Color-blindness Benjamin Joy Jeffries,1879

Ishihara Test Chart 24 Plate Edition By Prof N L Shraman,2019-10-09 The original Ishihara color blindness test was introduced in early last century and since then, it is by far the most well known color vision deficiency test all around the world. Dr. Shinobu Ishihara from Japan produced three different test sets which are widely used and which all based on the same pseudoisochromatic plates. This test is actually designed to be used in a booklet and is usually executed by an eye doctor. But I have made an online version of the test, available right here. The online test is based on the 24 plates edition and will give you a little feedback at the end of the test. As this test is only made to check for red-green color blindness, any other form of CVD can not be detected. And at the end if you like you can even share your test result with your friends. This way they can see how you performed and try the test themselves if they like to. Be aware: This test consist of scanned plates. The colors are not exactly the same as in the original version. You also have to consider, that every computer screen has different color settings and therefore the test results might alter between different trials. If

you would like to see all the 24 plates in an overview, you can find them at Ishihara Test for Colour Deficiency 24 Plates Edition. COLORBLINDNESS/COLOURBLINDNESS/COLOR BLINDNESS/COLOUR BLINDNESS Accepted by leading authorities as a simple and accurate method for discovering congenital color blindness and red-green blindness, each in two forms, complete and incomplete. Includes four special plates for tests to determine the kind and degree of defect in color vision. Makes use of the peculiarity that in red-green blindness, blue and yellow appear remarkably bright compared with red and green. Color plates encased in specially designed album-type books for ease of handling. Detailed instructions included. Product Description The color plates are available in an album-type book for ease of handling. The books are printed in colour photo paper and are protected by international copyright.
