Back to the Moon Homer Hickam,2000-04-11 The shuttle is hijacked. Now the countdown to adventure begins.... In his #1 New York Times bestselling memoir, *October Sky*, real-life NASA engineer Homer Hickam captured the excitement of America's first space ventures. Now, in this no-holds-barred joyride of a thriller, he straps us into the cockpit of the space shuttle Columbia as a renegade rocket man hijacks the shuttle—and blasts off on a Mach-speed chase into space.... Jack Medaris is a man haunted by his past and driven by a dream: He's risking everything to borrow the Columbia—and pilot it to the moon. He didn't plan on an unexpected passenger, beautiful celebrity daredevil and scientist Penny High Eagle. To Penny, this hijacking will test every bit of her mettle as an adventurer—and as a woman. To Jack, the mission is a personal quest—to return to the moon and bring back what America left behind, something so explosive, it could change the future of the world. Now, as the U.S. government scrambles to the chase, and as deadly forces are deployed from earth to stop them, a man and a woman find their fates inextricably entwined. And in the savage emptiness of deep space, their only hope is to join forces to reach the lunar surface. Then comes the hard part. Getting home alive.

People of the Moon W. Michael Gear,Kathleen O'Neal Gear,2006-10-31 The moon had reached its maximum three times since the Chacoans conquered the First Moon People. The Chaco matrons had built their Great House high atop First Moon Mountain, and their warriors stalked arrogantly through the villages, taking what they pleased. But the gods can only stand so much human arrogance. Cold Bringing Woman, the goddess of winter, calls upon young Ripple to embark on a perilous quest to destroy the hated Chacoans. But Ripple will not face the task alone; he is aided by his stalwart friends: Wrapped Wrist, a short lothario; Spots, scarred at birth, and aide to the frightening witch, Nightshade; and Bad Cast, a simple family man, who will do anything to free his people. But the blessed matrons will brook no insurgency. In retaliation, war chief Leather Hand and his warriors embark on a campaign of terror so gruesome it remains unrivaled in the annals of prehistory. It all comes to a climax atop the mountain we

now know as Chimney Rock. In the white light of the lunar maximum, the Pueblo gods will dance—and an empire will be engulfed in flames and mayhem. From New York Times and USA Today bestselling authors W. Michael Gear and Kathleen O'Neal Gear, *People of the Moon* is a story of North America's Forgotten Past—the battles fought, the heroes made, and the cultures that thrived in America's prehistory. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**The Soils of Aotearoa New Zealand** Allan E. Hewitt, Megan R. Balks, David J. Lowe, 2021-02-19 This book offers an introduction to the soils of Aotearoa New Zealand, structured according to the New Zealand soil classification system. Starting with an overview of the importance and distribution of New Zealand soils, it subsequently provides essential information on each of the 15 New Zealand soil orders in separate chapters. Each chapter, illustrated with diagrams and photographs in colour, includes a summary of the main features of the soils in the order, their genesis and relationships with landscapes, their key properties including examples of physical and chemical characteristics, and their classification, use, and management. The book then features a chapter on soils in the Ross Sea region of Antarctica and concludes by considering New Zealand soils in a global context, soil-formation pathways, and methods used in New Zealand to evaluate soils and assist in land-management decisions. Information about how to access detailed information via links to the Manaaki Whenua Landcare Research website is also included.

**Ceramics and the Museum** Laura Breen, 2019-08-22 *Ceramics and the Museum* interrogates the relationship between art-oriented ceramic practice and museum practice in Britain since 1970. Laura Breen examines the identity of ceramics as an art form, drawing on examples of work by artist-makers such as Edmund de Waal and Grayson Perry; addresses the impact of policy making on ceramic practice; traces the shift from object to project in ceramic practice and in the evolution of ceramic sculpture; explores how museums facilitated multisensory engagement with ceramic material and process, and analyses the exhibition as a text in itself. Proposing the notion that 'gestures of showing,' such as exhibitions and installation art, can be read as statements, she examines what they tell us about the identity of ceramics at particular moments in time. Highlighting

the ways in which these gestures have constructed ceramics as a category of artistic practice, Breen argues that they reveal gaps between narrative and practice, which in turn can be used to deconstruct the art.

**A City on Mars** Kelly Weinersmith,Zach Weinersmith,2023-11-07 \* THE INSTANT NEW YORK TIMES BESTSELLER \* Scientific American's #1 Book for 2023 \* A New York Times Book Review Editors' Choice \* A Times Best Science and Environment Book of 2023 \* A Tor.com Best Book of 2023 \* "Exceptional. . . Forceful, engaging and funny . . . This book will make you happy to live on this planet — a good thing, because you're not leaving anytime soon." —New York Times Book Review From the bestselling authors of *Soonish*, a brilliant and hilarious off-world investigation into space settlement Earth is not well. The promise of starting life anew somewhere far, far away—no climate change, no war, no Twitter—beckons, and settling the stars finally seems within our grasp. Or is it? Critically acclaimed, bestselling authors Kelly and Zach Weinersmith set out to write the essential guide to a glorious future of space settlements, but after years of research, they aren't so sure it's a good idea. Space technologies and space business are progressing fast, but we lack the knowledge needed to have space kids, build space farms, and create space nations in a way that doesn't spark conflict back home. In a world hurtling toward human expansion into space, *A City on Mars* investigates whether the dream of new worlds won't create nightmares, both for settlers and the people they leave behind. In the process, the Weinersmiths answer every question about space you've ever wondered about, and many you've never considered: Can you make babies in space? Should corporations govern space settlements? What about space war? Are we headed for a housing crisis on the Moon's Peaks of Eternal Light—and what happens if you're left in the Craters of Eternal Darkness? Why do astronauts love taco sauce? Speaking of meals, what's the legal status of space cannibalism? With deep expertise, a winning sense of humor, and art from the beloved creator of *Saturday Morning Breakfast Cereal*, the Weinersmiths investigate perhaps the biggest questions humanity will ever ask itself—whether and how to become multiplanetary. Get in, we're going to Mars.
