Dog Smart Linda P. Case, 2018-02-10 Anyone who lives with and loves dogs knows that they are smart. Really smart. They understand our body language and emotions, can be trained to perform important services, are devoted companions, and enjoy walks, tricks, dog sports or just hangin' out on the couch. So, how Dog Smart are you? What do you know or wish to know about the dog's history, perceptions, understanding of humans, and responses to different training methods? These topics and more come under the scrutiny of the Science Dog in Linda Case's latest myth-busting book. Learn to separate fact from fiction about the relationship between dogs and wolves, whether dominance should

be a factor in dog training, what forms of reinforcement work best, and how to apply evidence-based training methods. Dog Smart will not only help you to be a better trainer, but will give you the tools for communicating the most current information about dogs to others - including the popular Science Dog character, neighbor Joe (who happens to know a lot about dogs).

Dog Zen Mark Vette, 2017-09-18 World-renowned dog behaviourist and psychologist Mark Vette (of Driving Dogs and Flying Dogs fame) shows you how to transform your dog and create a harmonious life-long bond. This book looks at how the dog evolved from the wolf, and the ancient co-evolved bond that exists between humans and dogs, before explaining how to get your dog into a fundamental calm 'learning state' so you can encourage the behaviours you want from your pet. Mark then explains how to train your new puppy, and if you have an older dog that wasn't trained properly at that crucial early stage, how to correct each of the top ten behavioural problems that occur. Drawing from Mark's own life and experiences there are case studies throughout with beautiful photographs of these amazing animals. The top ten problems are: 1. Hyperactivity 2. Phobias 3. Excessive submission 4. Dog-to-dog aggression 5. Dog-to-human aggression 6. Barking 7. Separation

distress 8. House training 9. Destructive behaviours 10. Recall This book is absolutely packed with information. It is a comprehensive practical guide combining the latest cognitive science with modern, loving, training techniques.

The Canine Thyroid Epidemic W Jean Dodds, Diana Laverdure, 2011-03 Problems with your dog? It may be his thyroid! If your dog is lethargic, losing his hair, gaining weight or suddenly becomes aggressive, perhaps the last thing you (or your vet!) would think about is his thyroid. Unfortunately, however, thyroid disorders can cause literally dozens of health and behavioral problems in dogs and frequently go undiagnosed or are misdiagnosed. And the real tragedy is that most thyroid problems are treatable with the right medical care and a well-informed owner can often minimize the chance of a thyroid disorder occurring in the first place. Noted veterinarian Jean Dodds and co-author Diana Laverdure have done the dog owning public and their vets a great service by writing *The Canine Thyroid Epidemic*. The book is written in such a way to inform both the average dog owner and animal health care professionals about the ways in which thyroid disorders occur, can be prevented and treated.

Cat Sense John Bradshaw, 2013-09-10 Cats have been popular household pets for thousands of years, and their numbers only continue to rise. Today there are three cats for every dog on the planet, and yet cats remain more mysterious, even to their most

adoring owners. Unlike dogs, cats evolved as solitary hunters, and, while many have learned to live alongside humans and even feel affection for us, they still don't quite "get us" the way dogs do, and perhaps they never will. But cats have rich emotional lives that we need to respect and understand if they are to thrive in our company. In *Cat Sense*, renowned anthrozoologist John Bradshaw takes us further into the mind of the domestic cat than ever before, using cutting-edge scientific research to dispel the myths and explain the true nature of our feline friends. Tracing the cat's evolution from lone predator to domesticated companion, Bradshaw shows that although cats and humans have been living together for at least eight thousand years, cats remain independent, predatory, and wary of contact with their own kind, qualities that often clash with our modern lifestyles. Cats still have three out of four paws firmly planted in the wild, and within only a few generations can easily revert back to the independent way of life that was the exclusive preserve of their predecessors some 10,000 years ago. Cats are astonishingly flexible, and given the right environment they can adapt to a life of domesticity with their owners—but to continue do so, they will increasingly need our help. If we're to live in harmony with our cats, Bradshaw explains, we first need to

understand their inherited quirks: understanding their body language, keeping their environments—however small—sufficiently interesting, and becoming more proactive in managing both their natural hunting instincts and their relationships with other cats. A must-read for any cat lover, *Cat Sense* offers humane, penetrating insights about the domestic cat that challenge our most basic assumptions and promise to dramatically improve our pets' lives—and ours.

