Digital Literacies Mark Pegrum,Nicky Hockly,Gavin Dudeney,2022-05-11 Dramatic shifts in our communication landscape have made it crucial for language teaching to go beyond print literacy and encompass the digital literacies which are increasingly central to learners' personal, social, educational and professional lives. By situating these digital literacies within a clear theoretical framework, this book provides educators and students alike with not just the background for a deeper understanding of these key 21st-century skills, but also the rationale for integrating these skills into classroom practice. This is the first methodology book to address not just why but also how to teach digital literacies in the English language classroom. This book provides: A theoretical framework through which to categorise and prioritise digital literacies Practical classroom activities to help learners and teachers develop digital literacies in tandem with key language skills A thorough analysis of the pedagogical implications of developing digital literacies in teaching practice A consideration of exactly how to integrate digital literacies into the English language syllabus Suggestions for teachers on how to continue their own professional development through PLNs (Personal Learning Networks), and how to access teacher development opportunities online. This book is ideal for English language teachers, English language learners of all ages and levels, academics and researchers of all age groups and levels, academics and students researching digital literacies, and anyone looking to expand their understanding of digital literacies within a teaching framework.

How collages reveal your deepest thoughts: A guide to consumers' minds Philipp Pachler,2014-02-01 A deeper understanding of how consumers think, feel and act is vital to the success of management and provides valuable information for managerial decision making in many areas of business. One key to this understanding is brand knowledge, which is the representation of a brand in consumers' minds. Unfortunately, a substantial amount of relevant knowledge within people's minds is unconscious and cannot be retrieved, accessed and recalled by consumers. As a consequence, certain methods of retrieval are required, such as projective techniques. The method this book works with is the collage technique, an expressive projective method. The aim of this book is to create a multi-layered approach that facilitates the interpretation of collages without the need of any additional information given by the participants, based on metaphor analysis, color theory, a communication model and structural analysis.

Experimental Self-Portraits in Early French Photography Jillian Lerner,2020-11-16 This book explores a range of experimental self-portraits made in France between 1840 and 1870, including remarkable images by Hippolyte Bayard, Nadar, Duchenne de Boulogne, and Countess de Castiglione. Adapting photography for different social purposes, each of these pioneers showcased their own body as a living artifact and iconic attraction. Jillian Lerner considers performative portraits that exhibit uncanny transformations of identity and embodiment. She highlights the tactical importance of photographic demonstrations, promotions, conversations, and the mongrel forms of montage, painted photographs, and captioned specimens. The author shows how photographic practices are mobilized in diverse cultural contexts and enmeshed with the histories of art, science, publicity, urban spectacle, and private life in nineteenth-century France. Tracing calculated and creative approaches to a new medium, this research also contributes to an archaeology of the present. It furnishes a prehistory of the "selfie" and offers historical perspectives on the forces that reshape human perception and social experience. This interdisciplinary study will appeal to readers interested in the history of photography, art, visual culture, and media studies.

Teaching English culture through CALL Oana Samson, Generally, in language teaching, the emphasis is on the development of four separate skills: listening comprehension, reading comprehension, writing, and

speaking. However, language teachers and scholars often refer to a fifth skill, which is culture. It is difficult to imagine language teaching without referring in one way or another to the target culture; therefore, culture has always been present in the teaching process. But what does this skill imply and how should it be included into the teaching-learning process? Compared to grammar or vocabulary, culture is more difficult to define; therefore, it is not clear what and how it should be taught. "TEACHING ENGLISH CULTURE THROUGH C.A.L.L." se adreseaza studentilor, cadrelor didactice inscrie la diverse examene de perfectionare sau interesate de alternative in predare. Lucrarea este unica prin multitudinea de situatii prezentate, abordarea unei teme de actualitate in contextul predarii prin intermediul calculatorului si al integrarii culturii in predarea limbii engleze precum si prin utilitatea planurilor de lectii ce insotesc partea aplicativa.

