Gunfitting Don Currie, 2021-12-01 Expert shooting coach, teacher, and competitor Don Currie delivers a solid book on gunfitting based on a lifetime of experience gained from working with Orvis and Purdey. Don knows that shooting with a properly fitted shotgun is critical to a shooter's success, and he delivers on the art and science of fitting proper shotguns. The science requires the gunfitter to understand the structure of the shooter's body and what stock specifications are needed to accommodate the shooter's physique. To master the art of the process, the fitter must understand how shooters shoot and how the eye and brain see and read the target. The fitter must critically evaluate the shooter's stance, mount, and level of experience along with taking into consideration the shooter's discipline and style and how the shooter will develop and evolve.

Shooting Clay Targets: A Beginners Guide Sam D. Graham, 2018-12-07 This is a comprehensive coverage of clay target shooting. It is for beginners as well as intermediate shooters but includes reviews of techniques and concepts that would be helpful to the more advanced shooter. The format is concise and it is well illustrated. The keys to success are the fundamentals including a consistent/reproducible strong stance and gun mount, knowing where and how you want to visualize and eventually break the target, and the preparation and follow through in the actual target acquisition. The book also covers strategy and various target presentations in skeet, trap and sporting clays. In addition, there are recommended practice drills and appendices covering terminology, how a shotgun firing mechanism works and the rules. The authors include 2 level 3 NSCCA instructors and reflect personal observations of decades of experience. The format is designed to bring out the concepts both by illustrations as well as concise text to make the reader a more consistent and successful shooter.
