After Confucius Paul R. Goldin,2017-04-01 After Confucius is a collection of eight studies of Chinese philosophy from the time of Confucius to the formation of the empire in the second and third centuries B.C.E. As detailed in a masterful introduction, each essay serves as a concrete example of “thick description”—an approach invented by philosopher Gilbert Ryle—which aims to reveal the logic that informs an observable exchange among members of a community or society. To grasp the significance of such exchanges, it is necessary to investigate the networks of meaning on which they rely. Paul R. Goldin argues that the character of ancient Chinese philosophy can be appreciated only if we recognize the cultural codes underlying the circulation of ideas in that world. Thick description is the best preliminary method to determine how Chinese thinkers conceived of their own enterprise. Who were the ancient Chinese philosophers? What was their intended audience? What were they arguing about? How did they respond to earlier thinkers, and to each other? Why did those in power wish to hear from them, and what did they claim to offer in return for patronage? Goldin addresses these questions as he looks at several topics, including rhetorical conventions of Chinese philosophical literature; the value of recently excavated manuscripts for the interpretation of the more familiar, received literature; and the duty of translators to convey the world of concerns of the original texts. Each of the cases investigated in this wide-ranging volume exemplifies the central conviction behind Goldin’s plea for thick description: We do not do justice to classical Chinese philosophy unless we engage squarely the complex and ancient culture that engendered it. The History and Cultural Heritage of Chinese Calligraphy, Printing and Library Work Susan M. Allen,Lin Zuzao,Cheng Xiaolan,Jan Bos,2010-03-26 In China the tradition of a book society is longer than anywhere else in the world. Chinese paper making, calligraphy and woodblock printing date from very early ages, but have for a very long time remained almost unknown to the Western world. At the IFLA satellite meeting “Chinese Written and Printed Cultural Heritage and Library Work” in Hangzhou in 2006 the richness of present day book historical research and library activities in China has been presented by more than sixty papers. This fine selection reflects the width and depth of this extremely important and immense Chinese heritage.

China: A Historical Geography of the Urban Yannan Ding,Maurizio Marinelli,Xiaohong Zhang,2017-11-20 This book offers a unique contribution to the burgeoning field of Chinese historical geography. Urban transformation in China constitutes both a domestic revolution and a world-historical event. Through the exploration of nine urban sites of momentous change, over an extended period of time, this book connects the past with the present, and provides much-needed literature on city growth and how they became complex laboratories of prosperity. The first part of this book puts Chinese urban changes into historical perspective, and probes the relationship between

nation and city, focusing on Shanghai, Beijing and Changchun. Part two deals with the relationship between history and modernity, concentrating on Tunxi, a traditional trade center of tea, New Villages in Shanghai and street names in Taipei and Shanghai. Part three showcases the complexities of urban regeneration vis-à-vis heritage preservation in cities such as Datong, Tianjin and Qingdao. This book offers an innovative interdisciplinary and international perspective, which will be of interest to students and scholars of Chinese urban studies, as well Chinese politics and society.

Creating the Intellectual Eddy U,2019-04-30 A free ebook version of this title is available through Luminos, University of California Press’s Open Access publishing program. Visit www.luminosoa.org to learn more. Creating the Intellectual redefines how we understand relations between intellectuals and the Chinese socialist revolution of the last century. Under the Chinese Communist Party, “the intellectual” was first and foremost a widening classification of individuals based on Marxist thought. The party turned revolutionaries and otherwise ordinary people into subjects identified as usable but untrustworthy intellectuals, an identification that profoundly affected patterns of domination, interaction, and rupture within the revolutionary enterprise. Drawing on a wide range of data, Eddy U takes the reader on a journey that examines political discourses, revolutionary strategies, rural activities, urban registrations, workplace arrangements, organized protests, and theater productions. He lays out in colorful detail the formation of new identities, forms of organization, and associations in Chinese society. The outcome is a compelling picture of the mutual constitution of the intellectual and the Chinese socialist revolution, the legacy of which still affects ways of seeing, thinking, acting, and feeling in what is now a globalized China.
