Clinical Decision Making: Case Studies in Medical-Surgical Nursing Gina M Ankner,2011-02-25 Reflecting the latest practices in the field, Clinical Decision Making: Case Studies in Medical-Surgical Nursing, 2nd edition bridges the gap between classroom knowledge and clinical application. Emphasizing holistic nursing care, this resource helps nursing students sharpen their critical thinking skills and gain experience applying what they have learned. The more than 40 medical-surgical case histories and related questions, and responses are based on real-life client situations. Every case contains an introductory blueprint of variables that must be considered while evaluating a particular

scenario concerning the client, nursing protocol, and setting of care. Each blueprint and case is different, just as each clinical situation is unique. As learners simulate the actual decision-making process, they gain valuable experience making informed clinical judgments that will help them become successful nurses.

Categorized by complexity, the book appeals to a broad range of learning levels and styles. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Clinical Cases: Fundamentals of nursing case studies Natasha Scully, Damian Wilson, 2014-09-08 Perfect for: • Bachelor of Nursing Students • Diploma of Nursing Students Apply theory to practice with the Clinical Cases textbook series! Winningham's Critical Thinking Cases in Nursing – E-Book

Mariann M. Harding, Julie S. Snyder, Barbara A.

Preusser, 2013-12-27 Develop your critical thinking and clinical reasoning skills with 150 realistic case studies from the four major clinical practice areas: medical-surgical, pediatric, maternity, and psychiatric/mental health nursing. Each case covers a common problem, drawn from actual clinical experiences and written by nurses who are clinical experts. All cases have been thoroughly updated and revised to reflect current clinical practices, with integrated content on pharmacology, nutrition, and diagnostic/laboratory tests to encourage you to think critically about all aspects of care. This fifth edition also features an increased emphasis on patient management, and new documentation and communication exercises. Plus new NCLEX® Examination format-questions help you prepare for success on the NCLEX® Examination and provide safe, quality patient care. Three-part organization presents cases in three parts: 1) Medical-Surgical Cases; 2) Pediatric, Maternity, and Psychiatric Cases; and 3) Other/Advanced Cases, the latter covering key topics such as multi-system disorders and emergency situations. Realistic case study approach incorporates cases drawn from actual clinical experiences to help you identify changes, anticipate possible complications, and initiate therapeutic interventions. Increasing

case complexity provides you with a foundation on which to build as you advance to more difficult cases. Two new pediatric case studies strengthen your ability to recognize and effectively manage common disorders presenting in pediatric patients. New NCLEX Examination-format questions have been added throughout, including multiple choice, prioritization/ordering, chart/exhibit, and dosage calculation questions. Increased number of higher-level questions requires clinical reasoning rather than simply memorizing and recalling information. An emphasis on patient management reinforces the type of clinical decision-making needed in the clinical setting as well as reflecting the type of questions on the latest NCLEX Examination. Over 25 new illustrations and graphics such as ECG strips, lab/diagnostic test reports, anatomical diagrams, and medication labels are now interwoven throughout the book. New documentation and communication exercises ask you to document relevant patient information or to use the SBAR communication technique to communicate patient findings to the physician.

Bridge to NCLEX Examination review questions at the end of each chapter reinforce key content while helping you prepare for the NCLEX examination with both standard and alternate item format questions. UNIQUE! Levels of Care approach

explains how nursing care varies for different levels of health and illness. More than 50 comprehensive nursing care plans in the book and online incorporate NIC, NOC, and current NANDA diagnoses, defining characteristics, expected outcomes, specific nursing interventions with rationales, evaluation criteria, and collaborative problems. Over 800 full-color illustrations and photographs clearly demonstrate disease processes and related anatomy and physiology. NEW! Unfolding case studies included throughout each assessment chapter help you apply important concepts and procedures to real-life patient care. NEW! Managing Multiple Patients case studies at the end of each section give you practice applying your knowledge of various disorders and help you prioritize and delegate patient care. NEW! Informatics boxes discuss how technology is used by nurses and patients in health care settings. NEW! Expanded coverage of evidence-based practice helps you understand how to apply the latest research to real-life patient care. NEW! Expanded Safety Alerts throughout the book cover surveillance for high-risk situations. NEW! Separate chapter on genetics expands on this key topic that impacts nearly every condition with a focus on the practical application to nursing care of patients. NEW! Expanded coverage of delegation includes

additional Delegation Decisions boxes covering issues such as hypertension and postoperative patient care. NEW! Genetic Risk Alerts and Genetic Link headings highlight specific genetic issues related to body system assessments and disorders. NEW! Revised art program enhances the book's visual appeal and lends a more contemporary look throughout.

Case Studies in Medical-surgical, Pharmacologic, and Psychiatric Nursing Gina M. Ankner, Hyacinth C. Martin, Betty Kehl Richardson, 2008-08 Created especially for nurses, the Clinical Decision Making series helps to bridge the gap between content knowledge and clinical application. Case Studies in Medical-Surgical, Pharmacologic, and Psychiatric Nursing provides 120 nursing case histories that include critical thinking questions and answers based on real-life client situations. Every case contains a blueprint of variables that must be considered while evaluating a particular scenario, and are pertinent concerning the client nursing protocol and setting of care. Examples of these variables include age, gender, cultural influences, pre-existing conditions, legal issues, or communication skills. Each blueprint and case is different just as each clinical situation is unique. By simulating the decision-making process, learners gain the confidence needed to

make informed clinical judgments that will make them successful practitioners. Simply stated, Clinical Decision Making shortens the distance between theory and practice like no other educational tool!
