**The Forms of Music** Donald Francis Tovey, 2008-11 Donald Francis Tovey Born in 1875, Donald Francis Tovey was a British musicologist and composer. He took classical honors with his B. A. at Oxford in 1898, and became a pianist of the first rank, though he never sought a virtuoso career. From 1914 to 1940 he was Reid Professor of Music at Edinburgh University. He died in 1940. His other books include *Normality and Freedom in Music*, *The Main Stream of Music*, *A Musician Talks*, *Essays in Musical Analysis*, and *Beethoven*. ix Meridian Books edition first published October 1956 First printing September 1956 Second printing June 1957 Third printing July 1958 Fourth printing April 1959 Fifth printing December 1959 Reprinted by arrangement with Oxford University Press Originally published 1944 as *Musical Articles* from the *Encyclopaedia Britannica* Library of Congress catalog card number 56-10015 Manufactured in the United States of America EDITORIAL PREFACE THE desire to set down upon paper a comprehensive system of musical education was present in the mind of Donald Tovey for the greater part of his life. In 1896, when he was 21, he wrote in a letter to a friend that he had begun a great work quot on the means of Expression in Music quot If ever I finish the thing, into print it shall go. Thirty years later, he was talking about a series of four text-books on music. But into print neither the one scheme nor the other went the final expression of his ideas on music was never written. It never could be written, because it was never final in the mind of that incessant discoverer in music. Nor was his method of writing that of finality. The nearest point to finality which Tovey ever reached in his expression of a formal philosophy in music is to be found in the articles on technique and aesthetics of music as he called them himself in the list of his writings supplied to Who's Who which he contributed to the *Encyclopaedia Britannica*. Those articles, written from 1906 onwards for the eleventh edition of the *Encyclopaedia*, and revised again, almost rewritten, for the fourteenth edition in 1929, were necessarily cast in the imposed form of treatises under word-headings. Yet they coalesce very firmly into a clear and coherent testament, almost into a text-book of the art of music in its widest meaning. Like the Glossary to the *Essays in Musical Analysis*, the entries are unconnected, the whole comprehensive, and while not attempting completeness, afford the reader a wider range of musical thought and a fuller discussion of technical problems than most of the exhaustive and laborious theses now available. Tovey himself set great store by these articles. They formed for him the basis of his teaching at the University of Edinburgh. They are the background to those fuller considerations of musical compositions which are his *Essays in Musical Analysis*. It was his own proposal

that these articles should be gathered together into one volume, an idea expressed to me as long ago as 1926. Means were then taken towards the end of publishing, and it was agreed that Tovey should in his own time make any alterations or corrections necessary for the new method of presentation. But many other fresh and no doubt more important ideas and schemes came bubbling up into that wonderfully fertile brain, and nothing was done about the book of musical articles. I say more important because, though he was in life so fully occupied, it has now been found possible to publish these articles after the author's death. This book contains all the articles which Tovey wrote for the VI EDITORIAL PREFACE Encyclopaedia Britannica, as they now appear there, with the exception of one on Modern Music and the biographies. The book was set up from printed slips, and thus follows the text finally approved and corrected by the author. The very long musical examples are printed in full...

What to Listen For in Music Aaron Copland, 2011-02-01 Now in trade paperback: "The definitive guide to musical enjoyment" (Forum). **The Heart of a Woman** Rae Linda Brown, 2020-06-22 Book Prize Winner of the International Alliance for Women in

Music of the 2022 Pauline Alderman Awards for Outstanding Scholarship on Women in Music *The Heart of a Woman* offers the first-ever biography of Florence B. Price, a composer whose career spanned both the Harlem and Chicago Renaissances, and the first African American woman to gain national recognition for her works. Price's twenty-five years in Chicago formed the core of a working life that saw her create three hundred works in diverse genres, including symphonies and orchestral suites, art songs, vocal and choral music, and arrangements of spirituals. Through interviews and a wealth of material from public and private archives, Rae Linda Brown illuminates Price's major works while exploring the considerable depth of her achievement. Brown also traces the life of the extremely private individual from her childhood in Little Rock through her time at the New England Conservatory, her extensive teaching, and her struggles with racism, poverty, and professional jealousies. In addition, Brown provides musicians and scholars with dozens of musical examples.

