**The Supernova Story** Laurence A. Marschall,2013-11-11 Astronomers believe that a supernova is a massive explosion signaling the death of a star, causing a cosmic recycling of the chemical elements and leaving behind a pulsar, black hole, or nothing at all. In an engaging story of the life cycles of stars, Laurence Marschall tells how early astronomers identified supernovae, and how later scientists came to their current understanding, piecing together observations and historical accounts to form a theory, which was tested by intensive study of SN 1987A, the brightest supernova since 1006. He has revised and updated The Supernova Story to include all the latest developments concerning SN 1987A, which astronomers still watch for possible aftershocks, as well as SN 1993J, the spectacular new event in the cosmic laboratory.

**The Concert Song Companion** Charles Osborne,2012-12-06 W H A T I H A V E attempted in this book is a survey of song; the kind of song which one finds variously described as 'concert', 'art', or sometimes even 'classical song'. 'Concert song' seems the most useful, certainly the least inexact or misleading, of some descriptions, especially since 'art song' sounds primly off putting, and 'classical song' really ought to be used only to refer to songs written during the classical period, i. e. the 18th century. Concert song clearly means the kind of songs one hears sung at concerts or recitals. Addressing myself to the general music-lover who, though he possesses no special knowledge of the song literature, is never theless interested enough in songs and their singers to attend recitals of Lieder or of songs in various languages, I have naturally confined myself to that period of time in which the vast majority of these songs was composed, though not necessarily only to those composers whose songs have survived to be remembered in recital programmes today. I suppose this to be roughly the three centuries covered by the years 1650-1950, though most of the songs we, as audiences, know and love were composed in the middle of this period, in other words in the 19th century.

**Volcanic Ash and Aviation Safety** Thomas J. Casadevall,1995-03 This conference was prompted by the occurrence of 5 encounters between passenger jetliners with drifting clouds of volcanic ash from the 1989-90 eruptions of Redoubt Volcano in Alaska. Examines 5 principal areas, including: how volcanoes produce ash clouds, the damage and impacts resulting from ash-cloud encounters, communications procedures for mitigating the risks from volcanic ash, the meteorology and modeling of ash-cloud movement, and methods for detection and tracking of ash clouds. 60 technical presentations are included.
