Beginning Java 8 Language Features Kishori Sharan, 2014-08-18 *Beginning Java 8 Language Features* covers essential and advanced features of the Java programming language such as the new lambda expressions (closures), inner classes, threads, I/O, Collections, garbage collection, streams, and more. Author Kishori Sharan provides over 60 diagrams and 290 complete programs to help you visualize and better understand the topics covered in this book. The book starts with a series of chapters on the essential language features provided by Java, including annotations, inner classes, reflection, and generics. These topics are then complemented by details of how to use lambda expressions, allowing you to build powerful and

efficient Java programs. The chapter on threads follows this up and discusses everything from the very basic concepts of a thread to the most advanced topics such as synchronizers, the fork/join framework, and atomic variables. This book contains unmatched coverage of Java I/O, including NIO 2.0, the Path API, the FileVisitor API, the watch service and asynchronous file I/O. With this in-depth knowledge, your data- and file-management programs will be able to take advantage of every feature of Java's powerful I/O framework. Finally, you'll learn how to use the Stream API, a new, exciting addition to Java 8, to perform aggregate operations on collections of data elements using functional-style programming. You'll examine the details of stream processing such as creating streams from different data sources, learning the difference between sequential and parallel streams, applying the filter-map-reduce pattern, and dealing with optional values.

Teaching Life Differently Judith (J.C.) Greeley, Melinda Doyle

McCall,2018-04-17 Children who are sighted learn concepts and gain experience through incidental learning, the observation of events and interactions in their environment. Students with visual impairment need to be systematically, sequentially, and concretely taught through hands-on-experiences. Historically, students got this learning through channels other than schools. The teaching of recreation, adaptive sports, social life opportunities, and career education require this specific systematic approach. Individuals with vision impairment may also require specific interventions to learn independent living skills, self-advocacy, and community relationships.

In this first critical collection on this exciting new subfield, leading researchers tackle key questions pertaining to knowledge, evidence, and rationally justified belief. *Advances in Experimental Epistemology* addresses central epistemological issues such as whether subjects in high stakes situations need to possess stronger evidence in order to have knowledge;whether and in what respects knowing that p depends upon what actions one undertakes in light of p; how philosophers should respond to deep and pervasive disagreement about particular cases of knowledge and belief and the methodological challenges to epistemology that are presented by disagreement in epistemic intuitions.As well as moving research in epistemology forward, this cutting-edge volume helps define the future course of research in experimental philosophy.
