Linda Weintraub

To Life! Linda Weintraub,2012-09-01 This title documents the burgeoning eco art movement from A to Z, presenting a panorama of artistic responses to environmental concerns, from Ant Farms anti-consumer antics in the 1970s to Marina Zurkows 2007 animation that anticipates the havoc wreaked upon the planet by global warming.

Charter of the New Urbanism Congress for the New Urbanism,2000 An agenda for thriving urban centers, the San Francisco-based Congress for the New Urbanism is a leading force for modern design that encourages viable neighborhoods, conserves natural environments, and preserves our architectural heritage. Charter of the New Urbanism introduces you to the work of the world-class planners, architects and other professionals who are making the new urbanism happen. Charter contributors, including Andres Duany, Peter Calthorpe, and Liz Moule, explain strategies that range from large-scale, regional, to small-scale: blocks, streets and buildings. Revealing case studies help you understand the impact of geography, economics,development and urban patterns, public and private uses, transportation and pedestrian access, housing, building densities and land uses, codes, parks, shared use, safety, preservation and renewal, community identity and much more in this invaluable resource for design professionals.

Antifragile Nassim Nicholas Taleb,2014-01-28 Antifragile is a standalone book in Nassim Nicholas Taleb's landmark Incerto series, an investigation of opacity, luck, uncertainty, probability, human error, risk, and decision-making in a world we don't understand. The other books in the series are Fooled by Randomness, The Black Swan, Skin in the Game, and The Bed of Procrustes. Nassim Nicholas Taleb, the bestselling author of The Black Swan and one of the foremost thinkers of our time, reveals how to thrive in an uncertain world. Just as human bones get stronger when subjected to stress and tension, and rumors or riots intensify when someone tries to repress them, many things in life benefit from stress, disorder, volatility, and turmoil. What Taleb has identified and calls "antifragile" is that category of things that not only gain from chaos but need it in order to survive and flourish. In The Black Swan, Taleb showed us that highly improbable and unpredictable events underlie almost everything about our world. In Antifragile, Taleb stands uncertainty on its head, making it desirable, even necessary, and proposes that things be built in an antifragile manner. The antifragile is beyond the resilient or robust. The resilient resists shocks and stays the same; the antifragile gets better and better. Furthermore, the antifragile is immune to prediction errors and protected from adverse events. Why is the city-state better than the nation-state, why is debt bad for you, and why is what we call "efficient" not efficient at all? Why do government responses and social policies protect the strong and hurt the weak? Why should you write your resignation letter before even starting on the job? How did the sinking of the Titanic save lives? The book spans innovation by trial and error, life decisions, politics, urban planning, war, personal finance, economic systems, and medicine. And throughout, in addition to the street wisdom of Fat Tony of Brooklyn, the voices and recipes of ancient wisdom, from Roman, Greek, Semitic, and medieval sources, are loud and clear. Antifragile is a blueprint for living in a Black Swan world. Erudite, witty, and iconoclastic, Taleb's message is revolutionary: The antifragile, and only the antifragile, will make it. Praise for Antifragile "Ambitious and thought-provoking . . . highly entertaining."—The Economist "A bold book explaining how and why we should embrace uncertainty, randomness, and error . . . It may just change our lives."—Newsweek

Race Tech's Motorcycle Suspension Bible Paul Thede, Lee Parks,2010-06-19 The suspension expert's illustrated, comprehensive troubleshooting guide for dirt, street, and supermoto—with a solution to virtually any problem. Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance.

Rhetorical Citizenship and Public Deliberation Christian Kock,Lisa Villadsen,2015-06-29 Citizenship has long been a central topic among educators, philosophers, and political theorists. Using the phrase "rhetorical citizenship" as a unifying perspective, Rhetorical Citizenship and Public Deliberation aims to develop an understanding of citizenship as a discursive phenomenon, arguing that discourse is not prefatory to real action but in many ways constitutive of civic engagement. To accomplish this, the book brings together, in a cross-disciplinary effort, contributions by scholars in fields that rarely intersect. For the most part, discussions of citizenship have focused on aspects that are central to the "liberal" tradition of social thought—that is, questions of the freedoms and rights of citizens and groups. This collection gives voice to a "republican" conception of citizenship. Seeing participation and debate as central to being a citizen, this tradition looks back to the Greek city-states and republican Rome. Citizenship, in this sense of the word, is rhetorical citizenship. Rhetoric is thus at the core of being a citizen. Aside from the editors, the contributors are John Adams, Paula Cossart, Jonas Gabrielsen, Jette Barnholdt Hansen, Kasper Møller Hansen, Sine Nørholm Just, Ildikó Kaposi, William Keith, Bart van Klink, Marie Lund Klugeff, Manfred Kraus, Oliver W. Lembcke, Berit von der Lippe, James McDonald, Niels Møller Nielsen, Tatiana Tatarchevskiy, Italo Testa, Georgia Warnke, Kristian Wedberg, and Stephen West.

