Classical Music in a Changing World Lawrence Kramer, Alberto Nones, 2021-09-07 In recent years classical music has become a test case for debates over the future of culture. As times have changed, the value traditionally placed on this music has been challenged on social rather than aesthetic grounds. Lovers of classical music have been asked how its privileged history can be reconciled with growing demands for social justice and social inclusiveness. They have been asked how the music's standing as one of the great accomplishments of the West can be reconciled with the many injustices on which those accomplishments in part depended. How can the future of classical music escape the darker shadows of its past?

'Classical Music in a Changing World: Crisis and Vital Signs' addresses the crisis provoked by such questions in two complementary ways. Several of the chapters show how the classical music world is already grappling with the crisis, and finding vital signs beyond the borders of the music's traditional European strongholds: in Turkey from Ottoman times to the present, in Colombia, and in a Black American film. Other chapters identify areas that still need improvement, especially on behalf of female and LGBTQ+ musicians, and suggest how advances can be made both on concert stages and in schools. This volume, which opens with an introduction by Alberto Nones that contextualizes

the book and outlines the main arguments of its chapters, contains an essay by Lawrence Kramer that examines the place of classical music in the history of consciousness—a history now changing rapidly—and concludes with a Postscript written by the two editors. The writing in this volume will be accessible to a wide audience, including scholars and students, professionals and amateurs, performers and listeners. Teachers will find it a source of lively classroom debate, and scholars a source of learning outside the usual arenas. The book's "vital signs" include the accompanying audio tracks (available for download at: <https://vernonpress.com/book/1281>), which feature vibrant music-making from a diverse range of performers and composers.

The Oxford Handbook of Music and Disability Studies Blake Howe, Stephanie Jensen-Moulton, Neil Lerner, Joseph Straus, 2015-11-11 The Oxford Handbook of Disability Studies represents a comprehensive state of current research for the field of Disability Studies and Music. The forty-two chapters in the book span a wide chronological and geographical range, from the biblical, the medieval, and the Elizabethan, through the canonical classics of the eighteenth and nineteenth centuries, up to modernist styles and contemporary musical theater and popular genres, with stops along the way in post-Civil War America, Ghana and the South Pacific, and many other interesting times and places. Disability is a broad, heterogeneous, and porous identity, and that diversity is reflected in the variety of bodily conditions under discussion here, including autism and intellectual disability, deafness, blindness, mobility impairment often coupled with bodily difference, and cognitive and intellectual impairments. Amid this diversity of time, place, style, medium, and topic, the chapters share two core commitments. First, they are united in their theoretical and methodological connection to Disability Studies, especially its central idea that disability is a social and cultural construction. Disability both shapes and is shaped by culture, including musical culture. Second, these essays individually and collectively make the case that disability is not something at the periphery of culture and music, but something

central to our art and to our humanity.
