashing producers, anchors, and the most formidable 60 Minutes figure: legendary correspondent Mike Wallace. Based on decades of access and experience, Ira Rosen takes readers behind closed doors to offer an incisive look at the show that invented TV investigative journalism. With surprising humor, charm, and an eye for colorful detail, Rosen delivers an authoritative account of the unforgettable personalities that battled for prestige, credit, and the desire to scoop everyone else in the game. As one of Mike Wallace's top producers, Rosen reveals the interview secrets that made Wallace's work legendary, and the flaring temper that made him infamous. Later, as senior producer of ABC News Primetime Live and 20/20, Rosen exposes the competitive environment among famous colleagues like Diane Sawyer and Barbara Walters, and the power plays between correspondents Chris Wallace, Anderson Cooper, and Chris Cuomo. A master class in how TV news is made, Rosen shows readers how 60 Minutes puts together a story when sources are explosive, unreliable, and even dangerous. From unearthing shocking revelations from inside the Trump White House, to an outrageous proposition from Ghislaine Maxwell, to interviewing gangsters Joe Bonanno and John Gotti Jr., Ira Rosen was behind the scenes of some of 60 Minutes' most sensational stories. Highly entertaining, dishy, and unforgettable, Ticking Clock is a never-before-told account of the most successful news show in American history.

**The Story of Clocks and Calendars** Betsy Maestro, 2004-11-02 Travel through time with the maestros as they explore the amazing history of timekeeping! Did you know that there is more than one calendar? While the most commonly used calendar was on the year 2000, the Jewish calendar said it was the year 5760, while the Muslim calendar said 1420 and the Chinese calendar said 4698. Why do these differences exist? How did ancient civilizations keep track of time? When and how were clocks first invented? Find answers to all these questions and more in this incredible trip through history.

**Retro Watches** Josh Sims, Mitch Greenblatt, 2020-06-23 A popular collector's guide to discovering the world of unusual, rare, and dazzlingly retro watches. What you wear on your wrist can be more than merely functional. Eschewing the common categories of the "classics," the ostentatiously high-priced, and the "blingy," this book brings together individualist pieces that few have seen and even fewer own. Retro Watches is a collector's guide for those who want to make a statement with the watch they wear, but who are

looking for something a little different. It collects the most intriguing, visually striking, and out-there watch designs from little-known but influential watch brands, along with overlooked but brilliant pieces from the major players. Over one hundred watch models are featured, specially photographed for the book and accompanied by accessible, informative texts discussing the watch's design, history, and intriguing features, as well as info panels detailing rarity, value, and other key attributes. Additional breakout spreads dive into the cultural and fashion history of watch design and the many innovations of the '60s, '70s, and '80s. Beautifully presented, Retro Watches is the volume for the watch wearer who wants to stand out from the crowd.

#### Designing Embedded Systems with PIC Microcontrollers Tim

Wilmshurst, 2006-10-24 Embedded Systems with PIC Microcontrollers: Principles and Applications is a hands-on introduction to the principles and practice of embedded system design using the PIC microcontroller. Packed with helpful examples and illustrations, the book provides an in-depth treatment of microcontroller design as well as programming in both assembly language and C, along with advanced topics such as techniques of connectivity and networking and real-time operating systems. In this one book students get all they need to know to be highly proficient at embedded systems design. This text combines embedded systems principles with applications, using the 16F84A, 16F873A and the 18F242 PIC microcontrollers. Students learn how to apply the

principles using a multitude of sample designs and design ideas, including a robot in the form of an autonomous guide vehicle. Coverage between software and hardware is fully balanced, with full presentation given to microcontroller design and software programming, using both assembler and C. The book is accompanied by a companion website containing copies of all programs and software tools used in the text and a 'student' version of the C compiler. This textbook will be ideal for introductory courses and lab-based courses on embedded systems, microprocessors using the PIC microcontroller, as well as more advanced courses which use the 18F series and teach C programming in an embedded environment. Engineers in industry and informed hobbyists will also find this book a valuable resource when designing and implementing both simple and sophisticated embedded systems using the PIC microcontroller. \*Gain the knowledge and skills required for developing today's embedded systems, through use of the PIC microcontroller.\*Explore in detail the 16F84A, 16F873A and 18F242 microcontrollers as examples of the wider PIC family.\*Learn how to program in Assembler and C.\*Work through sample designs and design ideas, including a robot in the form of an autonomous guided vehicle.\*Accompanied by a CD-ROM containing copies of all programs and software tools used in the text and a 'student' version of the C compiler.
