Gunfitting Don Currie, 2021-12-01 Expert shooting coach, teacher, and competitor Don Currie delivers a solid book on gunfitting based on a lifetime of experience gained from working with Orvis and Purdey. Don knows that

shooting with a properly fitted shotgun is critical to a shooter's success, and he delivers on the art and science of fitting proper shotguns. The science requires the gunfitter to understand the structure of the shooter's body and what stock specifications are needed to accommodate the shooter's physique. To master the art of the process, the fitter must understand how shooters shoot and how the eye and brain see and read the target. The fitter must critically evaluate the shooter's stance, mount, and level of experience along with taking into consideration the shooter's discipline and style and how the shooter will develop and evolve.

Successful Shotgunning Peter F.

Blakeley, 2003-08-01 • A solid guide for becoming a better shot • Wing shooting, sporting clays, skeet shooting • Expert teacher and coach shares years of experience
Successful Shotgunning focuses on wing-shooting and

sporting clays techniques. Gain a better understanding of the shooting process as a whole as you sharpen your skills and become a better shot. How to evaluate moving targets in wing-shooting situations in the field, in a competitive environment, on a sporting clays course, or on a skeet field. Choose the correct gun and gun fit for you; learn to diagnose some common eye problems and correct your aim; tame recoil; and deal with the challenges of various sporting clays targets. Quote from the book: Successful shotgunning isn't an inherent trait, it is a skill and it must be learned like any other skill. It requires systematic study and the ability to accurately calculate the variables of moving targets. My coaching methods involve an intuitive technique that is based on pure logic and a systematic breakdown of all the variables involved. This is how the experts shoot. Over a period of time they build up a personal mental repertoire of sight pictures, which they can then successfully apply to each target, regardless of whether it is a quail, dove, duck or clay target. They then have the ability to see a subtle but consequential target/barrel relationship on every shot and adjust to each different shooting situation.

Trap Shooting Secrets James Russell, 1997 With over 132 practice tips and more than 100 illustrations, reading this guide is like having a personal shooting coach. This huge technical book teaches techniques of professional trap shooting; singles, handicap and double trap.

Shotgunning Bob Brister, 2014-08-05 The classic shotgun reference from one of the top experts in the field. In this near-legendary handbook, respected firearms expert Bob Brister offers advice, instructions, and solutions to every situation a shotgunner might face, making Shotgunning a guide from which both seasoned veterans and novice shooters will benefit. Based on years of tests,

meticulous study of data, and a lifetime of insider expertise, this book will help any shooter make every shot count. A veritable encyclopedia of the shotgun for the modern shooter and outdoorsman, *Shotgunning* details the selection of guns, loads, and chokes; required leads (translated into “bird lengths” for easier shooting recognition); shot velocity and penetration; the effects of recoil on the shooter; wind and temperature effects on shotshells; and much more. Data analysis puts blithely held truths to the test. Myths are debunked, and Brister’s conclusions are supported with hundreds of photographs, lending *Shotgunning* an authority that many recent, worthwhile books on the subject cannot claim. Brister brightly and boldly presents his readers with the science of shotgunning, but he never forgets the art that makes shooting a sport. *Shotgunning* is an elegant and educational mélange—a unique and invaluable guidebook that any shotgunner must own. Skill Sets - Practicing for Sporting Clays Chris

Parsons,2020-06-16 Master Class! Congratulations. After much work and a lot of winning in the lower classes of the NSCA competition world, you finally won the last punch you needed to move to Master Class! A great feeling and a great accomplishment! You always knew you were this good! The next sporting clays competition arrives, and you register as MASTER! A proud moment! You go out to the competition course and shoot your game. You have a solid day and put up a solid score, not your best performance but a good score. You wait around after the competition for the final results to be posted. The scores come out and you begin looking for your name at the top of Master Class, because hey, that is where your name has been for months! The top of the class! You look at the top of Master Class and don't see your name. You tell yourself, "That's Ok. Can't expect to win the first time in Master Class." You begin scrolling down the list of names in Master Class expecting to see your name at any moment. You keep scrolling. A quarter of the way down now, and your name still hasn't shown up. You keep scrolling. Halfway down now and geez, there are a lot of names here. You keep scrolling. Getting close to the bottom now. You keep scrolling and there you are, about three quarters of the way down. You finish about fifty out of sixty-five. You are shocked. This can't be right. You check your score. Yes, that is the correct score and then, you start scanning the scores above you. You sigh in disappointment. Six competitions later, your scores bottom out. You are nearly last in Master Class. It was only a few competitions ago that you were good and winning your class. The sport was fun! Now in Master Class, you can't even finish in the top half of the class. You get frustrated. You begin thinking about quitting the sport. You are lost at what to do. So many new Master Class competitors have found themselves in this very scenario. You just made

Master Class and want so much to continue winning like you did in the lower classes, but Master Class is different than the other classes. The Professionals who compete for the National Championship every year are in Master Class. The Regional and State “Big Fish” who compete and win the Regional and State Championships every year are in Master Class. The former “Big Fish” who used to win all the time are in Master Class. All of these competitors have competed for over a decade. You realize if you are going to compete and win in Master Class, you need to get better. You realize you need to expand your game and improve your skills. You need a skill set. This book is written to help you create a skill set that will make you competitive in Master Class and the lower classes as well. The material in Skill Sets: Practicing for Sporting Clays will discuss the three major skill sets you need to compete and win in sporting clays. It will discuss the technical game, the mental game and the most important and least discussed skill set...execution. I have been competing in sporting clays over fifteen years and have experienced the highs and lows in the sport. The highs include a couple tours on the PSCA circuit, multiple State Championships, a 100 straight in competition and an All American Team to my credits. I have seen the lows as well finishing third from the bottom of Master Class. I have made many mistakes on my climb up the sporting clays mountain. I address many of my mistakes in this book to help you avoid them. This book was written from my vast experience to help you build a skill set to improve your game. Then once you have created this skill set, the book discusses how to practice these skill sets and make it better. Because once you have a skill set, you have to learn how to apply it. If you take the three fundamental skill sets in this book and apply it to your game, you will see your scores improve and the fun return to the sport you love and

have worked so hard to master.
