Content Distribution for Mobile Internet: A Cloud-based Approach Zhenhua Li,Yafei Dai,Guihai Chen,Yunhao Liu,2023-02-14 Content distribution, i.e., distributing digital content from one node to another node or multiple nodes, is the most fundamental function of the Internet. Since Amazon's launch of EC2 in 2006 and Apple's release of the iPhone in 2007, Internet content distribution has shown a strong trend toward polarization. On the one hand, considerable investments have been made in creating heavyweight, integrated data centers ("heavy-cloud") all over the world, in order to achieve economies of scale and high flexibility/efficiency of content distribution. On the other hand, end-user devices ("light-end") have become increasingly lightweight, mobile and heterogeneous, creating new demands concerning traffic usage, energy consumption, bandwidth, latency, reliability, and/or the security of content distribution. Based on comprehensive real-world measurements at scale, we observe that existing content distribution techniques often perform poorly under the abovementioned new circumstances. Motivated by the trend of "heavy-cloud vs. light-end," this book is dedicated to uncovering the root causes of today's mobile networking problems and designing innovative cloud-based solutions to practically address such problems. Our work has produced not only academic papers published in prestigious conference proceedings like SIGCOMM, NSDI, MobiCom and MobiSys, but also concrete effects on industrial systems such as Xiaomi Mobile, MIUI OS, Tencent App Store, Baidu PhoneGuard, and WiFi.com. A series of practical takeaways and easy-to-follow testimonials are provided to researchers and practitioners working in mobile networking and cloud computing. In addition, we have released as much code and data used in our research as possible to benefit the community.

Infusing Technology in the 6-12 Classroom Valerie Morrison,Stephanie Novak,Tim Vanderwerff,2022-08-24 6-12 teachers will discover how to integrate the tech requirements found within today's academic standards into their everyday curriculum. Perhaps your district provides current technology development for staff on a regular basis and has instructional coaches to help teachers infuse technology into their curriculum to meet various academic standards. But in reality, most districts don't have this kind of support. In this book (the second in a two-book series), you'll learn how to shift your instructional practice and leverage technology to meet today's curriculum education standards for grades 6-12. This book doesn't cover every 6-12 national standard, but identifies the standards with a technology component and provides resources and lessons to help you teach those standards effectively. This book includes: • Classroom-tested lesson ideas in English language arts, math, science and social studies mapped to ISTE and tech-related standards to support college- and career-readiness. • Lists of technology-embedded college- and career-readiness standards for each grade level, along with practical ideas and up-to-date resources (apps, software and websites) that can be used in meeting these standards. • Suggestions for addressing roadblocks to incorporating technology in the classroom. • Ways to incorporate staff development and parental support at the school level. • Access to a companion website with information on the tools referenced in the text. With the implementation of these strategies, you'll help your students become self-

directed and critical readers, writers and thinkers so they're better prepared for the future!

Cybercrime and Cloud Forensics: Applications for Investigation Processes Ruan, Keyun,2012-12-31 While cloud computing continues to transform developments in information technology services, these advancements have contributed to a rise in cyber attacks; producing an urgent need to extend the applications of investigation processes. Cybercrime and Cloud Forensics: Applications for Investigation Processes presents a collection of research and case studies of applications for investigation processes in cloud computing environments. This reference source brings together the perspectives of cloud customers, security architects, and law enforcement agencies in the developing area of cloud forensics.

Hit Refresh Satya Nadella,2018-09-28 Microsoft dikenal sebagai salah satu penyokong besar revolusi digital. Tanpanya, kita semua tak akan menikmati betapa cepat dan nyamannya bekerja menggunakan personal computer. Namun, seiring berjalannya waktu, dunia komputasi mengalami perubahan yang luar biasa cepat. Tanpa inovasi yang benar-benar spektakuler, perusahaan ini diramalkan tak akan mampu mempertahankan popularitasnya. Inovasi tergantikan birokrasi. Kerja tim tergantikan politik internal. Microsoft mulai tertinggal. Hit Refresh berkisah tentang transformasi terbesar yang tengah berlangsung dalam tubuh Microsoft di bawah kepemimpinan Satya Nadella, sang CEO. Selama ini, ketika mendengar kata Microsoft, orang akan langsung mengaitkannya dengan Bill Gates yang cemerlang atau Steve Ballmer yang super energik. Nadella nyaris tak masuk ke radar para selebritas teknologi. Namun dalam tahun-tahun pertamanya memimpin, Nadella melakukan banyak gebrakan baru. Salah satunya adalah menciptakan budaya perusahaan yang menggabungkan antara empati dan teknologi. Dia juga membuat pertaruhan besar dalam beberapa teknologi kunci, seperti artificial intelligence (AI atau kecerdasan buatan) dan cloud computing (komputasi awan), yang membuat Microsoft menjadi unik. Di tangan Nadella, Microsoft mengubah fokusnya dari sekadar perusahaan pencari keuntungan menjadi perusahaan humanis yang berkontribusi bagi masa depan umat manusia. Listening In Susan J. Douglas,2013-11-30 Few inventions evoke such nostalgia, such deeply personal and vivid memories as radio—from Amos 'n' Andy and Edward R. Murrow to Wolfman Jack and Howard Stern. Listening In is the first in-depth history of how radio culture and content have kneaded and expanded the American psyche. But Listening In is more than a history. It is also a reconsideration of what listening to radio has done to American culture in the twentieth century and how it has brought a completely new auditory dimension to our lives. Susan Douglas explores how listening has altered our day-to-day experiences and our own generational identities, cultivating different modes of listening in different eras; how radio has shaped our views of race, gender roles, ethnic barriers, family dynamics, leadership, and the generation gap. With her trademark wit, Douglas has created an eminently readable cultural history of radio.

