Long-term Care for the Elderly in Florida United States.

Congress. Senate. Committee on Labor and Human Resources.
Subcommittee on Investigations and General Oversight,1982

Long-term Care and the Law George D. Pozgar,1992 This valuable handbook covers all facets of the legal environment of long-term care administration in a clear, non-technical fashion.

Long Term Care in Florida J. V. Lambert,2004 Florida has the largest proportion of elderly in the nation- 2.8 million persons are over age 65, representing 17.6% of its total population. The dramatic rise in the number of persons age 65 and over in Florida over the next 20 years-estimated to total 26.3% of total population- will further stretch the already limited resources of the state. Aware of the pressing demand for long-term care services well into the 21st century, policymakers in Florida have begun seriously to review options for improving financing and delivery of long-term care for the frail elderly and persons with disabilities. Federal and state Medicaid spending in Florida was \$2.6 billion in FY2001, and 30.5% of Medicaid spending was for long-term care. In FY2001, 75.3% of total Medicaid spending was for institutional care. Slightly less than 25% of Medicaid spending was channeled towards home

and community-based services. Although institutional care dominated Medicaid spending, there has been slow but steady expansion of home and community-based services funding, both through the use of Medicaid's waiver programs as well as significant support through state sources. Among the major issues facing long-term care in Florida are: the fragmentation of long-term care services among state and local agencies, an imbalance in financing that favors institutional care rather than home and community based care, shortage of health care workers and well-trained staff throughout the long-term care , and disparities in availability of services across the state.

Long-term Care Advocacy Eric M. Carlson, 1999 Providing everything an attorney needs to advise elderly clients and their families about nursing, residential, and continuing care facilities, this text offers a practical approach to issues such as selecting the best type of facility, admissions policies and agreements.

Long-Term Care in Transition David Barton Smith, 2000-09-30 Long-Term Care in Transition is a carefully documented case study of the changes that took place in the regulation of nursing homes in New York between 1975 and 1980. It covers the history of the regulatory offensive in New York and strategies of control and their

effectiveness, touching on such subjects as professional standards, rate-setting, reimbursement, criminal prosecution and consumers. Invaluable reading for health care professionals involved in the management of nursing homes, it concludes with some of the lessons learned from this experience for the health sector as a whole. While regulations have changed since 1980, David B. Smith has written a new preface, which puts the study in perspective. Book jacket.

Effective Management of Long-term Care Facilities Douglas A. Singh, 2005 This outstanding new text provides a clear understanding of how the ideal long-term care facility should operate, and how prospective as well as currently employed nursing home administrators can hone their skills to deliver quality services cost-effectively.

Oklahoma Legal Guide to Long-Term Care Catheryn Koss, Senior Law Resource Center, 2013-06-12 The Oklahoma Legal Guide To Long-Term Care answers important legal questions about long-term care, including:- What is long-term care?- How can I get the care I need at home?- What are my rights?- Can I qualify for financial assistance?- How do I find a facility that is right for me?- What does all this paperwork mean?- How can I ensure the

highest quality of care?- What can I do to plan for the future?In a straightforward, easy-to-understand way, the Oklahoma Legal Guide To Long-Term Care answers these and other questions to help seniors, caregivers, and professionals choose a provider, find ways to pay for needed care, and make sure individuals receive all the services to which they are entitled.

Strengthening Forensic Science in the United States National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Policy and Global Affairs,Committee on Science, Technology, and Law,Committee on Identifying the Needs of the Forensic Sciences Community,2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that

change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Estimating the Costs of Financial Regulation Mr. Andre Santos, Douglas Elliott, 2012-09-11 Staff Discussion Notes showcase the latest policy-related analysis and research being developed by individual IMF staff and are published to elicit comment and to further debate. These papers are generally brief and written in nontechnical language, and so are aimed at a broad audience interested in economic policy issues. This Web-only series replaced Staff Position Notes in January 2011.

Compensation for Wrongful Convictions Wojciech Jasiński, Karolina Kremens, 2023-03-14 This book presents a comprehensive comparative analysis of the substantive and procedural aspects of compensation for wrongful convictions in European countries and the USA, as well as the standard derived from the case law of the European Court of Human Rights. The collection draws comparative conclusions as to the similarities and differences between selected jurisdictions and assesses the

effectiveness of the national compensation schemes. This enables the designing of an optimum model of compensation, offering accessibility and effectiveness to the victims of miscarriages of justice and being acceptable to jurisdictions based on common law, and civil law traditions, as well as inquisitorial and adversarial types of criminal process. Moreover, the discussion of the minimum European standard as established in the case law of the European Court of Human Rights enables readers to identify how the Strasbourg Court can contribute to strengthening the compensation scheme. The book will be essential reading for students, academics and policymakers working in the areas of criminal law and procedure.

2011 National Gang Threat Assessment Federal Bureau of Investigation, 2012-01-01 Gangs continue to commit criminal activity, recruit new members in urban, suburban, and rural regions across the United States, and develop criminal associations that expand their influence over criminal enterprises, particularly street-level drug sales. The most notable trends for 2011 have been the overall increase in gang membership, and the expansion of criminal street gangs' control of street-level drug sales and collaboration with rival gangs and other criminal organizations.

United States Code United States,2012

Revoked Allison Frankel,2020 [The report] finds that supervision -- probation and parole -- drives high numbers of people, disproportionately those who are Black and brown, right back to jail or prison, while in large part failing to help them get needed services and resources. In states examined in the report, people are often incarcerated for violating the rules of their supervision or for low-level crimes, and receive disproportionate punishment following proceedings that fail to adequately protect their fair trial rights.--Publisher website.
