**Sport and Society in Global France** Cathal Kilcline, 2019 From Zinedine Zidane to Michael Jordan and from Marie-José Pérec to Lance Armstrong, over the last thirty years, numerous individuals have emerged through the global sports industry to capture the imagination of the French public and become touchstones for the discussion of a host of social issues. This book provides new insights into the evolution of the global sporting spectacle through a study of star athletes, emblematic organisations, key locations, and celebrated moments in French sport from the mid-1980s to the present day. It draws on a wide range of sources, from film, television, advertising, newspapers, and popular music to cover key developments in sports including football, motorsport, basketball, and cycling. Sport here emerges as a privileged site for the discussion of the nature of contemporary nationhood, as well as for the performance of France's postcolonial heritage. Simultaneously, sport provides a platform for the playing out of concerns over globalisation, and, in a time of post-industrial uncertainty, for nostalgic reminiscences of an apocryphal bygone era of social cohesion. The exploration of these themes leads to new understandings of the ways sport influences and is implicated in broader social and cultural concerns in France today.

**Criminal Liability for Serious Traffic Offences** Alwin van Dijk, Hein Wolswijk, 2017-12-17 The criminal law on serious traffic offenses presents

legislators with numerous controversial issues. One such issue is when severe consequences are matched with low moral culpability. How should the law deal with a driver who kills someone because she failed to see the person when looking? Another controversial issue concerns highly culpable behavior that remains without serious consequences. How should the law cope with a driver who nearly kills someone when overtaking recklessly? The traffic context generates many hard cases that call the outermost boundaries of general doctrinal concepts like intent, negligence, or causation into question. This book contains an international collection of essays on criminal liability for serious traffic offenses. With a focus on England/Wales, the Netherlands, France, Germany, and Spain, the book reveals that there are enormous differences in both drafting and interpretation of serious traffic offenses. Additionally, it elaborates on the role of culpability and harm in sentencing, traffic-psychological insights relevant to accident causation, and the concept of conditional intent in relation to extremely dangerous traffic behavior. **Examining the Socio-Technical Impact of Smart Cities** Annansingh, Fenio, 2021-03-18 Smart city development and governance is a technological issue and a complex mechanism of the political understanding of technology, environmental interest, and urban interactions in terms of both economic gains and other public values. A smart city is defined by the technology it possesses and how it integrates and uses that technology to improve operational efficiency, propel citizen engagement, and justify inward migration. Understanding the principles and policies at work creates a full understanding of smart cities. *Examining the Socio-Technical Impact of Smart Cities* is an essential publication that enhances our theoretical understanding of the socio-technical impact of smart cities by promoting the conceptual interactions between social and governmental structures (people, task, structure) with new technologies. Highlighting a wide range of topics including community inclusion, cultural innovation, and public safety, this book is ideally designed for urban planners, entrepreneurs, engineers, government officials, policymakers, academicians, researchers, and students.

*French Cycling* Hugh Dauncey, 2012-11-21 An Open Access edition of this book

is available on the Liverpool University Press website and the OAPEN library. French Cycling: a Social and Cultural History aims to provide a balanced and detailed analytical survey of the complex leisure activity, sport, and industry that is cycling in France. Identifying key events, practices, stakeholders and institutions in the history of French cycling, the volume presents an interdisciplinary analysis of how cycling has been significant in French society and culture since the late Nineteenth century. Cycling as Leisure is considered through reference to the adoption of the bicycle as an instrument of tourism and emancipation by women in the 1880s, for example, or by study of the development in the 1990s of long-distance tourist cycle routes. Cycling as Sport and its attendant dimensions of amateurism/professionalism, national identity, the body and doping, and other issues is investigated through study of the history of the Tour de France, the track-racing organised at the Vélodrome d'hiver in Paris in the 1920s and 1930s and other emblematic events. Cycling as Industry and economic activity is considered through an assessment of how cycling firms have contributed to technological innovation at various junctures in France's economic development. Cycling and the Media is investigated through analysis of how cyclesport has contributed to developments in the French press (in early decades) but also to new trends in television and radio coverage of sports events. Based on a very wide range of primary and secondary sources, the volume aims to present in clear language an explanation of the varied

significance of cycling in France over the last hundred years.

