Professional Presentation Skills (A Handbook & Quick Reference Guide) GERARD ASSEY, The best of skills and competency levels will not help if one is unable to present or communicate effectively. In recent studies conducted in organizations, it was established that more than 60% of an executive's time was spent in communicating and presenting ideas, and in the case of top-level executives, it even exceeded 80% of the daily working time. One may have great knowledge of their field, excellent skills and enormous potential, but the world will know about these only if one can properly present themselves along with the qualities they have. The most successful employees are the ones who can communicate well. People with effective presentation skills know how to speak with confidence, conveying information in a clear, crisp and concise manner. Business leaders are often expected to present new ideas, new developments, new innovations, company policies and changes to staff, clients, partners, or even the public. Lots of money, time, planning, efforts and pressure can go into these presentations. Therefore organizations are constantly on the lookout for such ones who have strong presentation skills to take the lead on these kinds of projects. People who possess these skills will be more likely to get noticed by their superiors and climb their way up the corporate ladder faster. So whether you are a high-level manager or just an assistant, developing your presentation skills is one sure way to climb up the corporate ladder. Being a good presenter contributes a lot to individual growth, especially for those in the field of sales and marketing. This is because your presentation skills can help play a vital role in how well you are able to convince your audience. Further, being a good communicator gives you a chance to connect with people, thus enabling you to easily convey your ideas in the meeting room. And most times, it's your presentation that can actually help bag projects. For businessmen and entrepreneurs, a powerful presentation can mean funding for their startup or convincing stakeholders. For employees and freelancers, a great presentation means retaining a client or securing a new project. But many people think of presentation skills as only the delivery part. However, creating a great presentation requires much more than just public speaking skills. Being able to create and deliver a great presentation is something that most people need to know as it's an important way to express ideas and persuade audiences. One example is the understanding of your audience, which is an important trait of a good presenter. You need to be able to research properly, structure your ideas, write the presentation in an orderly flow, add visuals and design elements, and then only you get to present it. Presentation skills are therefore most vital for individual growth as well as the success of an organization on the whole and this book: "Professional Presentation Skills- A Handbook & Quick Reference Guide" will help you do just that, covering all that you would need to prepare and deliver an impactful presentation. You will find that the book has been laid out in a very unique manner, under 20 headings each beginning with a 'P' that will help equip you or your team with the best of skills to mark your presence and help you move forward and upward, soaring high!

() Letters from Governor Cooke and General Ward were read. : The Congress then resumed the consideration of the report of the Committee on Indian affairs, and the fame being gone through, was agreed to as follows; -; That the securing and preserving the friendship of the Indian nations, appears to be a subject of the utmost moment to these Colonies. That there is too much reason to apprehend, that administration will spare no pains to excite the several nations of Indians to take up arms against these Colonies; and that it becomes us to be very active and vigilant in exerting every prudent means to strengthen and confirm the friendly disposition towards these Colonies, which has long prevailed among the northern tribes, and which has been lately manifested by some of those to the southward. As the Indians depend on the Colonists for arms, ammunition and clothing, which are become necessary to their subsistence, that Commissioners be appointed by this Congress, to superintend Indian affairs in behalf of these Colonies. . That there be three departments of Indians, the northern, middle, and southern. The northern to extend so far south as to include the whole of the Indians known by the name of the Six Nations, and all the Indians northward of those nations. The southern department to extend so far north as to include the Cherokees, and all the Indians that may be to the southward of them. The middle to contain the Indian nations that lie between the other two departments. That That six commissioners be appointed for the southern department. That for each of the other two departments there be appointed three commissioners? Health Professional as Educator Susan B. Bastable, Pamela Gramet, Karen Jacobs, Deborah Sopczyk, 2010-10-06 Health Professional as Educator: Principles of Teaching and Learning focuses on the role of the health professional as educator of patients/clients, staff, and students in the clinical arena and classroom settings. It covers key principles of teaching and learning in both scope and depth, providing information from research and practice on the educational process, the characteristics of the learner, and techniques and strategies of teaching and learning. This comprehensive text covers important topics including literacy; compliance and motivation; assessment of learning needs, learning styles, and readiness to learn; behavioral objectives; teaching methods; instructional materials; technology in education; gender, socioeconomic, and cultural influences on learning; and evaluation of teaching and learning. Case studies are provided in each chapter for application of the concepts, review questions at the end of each chapter assist the reader with review of the important material presented, and an instructor's manual provides numerous materials for presentation and testing of content. Unlike other textbooks on education, this text contains a comprehensive coverage of literacy in the adult client population, including guidelines on how to develop and/or critique printed education materials for effective patient/client teaching. It also includes a chapter on writing behavioral objectives and developing teaching plans and learning contracts. There are unique topics included in this text, such as the teaching and learning of motor skills, how to access motivation, the concept of the learning curve, the concept of the spacing effect (massed and distributive learning); gender, socioeconomic, and cultural attributes of the learner, working with a wide variety of diverse populations, and the ethics of student-teacher and client-teacher relationships. - Publisher.

Scientist's Guide to Poster Presentations Peter J. Gosling, 2012-12-06 Scientific information is increasingly being communicated at both national and international scientific conferences in the form of poster presentations. A recent international conference, for example, which involved nearly 500 delegates from over 50 different countries, included information presented in 331 posters. Recent experience has shown, however, that the presentational standard of such posters, even at the international level, varies immensely. Individuals presenting well-designed, eye-catching, and engaging posters are at a distinct advantage in promoting their scientific information. In doing so, they also promote themselves as credible scientists, as well as promoting the reputation of their establishments and countries of origin. However, producing a poster of high quality requires considerable planning and the acquisition of specific presentational skills. This book provides detailed practical guidance on all aspects of presenting scientific information in the form of posters. It is assumed that the presenter has access, either at home, at work, or through libraries, to a computer or word processor, a color printer, and photocopiers. The book is intended to help scientists to gain poster presentational skills in a manner that enables adoption of an individualistic style of presenting information in a credible fashion. The book has relevance internationally and is primarily targeted at research workers, including postgraduate students and all scientific professionals who are required to present visual communication of scientific information.
