A Knock in the Attic John Russell, 2021-02-09 John Russell has been a highly regarded professional psychic for almost fifty years, reading for thousands of clients in over thirty countries around the world. As a paranormal investigator, he has physically experienced over eight hundred paranormal manifestations. *A Knock in the Attic: True Ghost Stories & Other Spine-chilling Paranormal Adventures* is his story, not only about his psychic awakening and the abundance of mind-blowing otherworldly confrontations he's experienced but also about the point at which he lost his faith and gave up on himself, his psychic gifts, and the beings on the Other Side. But they didn't give up on him. A prequel of sorts to Russell's first book, *Riding with Ghosts, Angels, and the Spirits of the Dead*, *A Knock in the Attic* begins with his first paranormal experience when he was five years old and follows the highlights of his development as a psychic and paranormal investigator into adulthood, explaining what it's like to grow up psychic, to be inundated with real spiritual experiences, and, yes, sometimes even to question your spiritual gifts and the guidance from the Other Side.

Ford Model T Coast to Coast Tom Cotter, 2018-05-15 A photo-filled account of traveling the Lincoln Highway in a century-old automobile, and contemplating a future of self-driving cars: [An] epic road trip. —USA Today Driverless cars are on the horizon, but before the world falls asleep at the wheel, let's look back down the road from whence we have come. *Ford Model T Coast to Coast* documents the cross-country adventure of two brave drivers as they pilot a hundred-year-old Model T on a 3,000-mile journey from the Atlantic Ocean to the Pacific Coast. This book is as much a contemplation of early-twentieth-century American life as it is a fond farewell to the automotive age. Can the car still be the vehicle of freedom and discovery when we're no longer in command? Or will we finally be able to fully appreciate the scenery rushing past? Accompanied by Michael Alan Ross' evocative photography, Tom Cotter stops in small towns, meets local people, and hears their stories about cars, travel, and life. The two also explore back roads adjacent to his main route, the Lincoln Highway—the first transcontinental road. Significant cross-country runs, such as those by speed-record setter Cannonball Baker and literary adventurers Jack Kerouac, John Steinbeck, and Bill Bryson, are considered in light of the driverless future. Cotter also drives some of the same roads that a young Edsel Ford traveled in his father's Model T upon high school graduation in 1917. In addition to the central road trip, Cotter visits interesting automotive and transport museums as well as keepers of the flame such as Model T clubs, mechanics, junkyards, and collectors across the country. He also records the numerous trials and tribulations in keeping a very old car operating on a

very long journey—something the driverless car of the future is unlikely to encounter.

Coast to Coast Ryan Pancoast,2006-05-01 Tells the story of the 2004 Rochester Institute of Technology cross country team's run 2,730 miles from the Pacific to the Atlantic. Their goal, which they achieved, was to better the record time for such a run set 25 years earlier by another RIT team. The story is told by the runners themselves. Also includes photographs taken by Matt Hartman and sketches by Ryan Pancoast.

Mad as Hell George Noory,2017-06-27 As the candidacies of Donald Trump and Bernie Sanders have proven, Americans are mad as hell about the problems facing our country. George Noory hears these problems every night, all night, and this is how he would deal with them. This is Mad as Hell. --- I'm angry because sometimes I feel like a stranger in America. We live in a dangerous world that is sorely in need of an effective political system that deals with the ongoing destruction of the middle class, an aging population, permeable borders, technology out of control, and shocking, mindless violence and wars. But we can bring back the America that makes us proud. It will take hard work and pulling together as a society. People are stressed because they don't know where the world is heading or where it is taking them. With a radio show heard by millions, I consider myself not an entertainer or someone to dictate how we should live, but a facilitator who can help guide the path chosen. I have been called a voice in the darkness. The concepts I deal with are not only on the cutting edge of science and technology, but with subjects as provocative as aliens and angels, as challenging as supervolcanos and the fire and brimstone of the End Time. Join me by reading why I am mad . . . and maybe you will get as angry as I am about conditions in the country we love. George Noory has put together the ultimate after-midnight cookbook: Late-Night Snacks for late-night radio. Whether you're hankering for nostalgic treats, like homemade Toaster Tarts or rib-sticking Dumplings Love You, or something more exotic, like spicy Hurried Curry Pockets or Asian Fusion Salad, George Noory shows you how to whip up quick, delicious snacks with whatever ingredients are lying around your kitchen in the wee hours. Featuring more than a hundred of his personal, tasty, and above all easy recipes,

