Perspectives on Spoken Discourse James Rock,Caterina Pavesi,Pierfranca Forchini,2014-03-26 This book, written for both teachers of English and advanced lan-guage students, presents research related to spoken discourse carried out by three linguists from the Università Cattolica del Sacro Cuore. The book opens with an article by James Rock on the Common Eu-ropean Framework of Reference and its relevance to the concept of communicative competence and the practice of learning spoken English within the university context. In his second article, Rock presents an overview of studies on phra-seology in the non-native speaker setting, and shows that initial interest in phraseology in the field of language acquisition highlighted the fact that native-like fluency does not stem so much from knowledge of grammatical rules as from features of idiomaticity. In the third paper in the collection, Caterina Pavesi examines learner English written on the computer and seeks to ascertain the status of this Eng-lish on the written-spoken continuum. Learner English has been the object of a great deal of scholarly attention in recent decades, but it has not yet been studied in any great depth in its computer-mediated form. The fourth article in the book examines the language of films, traditionally considered to be an artificial form of language, not representative of speech, and thus of little value in the study of spoken discourse. In direct contrast with this view, PIerfranca Forchini shows that empirical research on American movies transcribed by her actually proves that the language of movies is extremely similar to conversation along several parameters. Adopting Biber's analytical method, Multi-Dimensional Analysis, which attaches a score to features of language and measures the occurrence of these features, grouping them into dimensions which can describe different types of discourse, Forchini shows that movie language is surprisingly similar to conversational discourse on four out of five dimensions, thus overturning the long-held view of the status of this type of language, and providing scientific justification for using movies to teach features of spoken discourse. The research was presented at the Università Cattolica del Sacro Cuore in Brescia in October 2013 under the auspices of and with the support of the Centro Linguistico dell'Università Cattolica (CLUC).

Multilingual Youth Practices in Computer Mediated Communication Cecelia Cutler,Unn Røyneland,2018-09-30 With an eye to the playful, reflexive, self-conscious ways in which global youth engage with each other online, this volume analyzes user-generated data from these interactions to show how communication technologies and multilingual resources are deployed to project local as well as trans-local orientations. With examples from a range of multilingual settings, each author explores how youth exploit the creative, heteroglossic potential of their linguistic repertoires, from rudimentary attempts to engage with others in a second language to hybrid multilingual practices. Often, their linguistic, orthographic, and stylistic choices challenge linguistic purity and prescriptive correctness, yet, in other cases, their utterances constitute language policing, linking 'standardness' or 'correctness' to piety, trans-local affiliation, or national belonging. Written for advanced undergraduates, postgraduates and researchers in linguistics, applied linguistics, education and media and communication studies, this volume is a timely and readymade resource for researching online multilingualism with a range of methodologies and perspectives.

Tribalism and Political Power in the Gulf Courtney Freer,Alanoud al-Sharekh,2021-09-23 Gulf societies are often described as being intensely tribal. However, in discussions of state building and national identity, the role of tribalism and tribal identity is often overlooked. This book analyses the political role of tribes in Kuwait, Qatar and the UAE aiming to understand the degree to which tribes hinder or advance popular participation in government and to what extent they exert domestic political power. The

research traces the historical relationship between ruling elites and nomadic tribes, and, by constructing political histories of these states and analysing the role of tribes in domestic political life and social hierarchies, reveals how they serve as major political actors in the Gulf. A key focus of the book is understanding the extent to which societies in the Gulf have become 're-bedouinised' in the modern era and how this has shaped these states' political processes and institutions. The book explores the roles that tribes play in the development of "progressive" citizenship regimes and policymaking today, and how they are likely to be influential in the future within rentier environments.

Task-Based Language Learning and Teaching with Technology Michael Thomas,Hayo Reinders,2013-03-14 This edited collection considers the relationship between task-based language teaching (TBLT) and technology-enhanced learning. TBLT is concerned with a number of macro-tasks such as information gathering and problem-solving as well as evaluative tasks, all of which are increasingly available via online and Web-based technologies. Technology Enhanced Learning refers to a broad conception of technology use in the language classroom and incorporates a range of interactive learning technologies such as Interactive Whiteboards and mobile learning devices.The popularity of Web 2.0 technologies (blogs, wikis, social networking sites, podcasting, virtual worlds), as well as practical applications of mobile learning, place a fresh emphasis on creating project-orientated language learning tasks with a clear real-world significance for learners of foreign languages. This book examines the widespread interest in these new technology-enhanced learning environments and looks at how they are being used to promote task-based learning. This book will appeal to practioners and researchers in applied linguistics, second language acquisition and education studies.

Understanding Emotions in English Language Learning in Virtual Worlds Mariusz Kruk,Miroslaw Pawlak,2022-04-19 This book contributes to overcoming the deficit in research on emotions in foreign language learning in the domain of computer-assisted language learning (CALL) in both traditional and virtual settings. The authors divide emotions into positive (i.e., enjoyment and curiosity) and negative (i.e., boredom and language anxiety) and explore their role in L2 teaching and learning in CALL environments from theoretical, empirical and pedagogical perspectives. The book begins with a theoretical overview of selected issues concerning positive and negative emotions and surveys the studies that have dealt with this issue in L2 learning in conventional settings and CALL. The empirical part of the book is devoted to a research project which explores the experience of positive and negative emotions in learning English in the virtual world Second Life, the relationships of the emotions in question and factors influencing them. The book concludes by recommending a selection of practices which can help maximize the positive emotions and minimize the negative emotions in foreign language learning in CALL environments. This is an important and illuminating read for students and scholars of applied linguistics, second language education and educational technology who are interested in CALL and in incorporating VW/VR-based language learning programs into their studies and teaching.
