Principles Ray Dalio, 2018-08-07 #1 New York Times Bestseller “Significant...The book is both instructive and surprisingly moving.” —The New York Times Ray Dalio, one of the world’s most successful investors and entrepreneurs, shares the unconventional principles that he’s developed, refined, and used over the past forty years to create unique results in both life and business—and which any person or organization can adopt to help achieve their goals. In 1975, Ray Dalio founded an investment firm, Bridgewater Associates, out of his two-bedroom apartment in New York City. Forty years later, Bridgewater has made more money for its clients than any other hedge fund in history and grown into the fifth most important private company in the United States, according to Fortune magazine. Dalio himself has been named to Time magazine’s list of the 100 most influential people in the world. Along the way, Dalio discovered a set of unique principles that have led to Bridgewater’s exceptionally effective culture, which he describes as “an idea meritocracy that strives to achieve meaningful work and meaningful relationships through radical transparency.” It is these principles, and not anything special about Dalio—who grew up an ordinary kid in a middle-class Long Island neighborhood—that he believes are the reason behind his success. In Principles, Dalio shares what he’s learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book’s hundreds of practical lessons, which are built around his cornerstones of “radical truth” and “radical transparency,” include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as creating “baseball cards” for all employees that distill their strengths and weaknesses, and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, Principles also offers a clear, straightforward approach to decision-making that Dalio believes anyone can apply, no matter what they’re seeking to achieve. Here, from a man who has been called both “the Steve Jobs of investing” and “the philosopher king of the financial universe” (CIO magazine), is a rare opportunity to gain proven advice unlike anything you’ll find in the conventional business press.

The Conquest of Bread Peter Kropotkin,2021-07-21T00:29:42Z The Conquest of Bread is a political treatise written by the anarcho-communist philosopher Peter Kropotkin. Written after a split between anarchists and Marxists at the First International (a 19th-century association of left-wing radicals), The Conquest of Bread advocates a path to a communist society distinct from Marx and Engels's Communist Manifesto, rooted in the principles of mutual aid and voluntary cooperation. Since its original publication in 1892, The Conquest of Bread has immensely influenced both anarchist theory and anarchist praxis. As one of the first comprehensive works of anarcho-communist theory published for wide distribution, it both popularized anarchism in general and encouraged a shift in anarchist thought from individualist anarchism to social anarchism. It was also an influential text among the Spanish anarchists in the Spanish Civil War of the 1930s, and the late anarchist theorist and anthropologist David Graeber cited the book as an inspiration for the Occupy movement of the early 2010s in his 2011 book Debt: The First 5,000 Years. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

The Ten Greatest Revivals Ever Elmer L. Towns,Douglas Porter,2004-01-31 Over the centuries God has touched the earth with revival, lifting men and women into his presence in extraordinary ways. And in some epochs the divine hand seems to have rested on us longer and to have caused more profound changes in the church and the culture. Authors Towns and Porter have studied revival eras throughout history in order to identify the ten which seem to have been the greatest of all time. If you want to understand revival and if you long to see revival in our day, this book will speak to both your mind and your heart.

The Subterranean Forest Rolf Peter Sieferle,2001 This work studies the historical transition from the agrarian solar energy regime to the use of fossil energy, which has fuelled the industrial transformation of the last 200 years. The author argues that the analysis of historical energy systems provides an explanation for the basic patterns of different social formations. It is the availability of free energy that defines the framework within which socio-metabolic processes can take place. This thesis explains why the industrial revolution started in Britain, where coal was readily available and firewood already depleted or difficult to transport, whereas Germany, with its huge forests next to rivers, was much longer dependent on a traditional solar energy regime.