Worker in the Light George Noory, William J. Birnes, 2010-07-01 George R. Noory is the host of America's top late-night radio talk show, Coast to Coast AM, which is broadcast to more than 500 radio stations in the U.S. and Canada and streamed over the Internet to more than ten million people, five nights a week. Noory truly believes that there are forces, both good and evil, at work on Earth, forces that can be harnessed by human beings. Fueled by a transcending experience at a very young age, Noory turned his life into an investigation of the possibilities and influence of such forces, and how we can use them to enhance our lives. Now George Noory has woven his life's work into both an amazing memoir and a miraculous key that readers can use to unlock the secret to their own sensual transcendence and liberate their limitless potential. Through *Worker in the Light*, George Noory will show readers how to: *Unlock the secrets to unlimited spiritual growth *Transcend all doubts and fears *Shatter the prison walls of their five senses *Deploy the power of intuition to see the future *Free themselves from the confines of time *Facilitate the power of lucid dreaming Through easily understood, step-by-step instructions, and examples from his own life, George Noory shows how he has surpassed his own limitations and frustrations, how he has freed himself from doubts and fears, and how he glimpsed the right way out of life's desperate straits. The Humming Effect Jonathan Goldman, Andi Goldman, 2017-05-25 An accessible guide to the practice of conscious humming • Details conscious humming and breathing exercises from simple to advanced, including online access to examples of these practices • Examines the latest studies on sound, revealing how humming helps with stress levels, sleep, and blood pressure, increases lymphatic circulation, releases endorphins, creates new neural pathways in the brain, and boosts blood platelet production • Explores the spiritual use of humming, including its use as a sonic yoga technique and its role in many world traditions • Includes access to online examples, allowing you to experience the powerful vibratory resonance that humming can create Humming is one of the simplest and yet most profound sounds we can make. If you have a voice and can speak, you can hum. Research has shown humming to be much more than a self-soothing sound: it affects us on a physical level, reducing stress, inducing calmness, and enhancing sleep as well as lowering heart rate and blood pressure and producing powerful neurochemicals such as oxytocin, the “love” hormone. In this guide to conscious humming, Jonathan and Andi Goldman show that you do not need to be a musician or singer to benefit from sound healing practices—all you need to do is hum. They provide conscious humming and breathing exercises from simple to advanced, complete with online examples, allowing you to experience the powerful vibratory resonance that humming can create and harness its healing benefits for body, mind, and spirit. They explore the science behind sound healing, revealing how self-created sounds can literally rearrange molecular structure and how humming not only helps with stress levels, sleep, and blood pressure but also increases lymphatic circulation and melatonin production, releases endorphins, creates new neural pathways in the brain, and releases nitric oxide, a neurotransmitter fundamental to health and well-being. The authors show how sound can act as a triggering mechanism for the manifestation of your conscious intentions. They also examine the spiritual use of humming, including its use as a sonic yoga technique and its role in many world traditions, such as the Om, Aum, or Hum of Hindu and Tibetan traditions. Providing a self-healing method accessible to all, the authors reveal that, even if you have no musical ability, we are all sound healers.

Talking to the Dead George Noory, Rosemary Ellen Guiley, 2011-10-11 Throughout history, people have sought ways to contact the dead and spirits. Such experiences challenge beliefs and often set people on a path of deeper exploration, looking for validation—and ways to have controlled, direct contact. Do spirit communication devices really work? What are the prospects of someday being able to pick up a cell phone or sit in front of a webcam and talk to the Other Side? While proof of contact is still elusive, there is an abundance of tantalizing evidence and experience to inspire people. For the past century, inventors have been inspired by the spirits themselves to create telephone, video, radio, and computers to attempt real-time, two-way communication with the dead and other entities. *Talking to the Dead* explores the colorful history and personalities behind spirit communications, weaving together spirituality, metaphysics, science, and technology. It examines the idea that new technology can connect to the ancient and universal wisdom of the music of the spheres; that contact with the spirit realms can be made through the vibrations of sound. Night Talk George Noory, 2016-07-26 A late-night talk-show host fascinated by the paranormal becomes entangled in a deadly conspiracy in *Night Talk*, from #1 all-night radio host George Noory. Greg Nowell is a voice in the darkness—a late-night talk-show host who tackles controversial subjects, from angels to aliens and government agencies so deep in shadow that the puppet strings they use to exercise control are invisible. His radio show is a world of the paranormal and paranoia, where claims of alien abductions, Big Foot sightings, and a mysterious world government are the norm. Greg's

world explodes when government agents accuse him of having received ultra-secret files from Ethan Shaw, a hacker intent on exposing a secret cabal with tentacles throughout the government. Greg knows nothing about the files. When Shaw is killed and the evidence points to Greg, the radio personality goes on the run, stalked by a demented assassin. As he tries to unravel the deadly secrets the hacker uncovered, Greg is helped by Alyssa Neal, a mysterious woman who says Shaw also dragged her into the boiling cauldron of intrigue. Greg realizes his paranoia is really heightened awareness of strange machinations. He seeks help from callers to his show who don't trust the government, have gone under the radar, or are angry and paranoid about the vast gathering of information and invasions of privacy by government agencies. The Coast-to-Coast Murders James Patterson,J. D. Barker,2020-09-21 A detective and an FBI agent join forces on what seems like an open-and-shut case—but a new rash of killings sends them on a pulse-pounding race against time in this intense thriller. Michael and Megan Fitzgerald are siblings who share a terrifying past. Both adopted, and now grown—Michael is a long-haul truck driver, Megan a college student majoring in psychology—they trust each other before anyone else. They've had to. Their parents are public intellectuals, an Ivy League clinical psychologist and a renowned psychiatrist, and they brought up their adopted children in a rarefied, experimental environment. It sheltered them from the world's harsh realities, but it also forced secrets upon them, secrets they keep at all costs. In Los Angeles, Detective Garrett Dobbs and FBI Agent Jessica Gimble have joined forces to work a murder that seems like a dead cinch. Their chief suspect is quickly identified and apprehended—but then there's another killing just like the one they've been investigating. And another. And not just in Los Angeles—the spree spreads across the country. The Fitzgerald family comes to the investigators' attention, but Dobbs and Gimble are at a loss—if one of the four is involved, which Fitzgerald might it be? From coastal California to upstate New York, Dobbs and Gimble race against time and across state lines to stop an ingenious and deeply deranged killer—one whose dark and twisted appetites put them outside the range of logic or experience.
