The Horizons of Christopher Columbus: Using the Heavens to Map America Arne Molander,2012

Erikson, Eskimos & Columbus James Robert Enterline,2003-05-01 This revealing analysis of Medieval cartography and native American travel upends conventional narratives about discovering the New World. For generations, American schools have taught children that Christopher Columbus discovered America in 1492. But evidence shows that Leif Erikson set foot on the continent centuries earlier. As debate continues over which explorer deserves the credit, early maps of North America suggest that we may be asking the wrong questions. How did medieval Europeans have such specific geographic knowledge of North America, a land even their most daring adventurers had not yet discovered? In Erikson, Eskimos, and Columbus, James Robert Enterline presents new evidence that traces this knowledge to the cartographic skills of indigenous people of the high Arctic, who, he contends, provided the basis for medieval maps of large parts of North America. Drawing on an exhaustive chronological survey of pre-Columbian maps, including the controversial Yale Vinland Map, this book boldly challenges conventional accounts of Europe's discovery of the New World.

Piri Reis Map of 1513 Gregory C. McIntosh,2012-03-15 One of the most beautiful maps to survive the Great Age of Discoveries, the 1513 world map drawn by Ottoman admiral Piri Reis is also one of the most mysterious. Gregory McIntosh has uncovered new evidence in the map that shows it to be among the most important ever made. This detailed study offers new commentary and explication of a major milestone in cartography. Correcting earlier work of Paul Kahle and pointing out the traps that have caught subsequent scholars, McIntosh disproves the dubious conclusion that the Reis map embodied Columbus's Third Voyage map of 1498, showing that it draws instead on the Second Voyage of 1493-1496. He also refutes the popular misinterpretation that Reis's depictions of Antarctica are evidence of either ancient civilizations or extraterrestrial visitation. McIntosh brings together all that has been previously known about the map and also assembles for the first time the translations of all inscriptions on the map and analyzes all place-names given for New World and Atlantic islands. His work clarifies long-standing mysteries and opens up new ways of looking at the history of exploration.
