Zhou History Unearthed Yuri Pines,2020-11-10 There is a stark contrast between the overarching importance of history writing in imperial China and the meagerness of historical texts from the centuries

preceding the imperial unification of 221 BCE. However, recently discovered bamboo manuscripts from the Warring States period (453–221 BCE) have changed this picture, leading to reappraisals of early Chinese historiography. These manuscripts shed new light on questions related to the production, circulation, and audience of historical texts in early China; their different political, ritual, and ideological usages; and their roles in the cultural and intellectual dynamics of China's vibrant pre-imperial age. Zhou History Unearthed offers both a novel understanding of early Chinese historiography and a fully annotated translation of Xinian (String of Years), the most notable historical manuscript from the state of Chu. Yuri Pines elucidates the importance of Xinian and other recently discovered texts for our understanding of history writing in Zhou China (1046–255 BCE), as well as major historical events and topics such as Chu's cultural identity. Pines explores how Xinian challenges existing interpretations of the nature and reliability of canonical historical texts on the Zhou era, such as Zuo zhuan (Zuo Tradition/Commentary) and Records of the Historian (Shiji). A major work of scholarship and translation, Zhou History Unearthed sheds new light on early Chinese history and historiography, demonstrating how new archaeological findings are changing our knowledge of China's pre-imperial days.

An Annotated Bibliography for Taiwan Film Studies Jim Cheng, James Wicks, Sachie Noguchi, 2016-04-19 Compiled by two skilled librarians and a Taiwanese film and culture specialist, this volume is the first multilingual and most comprehensive bibliography of Taiwanese film scholarship, designed to satisfy the broad interests of the modern researcher. The second book in a remarkable three-volume research project, An Annotated Bibliography for Taiwan Film Studies catalogues the published and

unpublished monographs, theses, manuscripts, and conference proceedings of Taiwanese film scholars from the 1950s to 2013. Paired with *An Annotated Bibliography for Chinese Film Studies* (2004), which accounts for texts dating back to the 1920s, this series brings together like no other reference the disparate voices of Chinese film scholarship, charting its unique intellectual arc. Organized intuitively, the volume begins with reference materials (bibliographies, cinematographies, directories, indexes, dictionaries, and handbooks) and then moves through film history (the colonial period, Taiwan dialect film, new Taiwan cinema, the 2/28 incident); film genres (animated, anticommunist, documentary, ethnographic, martial arts, teen); film reviews; film theory and technique; interdisciplinary studies (Taiwan and mainland China, Taiwan and Japan, film and aboriginal peoples, film and literature, film and nationality); biographical materials; film stories, screenplays, and scripts; film technology; and miscellaneous aspects of Taiwanese film scholarship (artifacts, acts of censorship, copyright law, distribution channels, film festivals, and industry practice). Works written in multiple languages include transliteration/romanized and original script entries, which follow universal AACR-2 and American cataloguing standards, and professional notations by the editors to aid in the use of sources.

After Confucius Paul R. Goldin, 2017-04-01 *After Confucius* is a collection of eight studies of Chinese philosophy from the time of Confucius to the formation of the empire in the second and third centuries B.C.E. As detailed in a masterful introduction, each essay serves as a concrete example of “thick description”—an approach invented by philosopher Gilbert Ryle—which aims to reveal the logic that informs an observable exchange among members of a community or society. To grasp the significance of such exchanges, it is necessary to investigate the networks of meaning on which they rely. Paul R. Goldin argues that the character of ancient Chinese philosophy can be appreciated only if we recognize the cultural codes underlying the circulation of ideas in that world. Thick description is the best preliminary method to determine how Chinese thinkers conceived of their own enterprise. Who were the ancient Chinese philosophers? What was their intended audience? What were they arguing about? How did they respond to earlier thinkers, and to each other? Why did those in power wish to hear from them, and what did they claim to offer in return for patronage? Goldin addresses these questions as he looks at several topics, including rhetorical conventions of Chinese philosophical literature; the value of recently excavated manuscripts for the interpretation of the more familiar, received literature; and the duty of translators to convey the world of concerns of the original texts. Each of the cases investigated in this wide-ranging volume exemplifies the central conviction behind Goldin’s plea for thick description: We do not do justice

to classical Chinese philosophy unless we engage squarely the complex and ancient culture that engendered it. Chinese Classic Economics Zhong Yongsheng, 2016-07-31 Modern economics come from western countries. They are the mirrors of the economic conditions of these countries and the way they talk about economic phenomena is under the logic of western philosophy. But in fact, as a culture of long history, China has its own "classic economics", though it hides behind modern context. The author re-discovers the Chinese classic economics from scriptures and historical records. This book not only contains the academic explanation of a long forgotten economic theory system but also offers us a new prospect to understand the modern world. This area this book covers is unique and totally new. People always consider economics is rather young. But in fact, economic thoughts, which influenced by many different aspects, exist for a long time. This book tries to re-discover the long hidden economic thoughts in ancient Chinese culture. It provides us a new way to understand the model and the unique patterns of modern China's economic behavior. Whenever we refer to economics, whether economics of Adam Smith, Keynes or even Karl Marx, we are always referring to something "western". There are few books talking

about the economic thoughts in ancient China. This book has few competitors. It will appeal to a worldwide audience of students and scholars of economics. The Sage and the People Sebastien Billioud, Joel Thoraval, 2015-08-03 Winner of the 2015 Pierre-Antoine Bernheim Prize for the History of Religion by the Académie des Inscriptions et Belles-Lettres

After a century during which Confucianism was viewed by academics as a relic of the imperial past or, at best, a philosophical resource, its striking comeback in Chinese society today raises a number of questions about the role that this ancient tradition might play in a contemporary context. *The Sage and the People* is the first comprehensive enquiry into the Confucian revival that began in China during the 2000s. Based on extensive anthropological fieldwork carried out over eight years in various parts of the country, it explores the re-appropriation and reinvention of popular practices in fields as diverse as education, self-cultivation, religion, ritual, and politics. The book analyzes the complexity of the Confucian revival within the broader context of emerging challenges to such categories as religion, philosophy, and science that prevailed in modernization narratives throughout the last century. Exploring state cults both in Mainland China and Taiwan, authors Sébastien Billioud and Joël Thoraval compare the interplay between politics and religion on the two shores of the Taiwan strait and attempt to shed light on possible future developments of Confucianism in Chinese society.

Children's Literature and Transnational Knowledge in Modern China Shih-Wen Sue Chen, 2019-04-29

This book examines the development of Chinese children's literature from the late Qing to early Republican era. It highlights the transnational flows of knowledge, texts, and cultures during a time when children's literature in China and the West was developing rapidly. Drawing from a rich archive of periodicals, novels, tracts, primers, and textbooks, the author analyzes how Chinese children's literature published by Protestant missionaries and Chinese educators in the late nineteenth and early twentieth centuries presented varying notions of childhood. In this period of dramatic transition from the dynastic Qing empire to the new Republican China, young readers were offered different models of childhood, some of which challenged dominant Confucian ideas of what it meant to be a child. This volume sheds new light on a little-explored aspect of Chinese literary history. Through its contributions to the fields of children's literature, book history, missionary history, and translation studies, it enhances our understanding of the negotiations between Chinese and Western cultures that shaped the publication and reception of Chinese texts for children.