**The History of Classical Music For Beginners** R. Ryan Endris, 2014-10-07 Music history is nearly as old as human civilization itself, and while it has permeated the arts and popular culture for centuries, it still has this mystifying aura surrounding it. But fear not—it's not as complicated as it seems, and anyone can learn the origins and history of Western art music. In addition to learning how better to understand (and enjoy!) classical music, *The History of Classical Music For Beginners* will help you will learn of some of the more interesting and sometimes comical stories behind the music and composers. Did you know that Jean-Baptiste Lully actually died from conducting one of his own compositions? You may have heard of Gregorian chant, but did you know there are many forms of chant, including Ambrosian and Byzantine chant? And did you also know that only a small portion of "classical music" is even technically Classical? These interesting, insightful facts and more are yours to discover in *The History of Classical Music For Beginners*.

*The Dictionary of Hindustani Classical Music* Vimalakānta Rôya Caudhuri, 2000 In this book the author has dealt with the musical terms as found in the old sastras and are also in common use. He has explained these terms in simple language with reference to their history of origin. Description of seventy-eight different musical instruments and forty-seven different Talas are also there. An essential aid to research-scholars and students of music. The Bengali version of the book *Bharatiya Sangeetkosh* earned for him Sangeet Natak Academy award as the best book on music published during the period from 1960 to 1968. Bimalakanta Roychaudhuri was born in 1909 in an illustrious family of musical heritage. He had his training in music from Sitalchandra Mukhopadhyay, Sitalkrishna Ghosh, Amir Khan (Sarod) and then from Inayet Khan, the foremost Sitar players of those days. He also had his musical training from his maternal uncle Birendrakishore Roychaudhuri and maternal grandfather Brojendrakishore Roychaudhuri. He took part in the translation of *Sangeet Ratnakara* from Sanskrit to Bengali under the patronage of Brojendrakishore Roychaudhuri. He was Chairman of the Board of Musical Studies of the University of Calcutta. His work *Raga Vyakarana* (in Hindi) has been published by the *Bharatiya Jnanpith*.

*Translating For Singing* Ronnie Apter,Mark Herman,2016-05-19 Translating for Singing discusses the art and craft of translating singable lyrics, a topic of interest in a wide range of fields, including translation, music, creative writing, cultural studies, performance studies, and semiotics. Previously, such translation has most often been discussed by music critics, many of whom had neither training nor experience in this area. Written by two internationally-known translators, the book focusses mainly on practical techniques for creating translations meant to be sung to pre-existing music, with suggested solutions to such linguistic problems as those associated with rhythm, syllable count, vocal burden, rhyme, repetition and sound. Translation theory and translations of lyrics for other purposes, such as surtitles, are also covered. The book can serve as a primary text in courses on translating lyrics and as a reference and supplementary text for other courses and for professionals in the fields mentioned. Beyond academia, the book is of interest to professional translators and to librettists, singers, conductors, stage directors, and audience members.

The Great Woman Singer Licia Fiol-Matta,2017-01-13 Licia Fiol-Matta traces the careers of four iconic Puerto Rican singers—Myrta Silva, Ruth Fernández, Ernestina Reyes, and Lucecita Benítez—to explore how their voices and performance style transform the possibilities for comprehending the figure of the woman singer. Fiol-Matta shows how these musicians, despite seemingly intractable demands to represent gender norms, exercised their artistic and political agency by challenging expectations of how they should look, sound, and act. Fiol-Matta also breaks with conceptualizations of the female pop voice as spontaneous and intuitive, interrogating the notion of the great woman singer to deploy her concept of the thinking voice—an event of music, voice, and listening that rewrites dominant narratives. Anchored in the work of Lacan, Foucault, and others, Fiol-Matta's theorization of voice and gender in *The Great Woman Singer* makes accessible the singing voice's conceptual dimensions while revealing a dynamic archive of Puerto Rican and Latin American popular music.

A History of Singing John Potter,Neil Sorrell,2014-02-13 Why do we sing and what first drove early humans to sing? How might they have sung and how might those styles have survived to the present day? This history addresses these questions and many more, examining singing as a historical and cross-cultural phenomenon. It explores the evolution of singing in a global context - from Neanderthal Man to Auto-tune via the infinite varieties of world music from Orient to Occident, classical music from medieval music to the avant-garde and popular music from vaudeville to rock and beyond. Considering singing as a universal human activity, the book provides an in-depth perspective on singing from many cultures and periods: western and non-western, prehistoric to present. Written in a lively and entertaining style, the history contains a comprehensive reference section for those who wish to explore the topic further and will appeal to an international readership of singers, students and scholars.
