Online around the World Laura M. Steckman,Marilyn J. Andrews,2017-05-24 Covering more than 80 countries around the world, this book provides a compelling, contemporary snapshot of how people in other countries are using the Internet, social media, and mobile apps. How do people in other countries use the social media platform Facebook differently than Americans do? What topics are discussed on the largest online forum—one in Indonesia, with more than seven million registered users? Why does Mongolia rate in the top-ten countries worldwide for peak Internet speeds? Readers of *Online around the World: A Geographic Encyclopedia of the Internet, Social Media, and Mobile*

Apps will discover the answers to these questions and learn about people's Internet and social media preferences on six continents—outside of the online community of users within the United States. The book begins with an overview of the Internet, social media platforms, and mobile apps that chronologically examines the development of technological innovations that have made the Internet what it is today. The country-specific entries that follow the overview provide demographic information and describe specific events influenced by online communications, allowing readers to better appreciate the incredible power of online interactions across otherwise-unconnected individuals and the realities and peculiarities of how people communicate in today's fast-paced, globalized, and high-technology environment. This encyclopedia presents social media and the Internet in new light, identifying how the use of language and the specific application of human culture impacts emerging technologies and communications, dramatically affecting everything from politics to social activism, education, and censorship.

**Technology and Emergency Management** John C. Pine,2017-09-12 The first book devoted to a critically important aspect of disaster planning, management, and mitigation **Technology and Emergency Management, Second Edition** describes best practices for technology use in emergency planning, response, recovery, and mitigation. It also describes the key elements that must be in place for technology to enhance the emergency management process. The tools, resources, and strategies discussed have been applied by organizations worldwide tasked with planning for and managing every variety of natural and man-made hazard and disaster. Illustrative case studies based on their experiences appear throughout the book. This new addition of the critically acclaimed guide has been fully updated and expanded to reflect significant developments occurring in the field over the past decade. It features in-depth coverage of major advances in GIS technologies, including the

development of mapping tools and high-resolution remote sensing imaging. Also covered is the increase in computer processing power and mobility and enhanced analytical capabilities for assessing the present conditions of natural systems and extrapolating from them to create accurate models of potential crisis conditions. This second edition also features a new section on cybersecurity and a new chapter on social media and disaster preparedness, response, and recovery has been added. Explores the role of technology in emergency planning, response, recovery, and mitigation efforts Explores applications of the Internet, telecommunications, and networks to emergency management, as well as geospatial technologies and their applications Reviews the elements of hazard models and the relative strengths and weaknesses of modeling programs Describes techniques for developing hazard prediction models using direct and remote sensing data Includes test questions for each chapter, and a solutions manual and PowerPoint slides are available on a companion website Technology and Emergency Management, Second Edition is a valuable working resource for practicing emergency managers and an excellent supplementary text for undergraduate and graduate students in emergency management and disaster management programs, urban and regional planning, and related fields.
