**Chromotherapy - The Power of Colors** Christian Valnet, Chromotherapy is an alternative medicine that uses colors as a therapy for the treatment of diseases. Chromotherapy has very ancient origins, since traditional medicines have always attributed great importance to the influence of colors on man's health and mood. Chromotherapy practices were known since Ancient Egypt: Egyptian mythology assigns the god Thot the discovery of chromotherapy. According to hermetic tradition, both the Egyptians and the Greeks made use of minerals, stones, crystals and colored ointments, as

well as painting the walls of the places of treatment. Chromotherapy can be applied alone or as an enhancement to other treatments, being a formidable catalyst for stimulating natural self-healing processes. People who suffer physically or psychologically can profitably associate chromotherapy with any treatment (allopathic, homeopathic, physiotherapy, reflexology) because it stimulates the natural disposal of toxins mobilized by the active ingredients of the products, cleaning and protecting the whole organism. This treatment can be practiced on three levels: · Physical treatment, on a sore, infected or traumatized area of the body, to solve skin or rheumatological problems · Eye treatment, a central regulation treatment that stimulates both body and mind. The color is, in fact, perceived through the eyelids as sunlight and influences the patient's psyche. Recommended in case of tiredness, stress and sleep disturbances. · Acupuncture treatment, aimed at certain organs, and serves to recharge and naturally heal the ailments of the body.

*Asian Art Therapists* Megu Kitazawa, 2020-11-29 This book explores Asian art therapist experiences in a predominantly white professional field, challenging readers with visceral, racial, and personalized stories that may push them far beyond their comfort zone. Drawing from the expertise and practices of Asian art therapists from around the world, this unique text navigates how minority status can affect training and clinical practice in relation to clients, co-workers, and peers. It describes how Asian pioneers have broken therapeutic and racial rules to accommodate patient needs and improve clinical skills and illustrates how the reader can examine and disseminate their own biases. Authors share how they make their own path—by becoming aware of the connection between their lives

and circumstances—and how they liberate themselves and those who seek their services. This informative resource for art therapy students and professionals offers non-Asian readers a glimpse at personal and clinical experiences in the White-dominant profession while detailing how Asian art therapists can lead race-based discussions with empathy to become more competent therapists and educators in an increasingly diversifying world.

**Alternative Healing Through Chromotherapy** Lilia Seven, 2013-11 Chromotherapy, or color therapy, is a method of therapy that is done using color. In itself color does not heal, but it has been said that it enables the body to heal itself. It probably has something to do with light, frequency, and vibration and how everything works together to make the whole. That is why color therapy is a form of holistic healing - it aims to see the whole picture. Colors have different frequencies and vibrations and even correspond to a certain note on the musical scale. We have heard the words: green with envy, in the pink of health, down in the blues, red carpet treatment, and such. Since the mind and emotions are the most powerful energies on earth, people have come to associate colors with emotions and vice-versa. In order to better understand how color affects our lives, let us

see how it has evolved from the simple consciousness of early man to how we have come to use it now in our daily lives.

*Zolar's Magick of Color* Zolar, 2011-01-18 This engaging guide introduces readers to the rules of color magic and the natural influences of color that can be harnessed to bring about change and improvements in any area of life. Color has a profound effect on our attitudes and emotions. We even use color in our everyday speech—we're green with envy, see red when we're angry, and are blue when we're lonely. Scientific studies have discovered how certain colors influence mood, how quickly patients recover from illness, or how well students learn. *Zolar's Magick of Color* reveals the secrets of color and explains how to use its energy to make positive changes—to get a new job, get a raise, or develop a new romance. Zolar details a variety of ways to access the transformative properties of color, including wearing clothes of a particular color, surrounding yourself with that color, or burning a colored candle in a ceremony. Zolar explains each color's unique properties and gifts.
