**Land Use Impacts on Climate** Xiangzheng Deng, Burak Güneralp, Jinyan Zhan, Hongbo Su, 2014-06-11 This book introduces a key issue in research on the climatic impact of land cover and land use changes via terrestrial biogeophysical processes. The parameterization of surface processes and a systematic approach to modeling the climatic impacts of land use change are discussed respectively, and can be used to improve parameterization schemes for climate numerical models and to provide a systematic method, thus offering more scientific and enhanced support for research on the climatic effects of land use/cover change. Further, based on predictions and scenario analyses of land use changes in typical zones, the climatic impact of various types of changes in different areas can be simulated through climatic numerical modeling, the simulation results are suitable for use in climate mitigation, land use planning, urban development planning, etc. Thus, the book is intended for researchers and professionals working in the area of meteorology systems, climatic numerical modeling, climate change, and land use/cover change, as well as decision makers in meteorology and land use planning. Professor Xiangzheng Deng is a senior research fellow at the Institute of Geographical Sciences and Natural Resources Research, Chinese Academy of Sciences.

*Characteristics, patterns and drivers of rural migration in Senegal* The Food and Agriculture Organization of the United Nations, 2020-03-01 Although migratory flows from rural areas are a common phenomenon in most developing countries, we possess little information on their dynamics and determinants. In this context, in September 2017, in the framework of the project "Fostering productive investments to create decent farm and non-farm jobs for rural youth

in migration-prone areas in Senegal”, FAO and the Senegalese National Agency of Statistics and Demography (ANSD) conducted a household survey with the aim of generating information on migration phenomena in rural areas. The survey results described in this study contribute to broadening the available knowledge base on the causes and dynamics of rural migration and aim to inform sectoral economic policies, youth employment and rural development policies.

This is the first book to provide managers with a guide to fostering psychological resilience within their teams. It synthesises not only the latest cutting-edge research in the area, but also translates this into practical advice for a range of organizational settings. **The Well-Being of Children** Gottfried Schweiger, Gunter Graf, 2015-01-01 This volume explores the questions related to the theory, practice, and policy of the well-being and well-becoming of children. It does so in a truly interdisciplinary way with a focus on the social sciences and philosophy, giving therefore justice to the growing insight that studying and promoting the well-being of children has a strong ethical component. It is dependent on the questions of good life, its conditions and cannot be separated from the concept of social justice and moral entitlements of children and their families. In this book, philosophers and social scientists, in close dialogue, shed light on some of the most challenging matters involved.

*Logistiksysteme* Hans-Christian Pfohl, 2013-03-09 Das für die Logistikkonzeption typische Denken in bereichs- und unternehmensübergreifenden Systemzusammenhängen und Wertketten verändert nicht nur Arbeitsabläufe, Kosten und Service, sondern insgesamt die Sichtweise bei der Analyse und Lösung von Problemen in Unternehmen. Das Buch ermöglicht es dem Praktiker, die hier vorgestellten Konzepte gewinnbringend umzusetzen.

**Quantitative Microbiology in Food Processing** Anderson de Souza Sant'Ana, 2016-12-15 Microorganisms are essential for the production of many foods, including cheese, yoghurt, and bread, but they can also cause spoilage and diseases. Quantitative Microbiology of Food Processing: Modeling the Microbial Ecology explores the effects of food processing techniques on these microorganisms, the microbial ecology of food, and the surrounding issues concerning contemporary food safety and stability. Whilst literature has been written on these separate topics, this book seamlessly integrates all these concepts in a unique and comprehensive guide. Each chapter includes background information regarding a specific unit operation, discussion of quantitative aspects, and examples of food processes in which the unit operation plays a major role in microbial safety. This is the perfect text for those seeking to understand the quantitative effects of unit operations and beyond on the fate of foodborne microorganisms in different foods. Quantitative Microbiology of Food Processing is an invaluable resource for students, scientists, and professionals of both food engineering and food microbiology.

**The Interface of Competition Law, Industrial Policy and Development Concerns** Balthasar Strunz, 2018-07-28 This book analyses essential concepts of competition law and industrial policy, and shows where the two areas clash with and complement each other, respectively. The discussion takes place in the context of developing countries, taking into consideration their realities and specific needs. South Africa serves as a real-world example for competition law that goes beyond the notion of consumer welfare. An in-depth analysis of the enforcement of South African law illustrates how the law is used both to combat the negative effects of past industrial policy, and to accommodate current economic and social needs. The book is intended for all readers with an interest in the enforcement of competition law in developing countries. It will particularly benefit those who want to learn about unorthodox approaches that integrate the concept of “public interest” and social imperatives into the application of competition law.