**The Politics of Written Language in the Arab World** ,2017-07-31 The Politics of Written Language in the Arab World connects the fascinating field of contemporary written Arabic with the central sociolinguistic notions of language ideology and diglossia. Focusing on Egypt and Morocco, the authors combine large-scale survey data on language attitudes with in-depth analyses of actual language usage and explicit (and implicit) language ideology. They show that writing practices as well as language attitudes in Egypt and Morocco are far more receptive to vernacular forms than has been assumed. The individual chapters cover a wide variety of media, from books and magazines to blogs and Tweets. A central theme running through the contributions is the social and political function of “doing informality” in a changing public sphere steadily more permeated by written Arabic in a number of media.

**Observing Conflict Escalation in World Society** Richard Bösch,2023-09-30 How do conflicts escalate? This is one of the major questions in conflict research. To offer further answers, Richard Bösch follows a tripartite agenda: First, he develops a constructivist methodology for the study of conflict escalation embedded in a Luhmannian systems theoretical world society perspective. Bösch argues that conflicts can be observed as social systems and he looks at the process of conflict escalation by analysing communication. Second, this analysis offers two case studies: the Maidan protests in Ukraine 2013-2014 and Mali's crisis 2010-2012. Third, it gives insights on how systems theoretical research can be beneficial for Peace and Conflict Studies.

*Introduction to Sustainable Transports* Bernard Favre, 2014-02-19 Transport systems have to meet the mobility needs of people and commodities on all scales, from the local to the global level. Concerns about the energy, fumes and sound emissions produced, and about the safety, service quality, intelligence and lifecycle of the systems, etc. can all be included in a systemic approach. This approach can contribute to the development of sustainable solutions, for individual vehicles as well as for transport systems. Derived from an approach combining the social and physical sciences,

these solutions result from the integration of physical objects, services and organizational processes, which involve several actors. Their harmonious organization contributes to the development of more virtuous transport systems for the future of urban and inter-urban mobility.

### **Des nanotechnologies aux technologies émergentes** Stéphanie

Lacour, 2013-02-11 La régulation des technologies émergentes soulève, dans les pays industrialisés, des attentes considérables de la part des publics-riverains, salariés ou encore consommateurs - potentiellement exposés aux risques qu'elles font naître, tout comme des industriels explorant de nouveaux marchés, et aussi des pouvoirs publics, garants du développement responsable de celles qu'ils tiennent des sources cruciales pour la croissance économique du 21<sup>e</sup> siècle. Le cycle de vie des nano-produits a été scruté pendant trois années dans le cadre du programme NanoNorma par une équipe interdisciplinaire de chercheurs rassemblant des juristes de toutes spécialités, mais aussi des chercheurs en nanosciences et une entreprise du secteur des nanomatériaux, la société Arkema. Toujours en construction, leur cadre normatif s'illustre par l'hétérogénéité des normes engagées et la persistance de doutes forts quant à la stratégie normative la plus appropriée. Cet ouvrage dresse le bilan des efforts de régulation entrepris en France pour asseoir le développement responsable des nanotechnologies. Des brevets, nombreux, sur lesquels s'appuie leur développement, à l'information des consommateurs, en passant par la protection des salariés qui participent à leur production et de l'environnement, toutes les étapes de leur cycle de vie sont étudiées, de façon prospective, en s'appuyant sur les données les

plus récentes de leur régulation. Se fondant sur une analyse comparatiste de ce bilan, les auteurs explorent ensuite les défis qui se dressent, pour l'avenir, sur la route des technologies émergentes appelées de ses vœux par la société de la connaissance européenne.