Writing for Performance Anne Harris, Stacy Holman - Jones, 2016-07-27 The Teaching Writing series publishes user-friendly writing guides penned by authors with publishing records in their subject matter. Harris and Holman Jones offer readers a practical and concise guide to writing a variety of dynamic texts for performance ranging from playscripts to ensemble and multimedia/hybrid works. Writing for Performance is structured around the 'tools' of performance writing—words, bodies, spaces, and things. These tools serve as pivots for understanding how writing for performance must be conducted in relation to other people, places, objects, histories, and practices. This book can be used as a primary text in undergraduate and graduate classes in playwriting, theatre, performance studies, and creative writing. It can also be read by ethnographic, arts-based, collaborative and community performance makers who wish to learn the how-to of writing for performance. Teachers and facilitators can use each chapter to take their students through the conceptualizing, writing, and performing/creating process, supported by exemplars and writing exercises and/or prompts so readers can try the form themselves. "What a welcome, insightful and much-needed book. Harris and Holman Jones bring us to an integrated notion of writing that is embodied, felt, breathed and flung from stage to page and back again. Writing for Performance will become a crucial text for the creation of the performance and theater that the 21st Century will need." – Tim Miller, artist and author of *Body Blows: Six Performances* and *1001 Beds: Performances, Essays and Travels* "No prescriptions here. In the hands of this creative duo we find a deep and abiding respect for the many creative processes that might fuel writing and performance that matters. From the deep wells of their own experiences, Harris and Holman Jones offer exercises that are not meant to mold the would-be writer, but spur them on to recognize their latent writing/performative selves." – Kathleen Gallagher, Distinguished Professor of Curriculum, Teaching, and Learning, University of Toronto Anne Harris, PhD, is a senior lecturer at Monash University (Melbourne), and researches in the areas of arts, creativity, performance, and diversity. Stacy Holman Jones, PhD, is Professor in the Centre for Theatre and Performance at Monash University (Melbourne) specializing in performance studies, gender and critical theory and critical qualitative methods.

Belonging in Europe - The African Diaspora and Work Caroline Bressey, Hakim Adi, 2013-09-13 This publication does not just mark the presence of black people in Europe, but brings research to a new stage by making connections across Europe through the experience of work and labour. The working experience for black peoples in Europe was not just confined to ports and large urban areas – often the place black people are located in the imagination of the European map both today and historically. Work took place in small towns, villages and on country estates. Until the 1800s enslaved Africans would have worked alongside free blacks and their white peers. How were these labour relations realised be it on a country estate or a town house? How did this experience translate into the labour movements of the twentieth century? These are some of the questions the essays in this collection address, contributing to new understandings of European life both historically and today. This book was originally published as a special issue of *Immigrants and Minorities*.

web may 8 2017 after a time a reversible reaction in a closed system can reach what we call a dynamic equilibrium this is where the forwards reaction reactants reacting to produce the products and the backwards reaction products reacting to reform the reactants are occurring at the same rate

the equilibrium constant k article khan academy - Sep 04 2022

web all reactions tend towards a state of chemical equilibrium the point at which both the forward process and the reverse process are taking place at the same rate since the forward and reverse rates are equal the concentrations of the reactants and products are constant at equilibrium

equilibrium in reversible chemical reactions jack westin - Jun 01 2022

web in a chemical equilibrium the forward and reverse reactions occur at equal rates and the concentrations of products and reactants remain constant law of mass action the law of mass action links the rate of a chemical reaction as proportional to the concentrations of the reactants and products in a chemical reaction for a chemical reaction

reaction rates and chemical equilibrium usu - Mar 30 2022

web equilibrium the rate of the forward reaction and the rate of the reverse reaction are equal at equilibrium both reactants and products are present some reaction mixtures contain mostly reactants and form only a few products at equilibrium some reaction mixtures contain mostly products and remain mostly reactants at equilibrium

chemical equilibrium part 1 forward and reverse reactions - Feb 26 2022

web chemical equilibrium part 1 forward and reverse reactions understanding the concept of chemical equilibrium is critical to following several of the discussions that we have in bis2a and indeed throughout biology and the sciences
