Training Workshop Essentials Robert W. Lucas,2009-04-27 Winner: Gold Axiom Business Book Award in Human Resources, 2010 This unique training resource offers trainers, educators, and facilitators a hands-on guide for designing and implementing training workshops and sessions that incorporate concepts learned from research on how the human brain best obtains, retains, and recalls information. By using this proven approach, trainers can create memorable workshops that are dynamic, fun, and effective events. The author shows how to design, develop, and deliver training from a whole-brain perspective that addresses the three different learning modalities (auditory, visual, and kinesthetic). Trainers can tap into accelerated learning strategies, address needs of different generational and diverse learners, and employ learner-tested techniques by applying key concepts from this book. This important book covers all the basics including selecting a topic specifically to address audience needs. It provides a step-by-step process for creating an outline, designing, developing, and using brain-friendly support materials, choosing the appropriate location (with the right equipment and furnishings), choosing the best time and date, and offers tips for presenting the content to learners in a creative and professional manner. Training Workshop Essentials offers brain-based strategies and techniques that go beyond typical training methods. These approaches will reach out and pull learners into the session's content and allow them to truly experience and retain the information long after the training ends.

Getting the Message Across Stéphane Faroult,2016-11-21 Create memorable presentations on technical and complex topics in slideware such as Microsoft PowerPoint and Apple's Keynote for Mac. Learn good pacing and rhythm as well as judicious use of special effects. Whether the goal is to help a sale or to educate, and whether the final delivery is a live presentation, a webinar, or a short video presentation, this book focuses on the particular difficulties linked to technical presentations. You will learn to create a story when there is none, gain the interest of an audience who may not feel as strongly for the topic as the speaker does, turn abstract concepts into visual models, overcome the limitations of the medium (limited space, two dimensions), maintain interest through rhythm, and use effects, not to look cool or get that WOW moment, but to serve the message. Getting The Message Across presents a number of field-tested ideas for raising interest. The use of various techniques and

careful scripting will help you, even if you aren't a natural-born show-person, to communicate effectively, and to make your audience remember your message, and not necessarily your slides. This book will teach you: Rhythm and animations, and the use of transitions To hold audience interest even with dry topics To create memorable presentations Techniques useful for PowerPoint, Keynote for Mac, and any similar presentation medium or environment What You Will Learn Turn austere topics into interesting stories. Give rhythm and pacing to your presentations. Build a narrative during transitions and animations. Hold audience interest and make listeners feel clever. Make people remember your presentation rather than your cool use of slideware. Who This Book Is For People who have to communicate effectively on strongly technical topics. This book targets educators and trainers as well as technical consultants who need to present complex solutions to customers or leads, as well as would-be speakers at scientific or technical conferences. Getting The Message Across is a book for people who want to make their presentations not only more attractive, but really memorable. It is for people who aren't looking for a standing ovation, but who are willing to do what they can to be understood and to make their messages remembered. Getting The Message Across focuses on using slideware such as PowerPoint and Keynote. Such slideware, for all its flaws, is still one of the best ways to communicate, not only live, but also in dematerialized communications (webinars, video tutorials) for reaching an ever-growing audience.
