**Awakening Democracy through Public Work** Harry C.

Boyte,2018-11-15 In the face of authoritarian, divisive trends and multiplying crises, when politics-as-usual is stymied, Awakening Democracy through Public Work shows it is possible to build foundations for a democratic awakening grounded in deep American traditions of a citizen-centered commonwealth.

Awakening Democracy through Public Work begins with the story of Public Achievement, a youth civic education and empowerment initiative with roots in the civil rights movement. It describes Public Achievement's first home in St. Bernard's, a low-income Catholic elementary school in St. Paul, Minnesota, and how the program spread across the country and then abroad, giving birth to the larger concept of public work. In Public Achievement, young people practice citizen politics as they tackle issues ranging from bullying, racism, and sexual harassment to playground improvements, curriculum changes, and better school lunches. They develop everyday political skills for working across differences and making constructive change. Such citizen politics, more like jazz than a set piece of music, involves the interplay and negotiation of diverse interests and views, sometimes contentious, sometimes harmonious. Public Achievement highlights young people's roles as co-creators—builders of schools, communities, and democratic society. They are not citizens in waiting, but active citizens who do public work. Awakening Democracy through Public Work also describes how public work can find expression in many kinds of work, from education and health to business and government. It is relevant across the sweep of society. People have experimented with the idea of public work in hundreds of settings in thirty countries, from Northern Ireland and Poland to Ghana and Japan. In Burundi it birthed a national initiative to rework relations between villagers and police. In South Africa it helped people in poor communities to see themselves as problem solvers rather than simply consumers of government services. In the US, at Denison University, public work is being integrated into dorm life. At Maxfield School in St. Paul, it is transforming special education. In rural Missouri, it led to the emPowerU initiative of the Heartland Foundation, encouraging thousands of young people to stay in the region. In Eau Claire, Wisconsin, it generated Clear Vision, a program providing government support for citizen-led community improvements. Public work has expanded into the idea

of citizen professionals working with other citizens, not on them or for them. It has also generated the idea of civic science, in which scientists see themselves as citizens and science as a resource for civic empowerment. Awakening Democracy through Public Work shows that we can free the productive powers of people to work across lines and differences to build a better society and create grounded hope for the future.

Reflections on Identity Neil Hopkins,Carol

Thompson,2024-01-13 This book seeks to extend perspectives on professional identity in education. Chapters consider the notion of expertise, the impact of managerial approaches, the importance of communities of practice, and the effects of increasingly marketised approaches. By using narratives, the book opens up a 'conversation' about this important topic. Educators and leaders from a variety of settings will explore their professional experiences and the impact these have had on forming values in the professional role. By drawing on personal experience, individual authors will consider some of the challenges they have encountered as part of identity formation. The significance of organisational cultures is discussed throughout the book and explores the ways in which individual autonomy is both threatened and claimed. Issues discussed include the frequent changes imposed through government initiatives and the social perception

of education professionals when compared to other professional roles. Contributions have been drawn from teachers and leaders in schools, colleges, universities and specialist training. Chapter authors have a variety of experiences offering a multi-perspective approach. This will include strategic leadership, operational management and classroom practice, all of which offer insights of interest to educators at various points on the professional journey. The narrative approach adopted by authors provides the opportunity for readers to engage with others' experiences, enabling personal reflection on their own professional identity.