World Development Report 2021 World Bank,2021-06-15 Today's unprecedented growth of data and their ubiquity in our lives are signs that the data revolution is transforming the world. And yet much of the value of data remains untapped. Data collected for one purpose have the potential to generate economic and social value in applications far beyond those originally anticipated. But many barriers stand in the way, ranging from misaligned incentives and incompatible data systems to a fundamental lack of trust. World Development Report 2021: Data for Better Lives explores the tremendous potential of the changing data

landscape to improve the lives of poor people, while also acknowledging its potential to open back doors that can harm individuals, businesses, and societies. To address this tension between the helpful and harmful potential of data, this Report calls for a new social contract that enables the use and reuse of data to create economic and social value, ensures equitable access to that value, and fosters trust that data will not be misused in harmful ways. This Report begins by assessing how better use and reuse of data can enhance the design of public policies, programs, and service delivery, as well as improve market efficiency and job creation through private sector growth. Because better data governance is key to realizing this value, the Report then looks at how infrastructure policy, data regulation, economic policies, and institutional capabilities enable the sharing of data for their economic and social benefits, while safeguarding against harmful outcomes. The Report concludes by pulling together the pieces and offering an aspirational vision of an integrated national data system that would deliver on the promise of producing high-quality data and making them accessible in a way that promotes their safe use and reuse. By examining these opportunities and challenges, the Report shows how data can benefit the lives of all people, particularly poor people in low- and middle-income countries. .

The Law of Unmanned Aircraft Systems Benjamyn I. Scott,2022-07-12 Aerospace Law and Policy Series, Volume 11 In recent years, few industries have grown so prodigiously as that of unmanned aircraft systems (UAS) and, as a result, developments in national, regional, and international law and policy are being initiated and implemented. This new edition of the definitive survey and guide, first published in 2016, reflects the expansion of this sector and the importance placed on it by a diverse range of stakeholders, as well as the enlarged regulatory and policy landscape. In addition to updating many of the original chapters, the second edition covers new topics and moves away from a purely introductory book to a more detailed and critical compendium. Authorship has also been extended beyond the original scope of contributors, which originally centred around those affiliated with Leiden University's Institute of Air and Space Law, and now includes additional experts from all around the world, each of whom explores both already existing rules and proposals coming from national, regional and international levels. As well as broadened discussions on such fundamental legal issues as insurance, financing, liability, accidents investigation, privacy, cyber security, stakeholder organisations and industry standards, the second edition takes into account major recent developments in such areas as the following: applicability and relevance of international regulatory instruments; coming into force of the European Union UAS-related laws; evolution of different States' national law; public safety (e.g., design, production, operation and maintenance); development of unmanned traffic management systems; commercial operations, including urban air mobility (e.g., flying taxis, cargo delivery, high-altitude activities); and developments in defence and security (e.g., dual-use, counter-UAS industry to combat illegal use). As in the first edition, a representative cross section of national laws is included, covering twenty-one different jurisdictions. This fully updated edition not only synthesises and clarifies the complex body of international, regional and national UAS-related law, but also provides expert insight into trends and areas of concern for numerous stakeholders. Without a doubt, it will be of immeasurable value to lawyers, relevant governmental and non-governmental agencies, aviation law scholars, and strategic planners in the wider aviation and transport industries.

