**Classical Music Top 40** Anthony Rudel,1995-03-01 The quintessential primer for the budding classical music lover. Millions of people adore classical music. Millions of other people want to, but simply don't know how or where to start—so many composers, so many pieces, so many versions, so much music! In either case, this book is for you. In this informal and informative guide, Rudel leads listeners through the forty most essential and popular compositions from the Four Seasons to Rhapsody in Blue, explaining the musical structure of each passage and highlighting special themes or elements to listen for as the music continues. By the time you're through with his guidance, the music is no longer just a jumbled mass of sound, but instead a stunning piece of music that's as understandable and enjoyable as any rock 'n' roll song.

**Classical Music Radio in the United Kingdom, 1945-1995** Tony Stoller,2017-11-11 This book is the first comprehensive account of classical music on all British radio stations, BBC and commercial, between 1945 and 1995. It narrates the shifting development of those services, from before the launch of the Third Programme until after the start of Classic FM, examining the output from both qualitative and quantitative perspectives, as well as recounting some of the stories and anecdotes which enliven the tale. During these fifty years, British classical music radio featured spells of broad, multi-channel classical music radio, with aspirational and mainstream culture enjoying positive interactions, followed by periods of more restricted and exclusive output, in a paradigm of the place of high culture in UK society as a whole. The history was characterised by the recurring tensions between elite and popular provision, and the interplay of demands for highbrow and middlebrow output, and also sheds new light on the continuing relevance of class in Britain. It is an important and unique resource for those studying British history in the second half of the twentieth century, as well as being a compelling and diverting account for enthusiasts for classical music radio.

**American Babel** Clifford J. Doerksen,2011-06-07 When American radio broadcasting began in the early 1920s there was a consensus among middle-class opinion makers that the airwaves must never be used for advertising. Even the national advertising industry agreed that the miraculous new medium was destined for higher cultural purposes. And yet, within a decade American broadcasting had become commercialized and has remained so ever since. Much recent scholarship treats this unsought commercialization as a coup, imposed from above by mercenary corporations indifferent to higher public ideals. Such research has focused primarily on metropolitan stations operated by the likes of AT&T, Westinghouse, and General Electric. In American Babel, Clifford J. Doerksen provides a colorful alternative social history centered on an overlooked class of pioneer broadcaster—the independent radio stations. Doerksen reveals that these little stations often commanded large and loyal working-class audiences who did not share the middle-class aversion to broadcast advertising. In urban settings, the independent stations broadcast jazz and burlesque entertainment and plugged popular songs for Tin Pan Alley publishers. In the countryside, independent stations known as farmer stations broadcast hillbilly music and old-time religion. All were unabashed in their promotional practices and paved the way toward commercialization with their innovations in programming, on-air style, advertising methods, and direct appeal to target audiences. Corporate broadcasters, who aspired to cultural gentility, were initially hostile to the populist style of the independents but ultimately followed suit in the 1930s. Drawing on a rich array of archives and contemporary print sources, each chapter of American

Babel looks at a particular station and the personalities behind the microphone. Doerksen presents this group of independents as an intensely colorful, perpetually interesting lot and weaves their stories into an expansive social and cultural narrative to explain more fully the rise of the commercial network system of the 1930s.

Music and the Broadcast Experience Christina Baade,James A. Deaville,2016-08-02 Music and the Broadcast Experience explores the complex ways in which music and broadcasting have developed together throughout the twentieth and into the twenty-first centuries. It brings into dialogue researchers working in media and music studies; explores and develops crucial points of contact between studies of music in radio and music in television; and investigates the limits, persistence, and extensions of music broadcasting in the Internet era. The book presents a series of case studies that address key moments and concerns in music broadcasting, past and present, written by leading scholars in the field, who hail from both media and music studies. Unified by attentiveness both to musical sound and meaning and to broadcasting structures, practices, audiences, and discourses, the chapters in this collection address the following topics: the role of live orchestral concerts and opera in the early development of radio and their relation to ideologies of musical uplift; the relation between production culture, music, and television genre; the function of music in sponsored radio during the 1930s; the fortunes of musical celebrity and artistic ambition on television; questions of music format and political economy in the development of online radio; and the negotiation of space, community, and participation among audiences, online and offline, in the early twenty-first century. The collection's ultimate aim is to explore the usefulness and limitations of broadcasting as a concept for understanding music and its cultural role, both historically and today.