40 Years of Cycling Photography Graham Watson,2017-12 40 Years of Cycling Photography represents a lifetime's work for World famous cycling photographer Graham Watson. From Bernard Hinault in the 1970's through to Chris Froome in the 2010's, Watson's photography of the greatest champions and epic races is the most complete cycling archive ever captured by a single photographer. Watson was there when Hinault won

his first Tour de France in 1978, and when Miguel Indurain won his fifth Tour in 1995. In recent times, Watson recorded the emergence of a new breed of cycling superstars from Cadel Evans to Mark Cavendish and Peter Sagan. Cycling fans will revel in the variety and quality of the images in 40 Years. Sean Kelly's glorious career, as well as other great Classics stars such as Tom Boonen and Fabien Cancellara feature throughout the 300-plus images. Graham Watson began his career photographing aristocracy in London with a heavy old Kodak camera made of wood and glass. He describes the transition from black and white sheet-film, to colour slides, to digital, and finally to direct transmission from the camera in the modern era. Watson has previously authored more than twenty titles, ranging from Visions of Cycling in 1988, 20 Years of Cycling in 2000, Landscapes of Cycling in 2004, and his personal Guide to the Tour de France. In addition, Watson has co-authored coffee-table books with some of the sport's most famous names - Stephen Roche, Miguel Indurain, Sean Kelly, Lance Armstrong and Cadel Evans.

The Forest and the City Cecil C. Konijnendijk, 2018-03-12 Amsterdamse Bos, Bois de Boulogne, Epping Forest, Hong Kong's country parks, Stanley Park: throughout history cities across the world have developed close relationships with nearby woodland areas. In some cases, cities have even developed – and in some cases are promoting – a distinct 'forest identity'. This book introduces the rich heritage of these city forests as cultural landscapes, and shows that cities and forests can be mutually beneficial. Essential reading for students and researchers interested in urban sustainability and urban forestry, this book also has much wider appeal. For with city forests playing an increasingly important role in local government sustainability programs, it provides an important reference for those involved in urban planning and decision making, public affairs and administration, and even public health. From providers of livelihoods to healthy recreational environments, and from places of inspiration and learning to a source of conflict, the book presents examples of city forests from around the world. These cases clearly illustrate how the social and cultural development of towns and forests has often gone hand in hand. They also reveal how better understanding of city forests as distinct cultural and social phenomena can help to strengthen synergies both between cities and forests, and between urban society and nature.

A New Pattern Language for Growing Regions Michael Mehaffy, Yulia Kryazheva, Andrew Rudd, Nikos Salingaros, 2020 The 1977 book A Pattern Language was a landmark in the design world, introducing a methodology that has since become remarkably widespread and effective across many fields. Among them is software, where design patterns have since become an industry standard. Important spinoffs include peer-to-peer collaboration technologies like wiki - the basis of Wikipedia and related innovations - as well as Agile Methodology. Yet curiously, the one field where pattern methodology has lagged most conspicuously is the one where it began, the built environment. In part, the popular appeal of the 1977 book served to freeze the initial set of patterns, greatly slowing further peer-to-peer development in environmental design - contrary to the original authors' stated aims. As one remedy, we present here - in one of many more hoped-for future companion volumes to the original classic book - a new collection of 80 patterns for a new era of urban challenges, including rapid urbanization, slum upgrading, sustainable urbanism, [CUT: new] urban technologies, and new tools and strategies to meet these and other challenges. This new collection comes as a contribution to a five-year collaboration with UN-Habitat on implementation of the New Urban Agenda, a framework document adopted by consensus by all 193 countries of the United Nations. However, there remains an urgent need to implement its humane aspirations, using tools and strategies grounded in research evidence, but also subject to revision, addition and refinement with new findings from new collaborators. This volume aims to meet that need - together with the launch of an online companion pattern repository, available at npl.wiki. Both initiatives were developed in collaboration with Ward Cunningham, wiki inventor, and pioneer of pattern languages of programming as well as Agile Methodology. Both are meant to expand the capacity of pattern languages in support of a hopeful new era of open-source, human-centered, life-enriching technology.

Everything but the Coffee Bryant Simon, 2009-10-20 Everything but the Coffee casts a fresh eye on the world's most famous coffee company, looking beyond baristas, movie cameos, and Paul McCartney CDs to understand what Starbucks can tell us about America. Bryant Simon visited hundreds of Starbucks around the world to ask, Why did Starbucks take hold so quickly with consumers? What did it seem to provide over and above a decent cup of coffee? Why at the moment of Starbucks' profit-generating peak did the company lose its way, leaving observers baffled about how it might regain its customers and its cultural significance? Everything but the Coffee probes the company's psychological, emotional, political, and sociological power to discover how Starbucks' explosive success and rapid deflation exemplify American culture at this historical moment. Most importantly, it shows that Starbucks speaks to a deeply felt American need for predictability and class standing, community and authenticity, revealing that Starbucks' appeal lies not in the product it sells but in the easily consumed identity it offers.

