**Grading Student Midwives' Practice** Sam Chenery-Morris,2020-12-30 This book investigates the education and assessment of student midwives in clinical practice, paying particular attention to how their practice is graded. Chenery-Morris brings primary research, which explores students, mentors, and midwifery lecturers perspectives of practice learning and its assessment, together with the international literature on clinical knowledge, teaching and learning in practice and assessment of students drawn from a range of healthcare and education professions. Discussing how practice is graded, what constitutes valid practice knowledge, learning in clinical practice, evaluating practice learning and failing students, this book uses Basil Bernstein's theories to throw light on how we assess and whether we should assess performance in addition to whether a student is competent to practise. This is an important contribution to the field of midwifery education. It will also be relevant to those with an interest in practice education from a range of healthcare professions.

The Algebraist Iain M. Banks,2024-04-02 As complex, turbulent and spectacular as the gas giant on which it is set, this novel from Iain M. Banks is space opera on a truly epic scale. "An enormously enjoyable book, full of wonderful aliens, a sense of wonder and subtle political commentary on current events." -Publishers Weekly (Starred Review) It is 4034 AD. Humanity has made it to the stars. Fassin Taak, a Slow Seer at the Court of the Nasqueron Dwellers, will be fortunate if he makes it to the end of the year. The Nasqueron Dwellers inhabit a gas giant on the outskirts of the galaxy, in a system awaiting its wormhole connection to the rest of civilization. In the meantime, they are dismissed as decadents living in a state of highly developed barbarism, hoarding data without order, hunting their own young and fighting pointless formal wars. Seconded to a military-religious order he's barely heard of - part of the baroque hierarchy of the Mercatoria, the latest galactic hegemony - Fassin Taak has to travel again amongst the Dwellers. He is in search of a secret hidden for half a billion years. But with each day that passes a war draws closer - a war that threatens to overwhelm everything and everyone he's ever known. "Banks is a phenomenon...writing pure science fiction of a peculiarly gnarly energy and elegance." -William Gibson "Banks writes with a sophistication that will surprise anyone unfamiliar with modern science fiction." -The New York Times For More from Iain M. *Germanna* John W. Wayland,2009-03-01 Germanna was a German settlement in the Colony of Virginia, settled in two waves, first in 1714 and then in 1717. Virginia Lieutenant Governor Alexander Spotswood encouraged the immigration by advertising in Germany for miners to move to Virginia and establish a mining industry in the colony.

A History of Orange County, Virginia William Wallace Scott,1974 Excerpt from A History of Orange County, Virginia: From Its Formation in 1734 (O. S.) To the End of Reconstruction in 1870; Compiled Mainly From Original Records; With a Brief Sketch of the Beginnings of Virginia, a Summary of Local Evets to 1907, and a Map I have undertaken to write this book because I thought that the history of Orange was notable enough to deserve preservation. It is much to be regretted that some competent person did not do this work long ago; for in the lapse of time and the neglect of opportunity many things that ought to have been preserved can not now be narrated with confidence as history, hardly as tradition. Though much has perished, much remains. I have read with diligence the minute books of the county court from its organization in 1734 down to 1870; and can assert with complete candor that no known resource which I thought might afford information as to the past has been neglected. Name after name of places and people once locally historic has passed into oblivion and beyond the reach of the investigator. Regret is vain, and can not restore what is lost; my effort has been to save what is left, and to perpetuate it for posterity. Fortunately the county records are in excellent preservation, and the order books of the county court contain the history of the county, in the main, so far as it may now be written. I have been advised by judicious and well meaning friends to omit some of the more shocking details, such as the burning of Eve at the stake, the beheading of Peter, the cutting off. Of ears, burning in the hands, etc. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. *Leadless decorative tiles, faience, and mosaic* W.J. Furnival,

*Fredericksburg, Virginia 1608-1908* Author:Sylvanius Jackson Quinn,2021-04-11 This book covers the history of a city called Fredericksburg, located in the state of Virginia, United States. Located near where the Rappahannock River crosses the Atlantic Seaboard fall line, Fredericksburg was a prominent port in Virginia during the colonial era. During the Civil War, Fredericksburg, located halfway between the capitals of the opposing forces, was the site of the Battle of Fredericksburg and Second Battle of Fredericksburg. These battles are preserved, in part, as the Fredericksburg and Spotsylvania National Military Park. More than 10,000 African-Americans in the region left slavery for freedom in 1862 alone, getting behind Union lines.

*Student visas* Great Britain: Parliament: House of Commons: Home Affairs Committee,2011-03-25 This report from the Home Affairs Select Committee cautions the Government against introducing measures which could damage the UK's thriving educational export sector. The Committee remains concerned that a number of the Government proposals could have serious unintended consequences. International students make up 10% of first degree students and over 40% of postgraduate students at UK universities. The international student market, estimated to be worth £40 billion to the UK economy is a significant growth market and the UK is the second most popular destination in the world for international students. The Committee's findings include: the importance of the Post-Study Work route in attracting students to the UK and disagrees with the Government proposal to close it; it suggests alternatives to the Government's proposals on language requirements, specifically a permanent change to the parameters of the student visitor visa so that it can be used as a viable route for all of those attending pre-degree programmes; it supports the Government's proposals to tighten the accreditation of language schools but is concerned that Government approval of the current accreditation bodies has lapsed. The Committee calls for a single streamlined accreditation system and agrees that any cap on student visas is unnecessary and undesirable; the Committee also notes that progress has been made on closing down bogus language schools and supports the Government's intention to crack down on bogus colleges and bogus students but it is not persuaded that students are migrants, as defined by the UN and suggests that students ought to be excluded from net migration numbers. The Committee also raises concerns that the data used in assessing migration figures are not fit for purpose and could inhibit effective policy making.

**Education** Rudolf Steiner,2003 Rudolf Steiner, the often undervalued, multifaceted genius of modern times, contributed much to the regeneration of culture. In addition to his philosophical teachings, he provided ideas for the development of many practical activities including education--both general and special--agriculture, medicine, economics, architecture, science, religion, and the arts. Today there are thousands of schools, clinics, farms, and many other organizations based on his ideas. Steiner's original contribution to human knowledge was based on his ability to conduct spiritual research, the investigation of metaphysical dimensions of existence. With his scientific and philosophical training, he brought a new systematic discipline to the field, allowing for conscious methods and comprehensive results. A natural seer from childhood, he cultivated his spiritual vision to a high degree, enabling him to speak with authority on previously veiled mysteries of life. Topics include: a social basis for education; the spirit of the Waldorf school; educational methods based on anthroposophy; children at play; teaching through the insights of spiritual science; adolescents after the fourteenth year; science, art, religion, and morality; the spiritual basis of education; the role of caring in education; the roots of education and the kingdom of childhood; address at a parents' evening; and education within the broader social context.