To the Cloud Vincent Mosco,2015-11-17 Cloud computing and big data are arguably the most significant forces in information technology today. In the wake of revelations about National Security Agency (NSA) activities, many of which occur in the cloud, this book offers both enlightenment and a critical view. Vincent Mosco explores where the cloud originated, what it means, and how important it is for business,

government and citizens. He describes the intense competition among cloud companies like Amazon and Google, the spread of the cloud to government agencies like the controversial NSA, and the astounding growth of entire cloud cities in China. Is the cloud the long-promised information utility that will solve many of the world's economic and social problems? Or is it just marketing hype? To the Cloud provides the first thorough analysis of the potential and the problems of a technology that may very well disrupt the world.

Hit the Headlines Colin Macfarlane,2012-05-16 Hit the Headlines charts out a series of fun and inspiring, cross-curricular journalism workshops that enhance key skills and confidence in areas such as: Writing and editing. Critical assessment. Interviewing and observation. Mental flexibility and resourcefulness. Role-playing and teamwork. This book will enable teachers of 9 – 15 year-olds to involve their students in a number of effective and well-tested exercises, games and scenarios, which will encourage them into enthusiastically seeking out and gaining further knowledge in areas such as news, journalism, social issues, IT, data assessment, 'intelligent observation', and enhanced questioning and listening. This is 'organic learning' at its best! An introduction to the theory behind the book summarises short and long term learning outcomes which your students can achieve through these methods, explaining why scenarios which feel 'real' can immerse students and inspire them to achieve greater proficiency. The author also flags up particular aspects of the book which encourage readers to read and use it systematically, as well as to take on specific challenges themselves in order to better assist their students in the writing and editing challenges it contains. Practical photocopiable templates for many chapters are provided, which can be used as classroom (and out-of classroom) exercises, examples and solutions to exercises. Through these engrossing journalistic scenarios, students will learn how to critically assess levels of 'interest and importance' of diverse facts, and so begin to understand that report or presentation writing of any sort involves sequencing a critical balance between these two factors. Readers and users of this book can go on to customise their own scenarios, drawing on the stimulating techniques outlined to improve their students' factual writing and related thinking skills. In particular, classroom teachers in primary, middle and secondary schools and all literacy co-ordinators will find this book extremely useful, as well as students studying for PGCEs and NQTs.

Integrating Artificial Intelligence and Visualization for Visual Knowledge Discovery Boris Kovalerchuk,Kawa Nazemi,Răzvan Andonie,Nuno Datia,Ebad Banissi,2022-06-04 This book is devoted to the emerging field of integrated visual knowledge discovery that combines advances in artificial intelligence/machine learning and visualization/visual analytic. A long-standing challenge of artificial intelligence (AI) and machine learning (ML) is explaining models to humans, especially for live-critical applications like health care. A model explanation is fundamentally human activity, not only an algorithmic one. As current deep learning studies demonstrate, it makes the paradigm based on the visual methods critically important to address this challenge. In general, visual approaches are critical for discovering explainable high-dimensional patterns in all types in high-dimensional data offering n-D glasses, where preserving high-dimensional data properties and relations in visualizations is a major challenge. The current progress opens a fantastic opportunity in this domain. This book is a collection of 25 extended works of over 70 scholars presented at AI and visual analytics related symposia at the recent International Information Visualization Conferences with the goal of moving this integration to the next level. The sections of this book cover integrated systems, supervised learning, unsupervised learning, optimization, and evaluation of visualizations. The intended audience for this collection includes those developing and using emerging AI/machine learning and visualization methods. Scientists, practitioners, and students can

find multiple examples of the current integration of AI/machine learning and visualization for visual knowledge discovery. The book provides a vision of future directions in this domain. New researchers will find here an inspiration to join the profession and to be involved for further development. Instructors in AI/ML and visualization classes can use it as a supplementary source in their undergraduate and graduate classes.

Precarious Creativity Michael Curtin,Kevin Sanson,2016-02-17 Precarious Creativity examines the seismic changes confronting media workers in an age of globalization and corporate conglomeration. This pathbreaking anthology peeks behind the hype and supposed glamor of screen media industries to reveal the intensifying pressures and challenges workers face. The authors take on crucial issues and provide insightful case studies of workplace dynamics regarding creativity, collaboration, exploitation, and cultural difference. Furthermore, they investigate working conditions and organizing efforts on all six continents, offering comprehensive analysis of contemporary screen media labor in places such as Lagos, Prague, Hollywood, and Hyderabad, across a range of job categories that includes visual effects, production services, and adult entertainment. With contributions from John Caldwell, Vicki Mayer, Herman Gray, Tejaswini Ganti, and others, this collection offers timely critiques of media globalization and broader debates about labor, creativity, and precarity. "Every case study is an eye-opener, and no other book comes close in assessing the plight of creative workers in the era of global conglomerate Hollywood." -THOMAS SCHATZ, University of Texas at Austin "A corrective to previous, U.S.-centric attempts to understand the global media economy by offering a bracing look at the dark underbelly of life for most media workers today." -DENISE MANN, University of California, Los Angeles "A balanced and comprehensive portrayal of the reshaping of the contours of work and industry organization under the twin circumstances of digital disruption and a globalizing media system." -TOM O'REGAN, The University of Queensland MICHAEL CURTIN is a professor of Film and Media Studies at University of California, Santa Barbara. KEVIN SANSON is a Lecturer in Entertainment Industries at Queensland University of Technology in Australia.

