Decentralization of Forest Administration in Indonesia Christopher M.

Barr,Ida Aju Pradnja Resosudarmo,Ahmad Dermawan,John McCarthy,Moir

Moeliono,Bambang Setiono,2006-01-01 Since the collapse of Soeharto's New Order regime in May 1998, Indonesia's national, provincial, and district governments have engaged in an intense struggle over how authority and the power embedded in it, should be shared. How this ongoing struggle over authority in the forestry sector will ultimately play out is of considerable significance due to the important role that Indonesia's forests play in supporting rural livelihoods, generating economic revenues, and providing environmental services. This book examines the process of forestry sector

decentralization that has occurred in post-Soeharto Indonesia, and assesses the implications of more recent efforts by the national government to recentralize administrative authority over forest resources. It aims to describe the dynamics of decentralization in the forestry sector, to document major changes that occurred as district governments assumed a greater role in administering forest resources, and to assess what the ongoing struggle among Indonesia's national, provincial, and district governments is likely to mean for forest sustainability, economic development at multiple levels, and rural livelihoods. Drawing from primary research conducted by numerous scientists both at CIFOR and its many Indonesian and international partner institutions since 2000, this book sketches the sectoral context for current governmental reforms by tracing forestry development and the changing structure of forest administration from Indonesia's independence in 1945 to the fall of Soeharto's New Order regime in 1998. The authors further examine the origins and scope of Indonesia's decentralization laws in order to describe the legal-regulatory framework within which decentralization has been implemented both at the macro-level and specifically within the forestry sector. This book also analyses the decentralization of Indonesia's fiscal system and describes the effects of the country's new fiscal balancing arrangements on revenue flows from the forestry sector, and describes the dynamics of district-level timber regimes following the adoption of Indonesia's decentralization laws. Finally, this book also examines the real and

anticipated effects of decentralization on land tenure and livelihood security for communities living in and around forested areas, and summarizes major findings and options for possible interventions to strengthen the forestry reform efforts currently underway in Indonesia.

Response of Millet to Nitrogen and Irrigation Wesley G. Smith, William Lawrence Parks, 1967 Much work has been done on the problem of incorporating weather into crop production functions. This has been especially true at the aggregate level as economists have attempted to explain the effects of weather to technology on increases of agricultural output over time. At the micro level, agronomists and economists have also attempted to explain variation in yields between years as a function of weather in agronomic experiments where the same treatments have been applied over a number of years. The use of simulation in this study represents an extension of agronomic-economic research techniques to allow fertilizer recommendations to be expressed on a probability basis.

Foreign Investment in the Petroleum and Mineral Industries Raymond F. Mikesell, 2013-10-18 Raymond F. Mikesell deals with sources of conflict between private foreign investors and the governments of developing countries. He concludes that government ownership and control will expand and that foreign investors are most likely to become sellers of their special services rather than remain investors who act freely for the benefit of parent companies. The Oxford Handbook of Ezekiel Corrine Carvalho, 2023-09-22 The current state of scholarship on the book of Ezekiel, one of the three Major Prophets, is robust. Ezekiel, unlike most pre-exilic prophetic collections, contains overt clues that its primary circulation was as a literary text and not a collection of oral speeches. The author was highly educated, the theology of the book is dim, and its view of humanity is overwhelmingly negative. In *The Oxford Handbook of Ezekiel*, editor Corrine Carvalho brings together scholars from a diverse range of interpretive perspectives to explore one of the Bible's most debated books. Consisting of twenty-seven essays, the Handbook provides introductions to the major trends in the scholarship of Ezekiel, covering its history, current state, and emerging directions. After an introductory overview of these trends, each essay discusses an important element in the scholarly engagement with the book. Several essays discuss the history of the text (its historical context, redactional layers, text

criticism, and use of other Israelite and near eastern traditions). Others focus on key themes in the book (such as temple, priesthood, law, and politics), while still others look at the book's reception history and contextual interpretations (including art, Christian use, gender approaches, postcolonial approaches, and trauma theory). Taken together, these essays demonstrate the vibrancy of Ezekiel research in the twenty-first century.