Turning Fierce Dogs Friendly Kellie Snider, 2018-01-09 Learn how to harness the power of worthwhile reinforcement to build safe, friendly behaviors in aggressive dogs. The positive training based, Constructional Aggression Treatment (CAT), as described in *Turning Fierce Dogs Friendly*, has proven successful for many pet owners and trainers around the world. As a functional approach to changing aggressive behavior, it offers a humane alternative to desensitization, counter conditioning, and distraction procedures. CAT typically produces long-lasting results in far less time than any positive treatment available, without the undesirable side-effects that are common with punishment procedures. The ultimate outcome is a once-aggressive dog that is now friendly. Inside *Turning Fierce Dogs Friendly*: Step-by-step instructions for

performing CAT with aggressive dogs Understand the normal behaviors of all dogs, of specific breeds, and of your own individual dog How to be awake and aware of your dog's behavior and your own Discover your dog's worthwhile reinforcement for safe, friendly behaviors Advice for developing good observation skills and staying on task The issues that can make or break successful aggression treatment: consistency, safety, and follow-through Equipment, handling procedures, and preventing opportunities to practice undesirable behavior When to call a professional

The Golden Notebook Doris Lessing, 2008-10-14 Anna is a writer, author of one very successful novel, who now keeps four notebooks. In one, with a black cover, she reviews the African experience of her earlier years. In a red one she records her political life, her disillusionment with communism. In a yellow one she writes a novel in which the heroine relives part of her own experience. And in a blue one she keeps a personal diary. Finally, in love with an American writer and threatened with insanity, Anna resolves to bring the threads of all four books together in a golden notebook. Doris Lessing's best-known and most influential novel, *The Golden Notebook* retains its extraordinary power and relevance decades after its initial publication.

The Koehler Method of Dog Training William R. Koehler, 2016-04-09 For generations, **The Koehler Method of Dog Training** has been a beacon of wisdom for dog owners seeking effective techniques to build a strong bond with their furry companions. William Koehler's approach, rooted in respect for

dogs' intelligence, remains as relevant today as it was when the book first graced the shelves. Koehler believed that dogs could make choices and be held accountable for their behavior. His method follows the pattern of Action → Memory → Desire: dogs act, remember the outcomes, and form desires based on those experiences. Correcting behavior becomes fair, reasonable, and expected once the training has been successfully imparted. In this classic guide, you'll find practical guidance for creating a well-behaved and happy canine companion. From basic obedience to advanced skills, The Koehler Method covers it all. Whether you're a seasoned dog owner or a first-time puppy parent, discover the joy of training your dog using a method that respects their intelligence and fosters a lifelong partnership.

Animals in Translation Temple Grandin, Catherine

Johnson, 2009-08-11 With unique personal insight, experience, and hard science, *Animals in Translation* is the definitive, groundbreaking work on animal behavior and psychology. Temple Grandin's professional training as an animal scientist and her history as a person with autism have given her a perspective like that of no other expert in the field of animal science. Grandin and coauthor Catherine Johnson present their powerful theory that

autistic people can often think the way animals think—putting autistic people in the perfect position to translate “animal talk.” Exploring animal pain, fear, aggression, love, friendship, communication, learning, and even animal genius, Grandin is a faithful guide into their world. *Animals in Translation* reveals that animals are much smarter than anyone ever imagined, and Grandin, standing at the intersection of autism and animals, offers unparalleled observations and extraordinary ideas about both.