Underground Empire Henry Farrell,Abraham Newman,2023-09-12 A deeply researched investigation that reveals how the United States is like a spider at the heart of an international web of surveillance and control, which it weaves in the form of globe-spanning networks such as fiber optic cables and obscure payment systems America's security state first started to weaponize these channels after 9/11, when they seemed like necessities to combat terrorism—but now they're a matter of course. Multinational companies like AT&T and Citicorp build hubs, which they use to make money, but which the government can also deploy as choke points. Today's headlines about trade wars, sanctions, and technology disputes are merely tremors hinting at far greater seismic shifts beneath the surface. Slowly but surely, Washington has turned the most vital pathways of the world economy into tools of domination over foreign businesses and countries, whether they are rivals or allies, allowing the U.S. to maintain global supremacy. In the process, we have sleepwalked into a new struggle for empire. Using true stories, field-defining findings, and original reporting, Henry Farrell and Abraham Newman show how the most ordinary aspects of the post–Cold War economy have become realms of subterfuge and coercion, and what we must do to ensure

that this new arms race doesn't spiral out of control.

Cyber-Physical Systems Ramesh Poonia,Basant Agarwal,Sandeep Kumar,Mohammad Khan,Goncalo Marques,Janmenjoy Nayak,2021-10-30 Cyber-Physical Systems: AI and COVID-19 highlights original research which addresses current data challenges in terms of the development of mathematical models, cyber-physical systems-based tools and techniques, and the design and development of algorithmic solutions, etc. It reviews the technical concepts of gathering, processing and analyzing data from cyber-physical systems (CPS) and reviews tools and techniques that can be used. This book will act as a resource to guide COVID researchers as they move forward with clinical and epidemiological studies on this outbreak, including the technical concepts of gathering, processing and analyzing data from cyber-physical systems (CPS). The major problem in the identification of COVID-19 is detection and diagnosis due to non-availability of medicine. In this situation, only one method, Reverse Transcription Polymerase Chain Reaction (RT-PCR) has been widely adopted and used for diagnosis. With the evolution of COVID-19, the global research community has implemented many machine learning and deep learning-based approaches with incremental datasets. However, finding more accurate identification and prediction methods are crucial at this juncture. Offers perspectives on the design, development and commissioning of intelligent applications Provides reviews on the latest intelligent technologies and algorithms related to the state-of-the-art methodologies of monitoring and mitigation of COVID-19 Puts forth insights on how future illnesses can be supported using intelligent corona virus monitoring techniques

Managing for Social Justice Latha Poonamallee,Anita D. Howard,Simy Joy,2023-01-30 The book introduces a preliminary, integrative conceptual framework on the intersections between management and social justice with a view that the quest for social justice is not an endpoint rather an ongoing journey. With contributions from management scholars and practitioners, it highlights, examines, and explores the continuities and discontinuities, gains and losses, and struggles and successes in this quest for reimagining organizations as sites and vehicles for advancing social justice in the world. To nurture and facilitate flourishing individuals and collectives, we need bolder, more innovative, and more creative models of engagement. Further, we need models for speaking and learning from different perspectives and building common ground through shared values of equity, connectivity, and compassion and moral expansiveness while recognizing the complexities of the world we inhabit via our organizations and the need to develop nuanced understandings of the same. Contributing authors address questions such as: Are social justice and management mutually exclusive concepts? How can we draw on effective management for advancing social justice aims? How do we bend the arc of organizational life towards more justice? What are the rights and obligations of organizations and their members to the world at large, and to their local communities and societies? Through its re-imagining of organizations and management as vehicles for social justice instead of just as tools of oppression, injustice, or regressive organizing in an extractive economy, this book brings together critical and positive organizational approaches challenging fundamental assumptions about how our society, people's collectives, and workplaces are organized with capacity building, incremental change, sustained change, institutionalized change, dynamic ongoing problem-solving/ assessment/ redesign, and more. Management scholars will learn the nuanced and complex intersections between management theories and practice and different types of justice/injustice in a global context both as antecedents to modern organizations and workplaces and the ways in which these intersectional actors advance and change the organizations and workplaces of the future.
