This book provides a step-by-step methodology to maximize the complete restructuring and monitoring of the ALM of DB schemes. Variegated Neoliberalism Huw Macartney, 2010-12-15 We know from the cost of the 2007-09 crisis that transnational finance does not operate in a realm removed from our everyday lives. Variegated Neoliberalism explains why its inequalities persist and how they undermine more social-minded policies towards finance in the EU. The book suggests that large financial groups capitalize on broader changes in capitalism and emerging assumptions about what benefits society at large. Those pushing these political-economic projects present policy change to cope with financial globalization as a new common sense. Macartney's argument then contests these assumptions through an analysis of the spatial relations of transnational actors, and the political claims made within finance and research communities. Rather than relying on umbrella concepts like 'transnational capitalist class', Variegated Neoliberalism emphasises the national-domestic foundations for transnationalization and what we commonly understand as neoliberalism. The book provides comparative analyses of global and European banking communities, and economic research centres, in the UK, France, and Germany. It explains the constellations underpinning the current neoliberal order in global finance, and the realms of possibility for challenges to it.

Cornerstone Investors Philippe Espinasse, 2018-01-04 In this groundbreaking guide, former investment banker Philippe Espinasse explains the process of gathering cornerstone investors in connection with IPOs and other equity offerings. Using his trademark simple and jargon-free language, he details the targeting strategies, documentation, marketing, and allocation of shares and other securities to these reference shareholders, and analyses why and how they make or break today's new listings across Asia's key markets. This essential guide—and the first of its kind—contains key information on the legal framework for cornerstone investors in Hong Kong, Malaysia, and Singapore, and offers practical advice on how best to structure and conduct a cornerstone investor offering. It also discusses some of the more controversial issues associated with the practice of cornerstone investment and includes many real-life examples of cornerstone deals, sample documents, cornerstone investor profiles, an investor target list, and a comprehensive glossary. 'There is no better person to shed light on the opaque world of cornerstone investing in Asian IPOs. Philippe Espinasse writes clearly, substantively, and expertly.' —Jasper Moiseiwitsch, Asia companies and markets news editor, Financial Times 'As engaging as it is informative. Espinasse has cut through legalese and jargon to create a pragmatic overview of this widely misunderstood, and distinctly Asian, investment banking concept. Packed with recent examples, this book doesn't just teach you about cornerstones; it also provides an insider's take of the region's capital markets hubs.' —Danielle Myles, capital markets editor, The Banker 'Cornerstone investors have taken centre stage in Hong Kong's IPO market. This book is needed now more than ever.' —Matthew Thomas, Asia bureau chief, Euromoney Institutional Investor
