**Medieval Bridges of Southern England** Marshall G. Hall,2022-09-15 Throughout history rivers have been a hub for human settlement and have long been a key part of local livelihoods, history and culture, as well as still playing a present-day role in providing services and leisure to people who live around them. It is no coincidence that all four of the earliest human civilizations were formed on great rivers: the Nile, Euphrates, Indus and Yellow rivers all saw great human aggregation along them. The most ancient and vital architectural structures linked to the use of rivers are bridges. There are a wide range of medieval bridge structures, some very simple in their construction, to amazing triumphs of design and engineering comparable with the great churches of the period. They stand today as proof of the great importance of transport networks in the Middle Ages and of the size and sophistication of the medieval economy. These bridges were built in some of the most difficult places, across broad flood plains, deep tidal waters, and steep upland valleys, and they withstood all but the most catastrophic floods. Yet their beauty, from simplistic to ornate, remains for us to appreciate. Medieval Bridges of Southern England has been organized geographically into tours and covers the governmental regions of Southwest England, London, and Southeast England. There are exactly 100 bridges included. There is an introduction and background information about the medieval period of English history at the beginning and there are beautiful full color photographs throughout the book.

Medieval Bridges of Middle England has been organized geographically into tours and covers the governmental regions of East of England, East Midlands, and West Midlands. There are 62 bridges included and beautiful full color photographs of each bridge are included. A brief history is incorporated with each bridge. Additionally, information about the construction, materials used, and unique features are related, as well as historically relevant documents and images. Directions to each bridge and local attractions are also given. There are literally hundreds of bridges in England that meet the criteria for inclusion in this roll of honor for senior bridges. They vary vastly in size, style, and materials. Most are stone and a very few are brick. We have lost many of our older bridges to the ravages of time and the modern practice of culvertisation and urban development. A few of our older bridges remain though, and their beauty and pivotal role in our history is starting to be recognized.

**Seventeenth-century Water Gardens and the Birth of Modern Scientific thought in Oxford** Stephen Wass,2022-12-02 Based on a decade of archaeological investigation and historical research, this book tells the story of the Copes of Hanwell Castle in north Oxfordshire and the creation of a garden with links to the development of scientific thinking in Oxford in the late seventeenth century. New research using Robert Plot's Natural History of Oxfordshire as a starting point has uncovered details of a remarkable family and their rise and tragic downfall, their social circle, that included some great names in the development of early scientific thinking, and their garden that in effect became a place dedicated to the wonders of technology. The complex tale weaves together the activities of a royalist agent, Richard Allestree, a prodigious musician, Thomas Baltzar, John Claridge, a Hanwell Shepherd with a penchant for weather forecasting, and Sir Anthony Cope who in an atmosphere of secrecy and distrust began to gather together a community that eventually was named by Plot as The New Atlantis, a reference to a book published earlier in the century by Sir Francis Bacon in which he suggests a model for a Utopian science-focused society. The book also chronicles the program of archaeological excavation that has uncovered several unusual garden features and, most significantly of all, describes in detail the unique collection of seventeenth-century terracotta garden urns, an assemblage that is unparalleled in post-medieval archaeology. This collection was destroyed in a single episode of vandalism around 1675 and has been preserved in deeply buried deposits of mud and silt. Their analysis and reconstruction is opening new insights into the decorative schemes of seventeenth-century gardens. There is coverage of other gardens of the period and their surviving features as well as an examination of early science and how gardens impacted on its development in many ways.

**From Hunter-Gatherers to Early Christians** Julian Maxwell Heath,2023-02-23 Jutting out some thirty miles into the Irish Sea, from the western edge of Snowdonia, the Llŷn Peninsula, in north-west Wales, is renowned for its stunning beaches and countryside, with much of its landscape designated as an Area of Outstanding Natural Beauty. The peninsula is also home to a remarkable and abundant collection of archaeological sites and monuments, some of national importance, which bear witness to the ancient societies who once inhabited this narrow finger of land on the western fringe of Britain. This abundantly illustrated book examines this rich corpus of archaeological evidence, beginning with the faint but fascinating traces that Mesolithic hunter-gatherers have left in the landscape of the Llŷn Peninsula and ending in the early medieval period, with about 9,000 years of human habitation thus covered in its pages. In the course of the book, we will encounter a wealth of fascinating archaeological evidence, which includes impressive megalithic tombs and an axe 'factory' from the Neolithic;

burial mounds and mysterious standing stones from the Early Bronze Age; rural settlements and magnificent hillforts occupied in the Iron Age and Romano–British period; and memorial stones erected by early Christian communities. Much more besides will be found in the pages of this volume, which throws considerable light on the ancient peoples of the Llŷn Peninsula, and the rich archaeological heritage of this special part of the United Kingdom, which has much to offer those who are interested in the distant lives of our ancestors.

*Viking Migration and Settlement in East Anglia* David Boulton,2023-09-28 This book shows how analysis of Scandinavian-influenced place-names in their landscape contexts can provide crucial new evidence of differing processes of Viking migration and settlement in East Anglia between the late ninth and eleventh centuries. The place-names of East Anglia have until now received little attention in the academic study of Viking settlement. Similarly, the question of a possible migration of settlers from Scandinavia during the Viking period was for many years dismissed by historians and archaeologists – until the recent discovery by metal-detectorists of abundant Scandinavian metalwork and jewellery in many parts of East Anglia. David Boulton has synthesised these two previously neglected elements to offer new insights into the processes of Viking settlement. This book provides the first comprehensive analysis of Scandinavian-influenced place-names in East Anglia. It examines their different categories linguistically and explores the landscape and archaeological contexts of the settlements associated with them, with the aid of GIS-generated maps. Dr Boulton shows how the process of Viking settlement was influenced by changes in rural society and agriculture which were then already occurring in East Anglia, such as the late Anglo-Saxon expansion of arable farming and the associated recolonisation of the inland clay plateau. These developments resulted in patterns of place-name formation which differ significantly from some of the previously accepted, orthodox interpretations of how Scandinavian-influenced place-names (especially those containing the bý and thorp elements, and the ‘Grimston-hybrids’) came into being in the Danelaw. In view of these discrepancies, David Boulton proposes an innovative, hypothetical model for the formation of the Scandinavian-influenced place-names in East Anglia, which explores differing patterns and phases of Viking settlement in the region and the possible pathways of migration that preceded them.
