UNIX and Shell Programming Behrouz A. Forouzan,Richard F. Gilberg,2003 Designed as one of the first true textbooks on how to use the UNIX operating system and suitable for a wide variety of UNIX-based courses, UNIX and Shell Programming goes beyond providing a reference of commands to offer a guide to basic commands and shell programming. Forouzan/Gilberg begin by introducing students to basic commands and tools of the powerful UNIX operating system. The authors then present simple scriptwriting concepts, and cover all material required for understanding shells (e.g., Regular Expressions, grep, sed, and awk) before introducing material on the Korn, C, and Bourne shells. Throughout, in-text learning aids encourage active learning and rich visuals support concept presentation. For example, sessions use color so students can easily distinguish user input from computer output. In addition, illustrative figures help student visualize what the command is doing. Each chapter concludes with problems, including lab sessions where students work on the computer and complete sessions step-by-step. This approach has proven to be successful when teaching this material in the classroom.
Business Torts Morton F. Daller,2012-12-20 There is a great wealth of diversity in the business tort laws of all fifty states and the District of Columbia. In addition to the very significant differences in the statutes of limitation, other significant differences include: Some states have not recognized a cause of action for negligent interference with an economic advantage. Negligent misrepresentation in one state is limited to claims against persons in the business of supplying information to others. One state recognizes a cause of action for strict responsibility misrepresentation. Another state recognizes claims of prima facie tort for wrongs that do not fit into traditional tort categories. And these are only a few examples of the more significant differences. The new 2013 Edition of Business Torts: A Fifty-State Guide helps you quickly assess the merits and pitfalls of litigation in any given jurisdiction allowing you to make the best decisions for your clients.
