The Last Lecture Randy Pausch,2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Seeing and Believing Ellen T. Armour,2023-07-04 Social media platforms are often denounced as “bubbles” or “echo chambers.” In this view, what we see tends to reinforce what we already believe, and what we already believe shapes what we see. Yet social movements such as Black Lives Matter rely heavily on the widespread dissemination of digital photographs and videos through social media. In at least some cases, visual images can challenge normative and normalized ways of grasping the world and prompt their viewers to see differently—and even bring people together. Seeing and Believing marshals religious resources to recast the significance of digital images in the struggle for social justice. Ellen T. Armour examines what distinguishes digital photography from its analogue predecessor and places the circulation of digital images in the broader context of virtual visual cultures. She explores the challenges and opportunities that visually saturated social media landscapes present for users and organizers. Despite the power of digital platforms and algorithms, possibilities for disruption and resistance emerge from how people engage with these systems. Armour offers ways of seeing drawn from Christianity and found in other religious traditions to help us break with entrenched habits and rethink how we engage with the images that grab our attention. Developing theological perspectives on the power and peril of photography and technology, Seeing and Believing provides suggestions for navigating the new media landscape that can spark what Armour calls “photographic insurrection.”
