The Way of Tarot Alejandro Jodorowsky,Marianne Costa,2009-11-17 Filmmaker Alejandro Jodorowsky’s insights into the Tarot as a spiritual path • Works with the original Marseille Tarot to reveal the roots of Western wisdom • Provides the key to the symbolic language of the Tarot’s “nomadic cathedral” • Transforms a simple divination tool into a vehicle for self-realization and healing Alejandro Jodorowsky’s profound study of the Tarot, which began in the early 1950s, reveals it to be far more than a simple divination device. The Tarot is first and foremost a powerful instrument of self-knowledge and a representation of the structure of the soul. The Way of Tarot shows that the entire deck is structured like a temple, or a mandala, which is both an image of the world and a representation of the divine. The authors use the sacred art of the original Marseille Tarot--created during a time of religious tolerance in the 11th century--to reconnect with the roots of the Tarot’s Western esoteric wisdom. They explain that the Tarot is a “nomadic cathedral” whose parts--the 78 cards or “arcana”--should always be viewed with an awareness of the whole structure. This understanding is essential to fully grasp the Tarot’s hermetic symbolism. The authors explore the secret associations behind the hierarchy of the cards and the correspondences between the suits and energies within human beings. Each description of the Major Arcana includes key word summaries, symbolic meanings, traditional interpretations, and a section where the card speaks for itself. Jodorowsky and Costa then take the art of reading the Tarot to a depth never before possible. Using their work with Tarology, a new psychological approach that uses the symbolism and optical language of the Tarot to create a mirror image of the personality, they offer a powerful tool for self-realization, creativity, and healing.

meXicana Fashions Aída Hurtado,Norma E. Cantú,2020-01-10 Collecting the perspectives of scholars who reflect on their own relationships to particular garments, analyze the politics of dress, and examine the role of consumerism and entrepreneurialism in the production of creating and selling a style, meXicana Fashions examines and searches for meaning in these visible, performative aspects of identity. Focusing primarily on Chicanas but also considering trends connected to other Latin American communities, the authors highlight specific constituencies that are defined by region (“Tejana style,” “L.A. style”), age group (“homie,” “chola”), and social class (marked by haute couture labels such as Carolina Herrera and Oscar de la Renta). The essays acknowledge the complex layers of these styles, which are not mutually exclusive but instead reflect a range of intersections in occupation, origin, personality, sexuality, and fads. Other elements include urban indigenous fashion shows, the shifting quinceañera market, “walking altars” on the Days of the Dead, plus-size clothing, huipiles in the workplace, and dressing in drag. Together, these chapters illuminate the full array of messages woven into a vibrant social fabric.

Write on Sarah Hudelson,1989-01-01 This monograph focuses on the writing development of young English-as-a-Second-Language (ESL) learners in order to provide teachers with an overview of research and theory about ESL children's writing from the perspective that research and theory may and should form practice. Recent research on children's first and second language writing is reviewed, including the influence of native language reading and writing ability on ESL writing development. The application of these research findings to instructional strategies and the need for classroom assessment and documentation of children's progress as writer's are considered. The following topics are highlighted: (1) the whole language approach; (2) the use of peer review in the classroom; (3) the elements that ESL students bring to writing; and (4) the connection between reading and writing.