IB Sports, Exercise & Health Science Course Book John Sproule, 2012-09-20 Written by an experienced teacher, this comprehensive book will provide students with all the material and practice they need to succeed in this brand new subject area. Packed with visual explanation and practice, it will help students fully understand the science behind the body and its relationship to human well-being.

Art in Transfer in the Era of Pop Annika Ohrner, 2017-01-03 How should we understand post-war art? How were issues of cultural transfer and curatorial strategies dealt with in the extended 1960s - the era of pop? *Art in Transfer in the Era of Pop* juxtaposes issues and contexts approaching the concept and reception of Pop Art. Contributors from Europe and beyond weave a web that resists the notion of universalism, adding to art historian Piotr Piotrowski's horizontal art history. This volume avoids the historiographic stance where the US--Europe relationship appears to be a one-way affair. Instead, the reader is drawn into the history of the circulation and cross-pollination of ideas, the aesthetic practices and the various contexts that influenced them.

Urbanization, Biodiversity and Ecosystem Services: Challenges and Opportunities Thomas Elmqvist, Michail Fragkias, Julie Goodness, Burak Güneralp, Peter J. Marcotullio, Robert I. McDonald, Susan Parnell, Maria Schewenius, Marte Sendstad, Karen C. Seto, Cathy Wilkinson, 2013-09-21 Urbanization is a global phenomenon and the book emphasizes that this is not just a social-technological process. It is also a social-ecological process where cities are places for nature, and where cities also are dependent on, and have impacts on, the biosphere at different scales from local to global. The book is a global assessment and delivers four main conclusions: Urban areas are expanding faster than urban populations. Half the increase in urban land across the world over the next 20 years will occur in Asia, with the most extensive change expected to take place in India and China Urban areas modify their local and regional climate through the urban heat island effect and by altering precipitation patterns, which together will have significant impacts on net primary production, ecosystem health, and biodiversity Urban expansion will heavily draw on natural resources, including water, on a global scale, and will often consume prime agricultural land, with knock-on effects on biodiversity and ecosystem services elsewhere Future urban expansion will often occur in areas where the capacity for formal governance is restricted, which will constrain the protection of biodiversity and management of ecosystem services

Advancing Equity Planning Now Norman Krumholz, Kathryn Wertheim Hexter, 2019-01-15 What can planners do to restore equity to their craft? Drawing upon the perspectives of a diverse group of planning experts, *Advancing Equity Planning Now* places the concepts of fairness and equal access squarely in the center of planning research and practice. Editors Norman Krumholz and Kathryn Wertheim Hexter provide essential resources for city leaders and planners, as well as for students and others, interested in shaping the built environment for a more just world. *Advancing Equity Planning Now* remind us that equity has always been an integral consideration in the planning profession. The historic roots of that ethical commitment go back more than a century. Yet a trend of growing inequality in America, as well as other recent socio-economic changes that divide the wealthiest from the middle and working classes, challenge the notion that a rising economic tide lifts all boats. When planning becomes mere place-making for elites, urban and regional planners need to return to the fundamentals of their profession. Although they have not always done so, planners are well-positioned to advocate for greater equity in public policies that address the multiple objectives of urban planning including housing, transportation, economic development, and the removal of noxious land uses in neighborhoods. Thanks to generous funding from Cleveland State University, the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellpress.cornell.edu/cornell-open) and other repositories.

Architecture and the Turkish City Murat Gül, 2017-05-30 Architecture and urban planning have always been used by political regimes to stamp their ideologies upon cities, and this is especially the case in the

modern Turkish Republic. By exploring Istanbul's modern architectural and urban history, Murat Gul highlights the dynamics of political and social change in Turkey from the late-Ottoman period until today. Looking beyond pure architectural styles or the physical manifestations of Istanbul's cultural landscape, he offers critical insight into how Turkish attempts to modernise have affected both the city and its population. Charting the diverse forces evident in Istanbul's urban fabric, the book examines late Ottoman reforms, the Turkish Republic's turn westward for inspiration, Cold War alliances and the AK Party's reaffirmation of cultural ties with the Middle East and the Balkans. Telltale signs of these moments - revivalist architecture drawing on Ottoman and Seljuk styles, 1930s Art Deco, post-war International Style buildings and the proliferation of shopping malls, luxurious gated residences and high-rise towers, for example - are analysed and illustrated in extensive detail. Connecting this rich history to present-day Istanbul, whose urban development is characterised anew by intense social stratification, the book will appeal to researchers of Turkey, its architecture and urban planning.
